AUDIENCE:

Cathy Klutsky, Director of North American Operations for EPR Fireworks Software, believes there is “gold” within all of the information that the FFIRS system holds. She would like to assist and facilitate with an analytical tool that allows one to drill down into the data for more specifics. Instant analytics would be available on data, also ISO, and accreditation reporting. Would love to help Florida with its reporting.

Relatively new product, not exclusive to Florida.

NEXT MEETING: April 1, 2019 Tallahassee, FL

Chairman Napoli stated that it was a great pleasure serving on the Panel as well as on the Standards Council. He urged current members to remember, the Legislature established this Panel as well as the Standards Council, to be advisory to the State Fire Marshal’s Office. This sometimes means, the advice is hard, they may not want to hear it, but it is the responsibility of the members and the entities they represent, to take it seriously and to take all of the information from the meetings back to your agencies and associations you represent. It is very important.

Director Halas presented certificates of appreciation to members who were terming out.
