## ***I. EXECUTIVE SUMMARY***

*Florida Special Disability Trust Fund*

*Actuarial Review*

*June 30, 2015*

---

**Purpose**

The State of Florida Department of Financial Services (“the Department”) has engaged the services of AMI Risk Consultants, Inc. (“AMI”) to perform the following for the Florida Special Disability Trust Fund (“the Fund”):

- Analyze the Fund’s exposure and loss history.
  - Estimate the Fund’s *outstanding claim liability* at June 30, 2015, on an undiscounted and discounted basis.
  - Estimate the number of claims and total amount of expenditure from the Fund (projected approvals) that will occur during prospective fiscal years 2015/2016, 2016/2017, 2017/2018, 2018/2019, and 2019/2020.
  - Provide a summary of claim statistics as of June 30, 2015 for the following:
    - Change in the total number of notices of claim on file with the Fund
    - The number of newly filed notices of claim
    - Change in the number of proofs of claim processed by the Fund
    - Fee revenues refunded and revenues applied to pay down the liability of the Fund
    - Average time required to reimburse accepted claims
    - Average administrative costs per claim.
-

---

**Terminology**

The term “*reserves*” or “*loss reserves*” is commonly used to mean outstanding claim liability as of a given date, and may appear in this report and/or in the attached exhibits with that meaning.

---

**Acknowledgment  
of Qualifications**

Aguedo M. (Bob) Ingco is a consulting actuary and President of AMI Risk Consultants, Inc. He is a Fellow of the Casualty Actuarial Society and a Member of the American Academy of Actuaries. Mr. Ingco meets the qualification standards of the American Academy of Actuaries to provide the estimates in this report.

---

**Distribution  
and Use**

This report is intended for use by the Fund’s management for financial reporting, budgeting and other internal requirements. We disclaim the use of this report for any other purpose.

We suggest that the user of this report review a complete copy as parts considered out of context might be misleading.

---

---

**Conclusions****Outstanding Claim Liability at June 30, 2015**

We estimated the following outstanding claim liability at June 30, 2015. Also shown below is the Fund's estimated unfunded claim liability given its cash balance at that date.

**Estimated Outstanding Claim Liability  
As of June 30, 2015  
(\$000's)**

	<b>Total Outstanding Claim Liability</b>	<b>Unfunded Outstanding Claim Liability</b>
<b>Undiscounted</b>	\$887,487	\$796,767
<b>Discounted</b>	625,901	535,181

Discounted estimates assume an average annual rate of return on invested assets of **4%**, as selected by the Fund. All estimates are shown at the **expected confidence level**, i.e. there is no margin added to our central or midpoint estimate to allow for potential adverse development.

**Analysis of Change in Outstanding Liability**

The components of the change in the **undiscounted** outstanding liability are outlined below. Since June 30, 2014 the Fund issued claim payments of **\$63.6 million** and experienced favorable claim development (i.e. reduced ultimate loss estimates) of **\$136.2 million**.

**Change in Undiscounted Outstanding Liability  
(\$000's)**

	<b>Total Outstanding Liability</b>	<b>Unfunded Outstanding Liability</b>
<b>Prior estimate at 6/30/14</b>	<b>\$1,087,287</b>	<b>\$973,286</b>
Claim payments during FY 2015	(\$63,630)	(\$63,630)
Change in estimated ultimate losses	(\$136,170)	(\$136,170)
Reduction in Fund's cash balance	N/A	\$23,281
<b>Current estimate at 6/30/15</b>	<b>\$887,487</b>	<b>\$796,767</b>
\$ Change between 6/30/14 and 6/30/15	(\$199,800)	(176,519)
% Change between 6/30/14 and 6/30/15	-18.4%	-18.1%

---

**Conclusions  
(continued)**

*Projected Cash Flow from Paid Losses (Approvals)*

Our estimated cash flow from paid losses during the next five fiscal years is as follows. These are estimates of the cash required for claim payments that will be approved and issued during each of the next five years. The table shows a range of indicated payments and our selected point estimate.

**Projected Paid Loss Cash Flow  
(\$000's)**

	<b>Low Estimate</b>	<b>High Estimate</b>	<b>Selected Estimate</b>
<b>FY 2015/2016</b>	\$54,617	\$60,024	\$56,810
<b>FY 2016/2017</b>	52,996	58,319	55,155
<b>FY 2017/2018</b>	51,301	56,406	53,375
<b>FY 2018/2019</b>	49,615	54,489	51,598
<b>FY 2019/2020</b>	47,871	52,511	49,761

---

---

**Conclusions  
(continued)**

Claim Statistics as of June 30, 2015

The table below summarizes FY 14-15 claim statistics historically tracked by the Fund. The prior year statistics are shown for comparison.

During the past year the number of open claims ***dropped by 156 or roughly 3%***, and ***one additional notice*** was filed.

The average time to reimburse accepted claims ***decreased by 6.5 months***, and the average administrative cost per open claim ***was essentially unchanged***.

**Florida Special Disability Trust Fund  
Summary of Historical Claims Records**

<b>Item</b>	<b>FY 14-15</b>	<b>FY 13-14</b>
Number of Open Claims	4,770	4,926
Number of Notices Filed	1	0
Number of Newly Received Proofs of Claim Processed by the Fund	0	0
Fee Revenues Received from 7/1 to 6/30	\$0	\$0
Fee Revenues Refunded from 7/1 to 6/30	\$0	\$0
Fee Revenues Applied to Pay Down Liability in FY	\$0	\$0
Average Time Required to Reimburse Accepted Claims Paid (in months)	8.10	14.67
Average Administrative Cost per Claim **	\$301.52	\$301.73

\*\*Average Administrative Cost per Claim = \$1,438,228 / 4770.

---

**Conclusions  
(continued)**

Open Claim Population Statistics as of June 30, 2015

The following table presents summary statistics for the open claim population at June 30, 2015. The claims are segmented based on the length of time since the last payment by the Fund. The group definitions are:

- **Active claims** – at least one payment in the past five years
- **Recently dormant claims** – most recent payment between 6 and 10 years ago
- **Long dormant claims** – most recent payment more than 10 years ago
- **Claims with no payment history.**

**Open Claim Statistics  
(\$000's)**

	<b>Active Claims</b>	<b>Recently Dormant Claims</b>	<b>Long Dormant Claims</b>	<b>Claims with no Payment History</b>	<b>Total</b>
Open Claim Count	1,638	720	762	1,650	4,770
Average Claimant Age	71	70	69	68	69
Average Claimant Life Expectancy (in years)	15	16	17	17	17
Average Payment**	\$25.203	\$22.260	\$25.960	N/A	\$25.203

\*\* Average Payments is the 5-year average for Active, and most recent annual payment for Dormant.

Only 34% of open claims appear to be “active”, and the average life expectancy of those claimants is 15 years. It is certainly possible for some “dormant” claims to resurface and submit payment requests. The average life expectancy among “dormant” claimants is similar to the “active” group at 16-17 years.

---

---

**Reliance and Limitations**

In performing the analysis, we relied without audit or verification on the following information furnished by the Fund. We reviewed the data received for reasonableness and consistency with prior valuations.

- Approvals, requests, and proofs, by accident year as of June 30, 2015.
- Fund balance at June 30, 2015.
- Fund's administrative expenses for fiscal year 2015.
- Prior actuarial report as of June 30, 2014.

Our contact at the Fund is Tom Krick, Manager of the Special Disability Trust Fund Unit.

*Assumptions for Missing Data Items*

In identifying claims with gender "unknown", we classified gender based on the claimant name.

For claims with missing birthdates, we assumed the average claimant age in that accident year. Date of birth was missing on 404 open claims, all of which were "dormant".

*Paid Approval Development History*

We relied on the paid approval development history as shown in Milliman's June 30, 2014 report, and augmented that history with incremental paid approvals from FY 2015. Milliman's report should be referenced for a discussion of how that development triangle was initially constructed.

*Risk of Adverse Deviation*

In projecting loss emergence, we assumed that historical claim amount and claim count development patterns are predictive of future patterns for the Fund. Actual future development may deviate from historical patterns.

We cannot reasonably estimate the uncertainties that ultimate liabilities are subject to. Therefore, while we believe our assumptions and methods are reasonable, we cannot guarantee that actual results will not differ, perhaps substantially, from our estimates.

---

## ***II. ACTUARIAL REPORT***

---

## **Background**

The Florida Special Disability Trust Fund (“the Fund”) was established to encourage the employment of workers with pre-existing permanent physical impairments. In particular, the Fund reimburses employers (or their carriers) for the excess in workers compensation (“WC”) benefits they have provided to an employee with a pre-existing impairment who is subsequently injured in a WC accident. As part of the reimbursement process, the Fund determines the eligibility of claims as well as audits and processes reimbursement requests.

Claims with an accident date on or after 1/1/98 are excluded from reimbursement by the Fund. Claims with an accident date before 1998 are still eligible to seek reimbursements. While most eligible claims have been reported, it is still possible for new claims to be submitted, for closed claims to be reopened, and for open but recently inactive claims to seek additional reimbursements. Therefore, the Fund is responsible for the liabilities associated with both reported and unreported eligible claims.

After a claim has been accepted, a request for reimbursement of additional expenses may be submitted annually. The Fund generates revenues to pay claims from two sources. The primary source is an assessment applied to the net written premium of Florida WC insurance carriers. The basis for determining the assessment rate is established by Florida statute. There is also a minor amount of revenue generated by flat fees for new notices and proof of claim submissions. This latter revenue has become negligible, as the cutoff accident date for eligible claims is now over sixteen years old.

The statute governing the assessment rate was revised in 2014 and states the following: “By July 1 of each year, the department shall calculate the assessment rate, which shall be based upon the net premiums written by carriers and self-insurers, the amount of premiums calculated by the department for self-insured employers, the sum of the anticipated disbursements and expenses of the Special Disability Trust Fund for the next calendar year, and the expected fund balance for the next calendar year.” The revised statute effectively eliminated the explicit assessment formula previously used (see description below) and also changed the assessment rate cap to 2.50%. The Fund collects assessments that are of a sufficient magnitude so that the Fund balance has an expected surplus each year.

---

---

**Background  
(continued)**

Historically, the Fund established the assessment rate according to the following statutory formula, which stated, “The annual assessment shall be calculated to produce during the next calendar year an amount which, when combined with that part of the balance anticipated to be in the fund on December 31 of the current calendar year which is in excess of \$100,000, is equal to the average of:

- a. The sum of disbursements from the fund during the immediate past 3 calendar years, and
- b. Two times the disbursements of the most recent calendar year.”

Additionally, there was a cap on the assessment rate of 4.52%.

---

---

## Actuarial Approach

### *Ultimate Losses By Accident Year – Multiple Methods Applied*

To estimate ultimate losses by accident year, we applied the following actuarial approaches.

- *Paid Loss Development Approach*
- *Development Approach Based on Counts and Amounts of Requests*
- *Development Approach Based on Counts and Amounts of Payments*
- *Life Annuity Approach.*

#### *Paid Loss Development Approach (PLDA)*

Under the PLDA, paid losses were multiplied by loss development factors to estimate ultimate losses.

We separately analyzed two categories of claims: First and Final (“F & F”) and Other than First and Final (“Other than F&F”).

F&F are claims are characterized as those where a single payment amount is established at the time of approval of a claim and is expected to be the only payment made. Payments on Other than F&F claims typically occur over a longer time horizon than F&F claims.

#### *Development Approach Based on Requests and Payments*

This method is similar to PLDA. Counts of requests (or payments) by accident year are developed to ultimate based on their past development history. Similarly, average requested amounts (or average payments) by accident year are developed to ultimate. Ultimate losses for an accident year are then estimated as the product of ultimate counts and ultimate average amounts.

Ultimate counts and average amounts of payments were estimated separately for F&F and Other than F&F.

---

---

**Actuarial  
Approach  
(continued)**

*Life Annuity Approach*

We calculated an explicit reserve on a claim by claim basis for each “active” claim (as previously defined). The reserve was determined by:

- Claimant’s age and life expectancy at June 30, 2015
- Claimant’s average annual payment over the past five fiscal years.
- An assumed annual rate of inflation in claim costs of **5%**.

For life expectancy, we used the 2011 Period Life Table from the Social Security Administration. A copy of the table can be found on this site: <http://www.ssa.gov/oact/STATS/table4c6.html>

To this reserve we added the amount of “pipeline” payments (approved but not yet paid) pending at June 30, 2015. Such payments continue to be a liability of the Fund’s until actually issued.

Also added was a contingency reserve for “dormant” claims to allow for the possibility that some small percentage may re-emerge at a later date. The reserve was set at the sum of the most recent annual payment for each “dormant” claim. No inflation adjustment was applied.

We did not include any provision for either reopened claims or pure (unreported) IBNR. Historical reopened payments appear to be immaterial and only one new notice was received in the past two years.

The calculated reserves were summarized by accident year and added to cumulative payments to estimate ultimate losses.

---

---

**Actuarial  
Approach  
(continued)**

***Selected Ultimate Losses and Outstanding Claim Liabilities***

Ultimate losses by accident year were selected from the results of the described approaches. Cumulative paid losses were subtracted from the selected ultimate to estimate total undiscounted loss reserves.

In selecting ultimate losses equal weight was given to each of the methods described, except for the method based on projected ultimate counts and average amounts of requests. No weight was given to this method because the indications by accident year were inconsistent with the remaining three methods.

***Paid Loss Cashflow Projections***

We applied the following methods to estimate the cashflow from paid losses during the next five fiscal periods:

- Paid loss development
- Expected percent of ultimate losses to be paid each year
- Expected percent of loss reserves to be paid each year.

Cashflow was estimated separately for F&F and Other than F&F claims.

---

---

**Attached Exhibits**

We prepared the attached Summary Exhibit to summarize the results of our calculations. There are eight (8) pages to the Summary Exhibit. Each page relates to the following:

- Page 1 shows the summary of loss reserves and unfunded liability at June 30, 2015 on both an undiscounted and discounted basis.
- Page 2 shows the calculation of undiscounted and discounted reserves by accident year, and by type of claim – first and final and other than first and final.
- Page 3 shows the calculation of selected ultimate losses based on the calculated ultimates of methods previously described.
- Page 4 shows the summary of paid cash flows during the next five fiscal years
- Page 5 displays the historical claim statistics as of June 30, 2015.
- Page 6 reconciles the undiscounted reserves as of June 30, 2015 with the undiscounted reserves as of June 30, 2014.
- Page 7 shows the comparison of ultimate losses between June 30, 2015 and June 30, 2014 by accident year.
- Page 8 shows the comparison of paid losses between June 30, 2015 and June 30, 2014 by accident year.

We prepared Exhibit I to apply the PLDA previously described. There are three (3) pages to this exhibit:

- Page 1 shows a summary of indicated reserves on an undiscounted and discounted basis, and by type of claim category (first and final and other than first and final).
  - Page 2 shows calculation of ultimate losses using the PLDA, for first and final claims.
  - Page 3 shows calculation of ultimate losses using the PLDA, for other than first and final claims.
-

---

**Attached  
Exhibits  
(continued)**

We prepared Exhibit II to calculate the ultimates based on requested counts and average amounts. There are two (2) pages to this exhibit:

- Page 1 shows the calculation of ultimate request count.
- Page 2 shows the calculation of ultimate average requested amount.

We prepared Exhibit III to calculate the ultimates based on paid counts and average payments. There are four (4) pages to this exhibit:

- Pages 1 and 2 show the calculation of ultimate average paid amount for F&F claims, and Other than F&F claims, respectively.
- Pages 3A and 3B show the calculation of ultimate payment count for F&F claims, and Other than F&F claims, respectively.
- Page 4 shows the calculation of ultimate notices.

We prepared Exhibit IV to show the calculation of loss development factors:

Pages 1A-1E – Paid losses/approvals of Other than F&F claims

Pages 2A-2E - Paid losses/approvals of F&F claims

Pages 3A-3C – Count of notices

Pages 4A-4C – Count of requests

Pages 5A-5C – Requested amount

Pages 6A-6C – Average requested amount

Pages 7A-7C – Count of Payments for Other than F&F claims

Pages 8A-8C – Count of Payments for F&F claims

Pages 9A-9C – Average Amount Paid for Other than F&F claims

Pages 10A-10C – Average Amount Paid for F&F claims

We prepared Exhibit V to show the results of the reserve calculation using the life annuity method.

---

---

**Attached  
Exhibits  
(continued)**

*Paid Loss Cashflow*

Exhibit VI shows the calculation of paid loss cashflow during the next five fiscal years, separately for F&F and Other than F&F.

*Calculation of Discount Factors*

We prepared Appendix A to show the calculation of discount factors.  
There are two pages to this Appendix:

- *Page 1 – First and Final Claims*
  - *Page 2 – Other than First and Final Claims*
-

## ***IV. GLOSSARY OF TERMS***

## *Glossary of Terms*

---

***Accident  
Year***

Attributing to a given year the total cost of losses which occur in that year.

---

***Discount  
Reserve***

The present value, calculated at selected interest rates and payout patterns, of the payment of outstanding losses.

---

***Expected  
Loss***

Exposures multiplied by the loss rate.

---

***Exposure***

Extent of risk and/or possibility of loss (for workers' compensation the exposure is payroll).

---

***IBNR  
Reserve***

Reserve for claims incurred but not reported and for future changes to the case reserves.

---

***Loss  
Adjustment  
Expenses  
(LAE)***

Loss adjustment expenses may be broken down into: Allocated and Unallocated loss adjustment expenses (ALAE and ULAE). ALAE expenses are expenses (other than in-house administrative) for claims handling which can be identified as pertaining to a specific claim (such as outside legal expense). ULAE expenses are general administrative expenses such as salaries of employees.

---

***Loss  
Development***

Refer to the increase in number of claims, paid and incurred losses from a given accident year. The number of claims “develop” because in some cases, significant delay in the reporting losses occurs. Paid losses “develop” because claims are paid over several years. Incurred losses “develop” because of the increase in reported claims and because initial reserves tend to be inadequate at settlement.

---

***Glossary of Terms***  
*(continued)*

---

***Loss Development Method (LDM)*** Methods under which historical claim data are recorded and used to estimate the future development of existing claims. Loss development is the change in value of a body of claims from one valuation date to another valuation date.

---

***Paid Loss*** Amount paid on open and closed claims.

---

***Loss Rate*** The value of losses per unit of exposure.

---

***Ultimate Loss*** The incurred loss plus the IBNR reserve. The ultimate loss is the estimate of the total cost to settle all claims in the accident year.

---
