Agency Reported

The Risks, Issues, Assumptions and Readiness Activities tables below display only items that were opened/logged, closed/resolved or active during the reporting period.

DEP Risks

Critical Operational Elements	Risk Description	Status	Risk Rating	Mitigation/Response Strategy	Reporting Period Comments or Updates	Date of Status Change	Owner / Coordinator
Technology Data	Unclear Requirements and Potentially Changing Requirements	Open	9 (High/High)	FDEP technical team would need to have sufficient knowledge of FDEP financial systems. Allow for adjustments to the implementation schedule for unplanned changes/updates to requirements.	Without finalized interface specifications, the application team may have limited visibility into the expected changes in the data formats and structures. This ambiguity can lead to misinterpretation or incorrect implementation of the new PALM interfaces. Additionally, there is the potential that previous design specifications could change as a result of subsequent discoveries in later design segments.	11/13/23	Brady Schmidt
People Processes Technology	Resources and Turnover	Open	6 (High/Medium)	Ensure job-specific processes are properly documented.	FDEP has engaged the Division/District/Office staff throughout the department to document business processes and transfer key knowledge.	11/13/23	Lydia Griffin & Steve Waters
Processes Technology Data	Increased Risk of Application Update Errors	Open	4 (Medium/Medium)	Sufficiently documented business system processes.	Rushing the update process or making assumptions without proper interface specifications and sample data can increase the risk of errors and inconsistencies. It may result in data integration issues, data loss, or inaccurate data processing, which can impact the reliability and functionality of the application.	11/13/23	Brady Schmidt

DEP Issues

Critical Operational Elements	Issue Description	Status	Priority	Resolution Plan	Reporting Period Comments or Updates	Planned or Actual Resolution Date	Owner / Coordinator
People Processes Technology Data	SME Process & Business System Knowledge	Open	High - Impacts the ability of the agency to meet deadlines or milestones	Catalog Desktop Procedures, Document Business System functionality and interfaces.	FDEP Project Team has begun to facilitate information gathering and identifying financial data impacts. The results will be used for future planning of PALM implementation.	07/01/25	Lydia Griffin, Steve Waters
People Processes Technology Data	Identifying changes to processes and business systems as a result of a staggered design segmentation approach which can potentially change designs after the fact is hindering the ability of key business and technical resources to reach a decision or agreement about resulting impacts to agency business processes and systems due to known "unknowns".	Open	High - Impacts the ability of the agency to meet deadlines or milestones	Identifying key requirements now while keeping an open mind to potential changes down the road and structurally delineating future state requirements into known vs. unknown may help in building incremental build components/ requirements for agency business systems and processes.	FDEP Project team has begun to share latest PALM designs with SME's and CCN Leads to help them identify potential changes to business processes. Technical SME's are also working to identify potential changes to systems based on everything known so far.	12/31/24	Steve Waters

DEP Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments or Updates
People Processes Technology Data	SME Process & Business System Knowledge	Logged	11/13/23	Division/District/Office Business Systems remediation, processes and project management.	FDEP Project Team has facilitated information gathering and identifying financial data impacts.
People Processes Technology	PALM Project Implementation Schedule	Logged	11/13/23	Division/District/Office Business Systems remediation, processes and	In planning, the success of FDEP's implementation schedule is contingent upon the timeliness receipt of information from the PALM Project team.

Data				project management.	
People Processes Technology Data	DEP cannot complete system remediation until the following conditions are fulfilled: 1) ALL applicable PALM Design Segments related to said applications is completed. i. Interface specifications ii. Final business system design iii. Configuration Workbooks 2) DEP technical business requirements and design specifications are completed 3) DEP can only begin remediating FIN-CONVERT based on interface specifications and sample data received from PALM. 4) ALL DEP tier II and III applications to be remediated require OTIS/DEP Divisions to have completed the following: a. Supporting User Stories or process updates b. Data Mapping to PALM configuration workbooks and processes 5) Tier III applications are dependent on new design specifications for tier I and II systems.	Logged	02/14/24	Division/District/Office Business Systems remediation, processes and project management, PALM Team	Discussed at the PALM Touchpoint meeting on 2/14/2024
