

Bimonthly Agency Readiness Status Report

This report is a collection of Bimonthly Agency Readiness Status Reports as provided by agencies on a bimonthly basis, containing the status of the agency and enterprise remediation progress for each business system required for the Florida PALM Financials and Payroll deployment, in accordance with Proviso contained in the 2024/25 General Appropriations Act.

Reporting Period:

January – February 2026

RW Task Timeliness

RW Task Completeness

Direct Impact Task Timeliness

Direct Impact Task Timeliness:

Score = 96.94%

- Submitted On Time = 40
- Submitted Late = 9
- Pending Submission = 0

Other Task Timeliness

Other Task Timeliness:

Score = 77.16%

- Submitted On Time = 53
- Submitted Late = 35
- Pending Submission = 3

Direct Impact Task Completeness

Direct Task Completeness:

Score = 92.92%

- Submitted Complete = 43
- Submitted Incomplete = 1
- Completed After Submission = 4

Other Task Completeness

Other Task Completeness:

Score = 92.33%

- Submitted Complete = 52
- Submitted Incomplete = 1
- Completed After Submission = 7

The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

The Change Champion Network composition reflects the completeness of your CCN makeup.

- Unique Filled Role = 9
- Duplicate Filled Role = 6
- Vacant Role = 0

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

AHCA Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	11/25/24		Deployment/Cutover	Unavailability of Accounting System	Increasing	9 (High/High)	If there is not an accounting system available in December 2026/January 2027, AHCA will not be able to complete the Weekly Medicaid Runs and will not have the ability to pay the providers, costing the State, millions of dollars in fines/penalties.	Strategy: 1) Change statutory requirements 2) Meet with CMS to explain the absence of Accounting System to plan for holding federal funds for more than 72 hours. 3) Meet with A&A and Treasury to aid in decision making process on the solution. 4) Multiple Projections for the month of December/January. Note: Banks are still operational	Millions of dollars in interest/fines/penalties.	3/5/2026: Awaiting DFS to identify an overall approach
Open and Mitigating	12/05/25		Agency Business System	New ABS Medicaid	Increasing	9 (High/High)	If the new enhancements to the	1. Hire additional development resource.	Extensive manual intervention in the	03/05/2026: Medicaid coding is being corrected in production.

				Enhancements			SunFocus Medicaid Module are not completed and tested in SunFocus before June 30, 2026, remediation of those new enhancements for Florida PALM cannot be accomplished before the conclusion End-to-End Testing.	2. Prioritization of the changes that are to be done. 3. Identify the changes to SunPALM as changes are being made to SunFocus. 4. Multiple cycles of WMR testing needs to be completed before October 16, 2026.	Bureau of Financial Services after Go-Live	
Open and Monitoring	07/18/25		Agency Business System	Non remediated Tier 1 ABS (Delayed SunFocus Remediation)	Increasing	6 (High/Medium)	If SunFocus is not remediated by 07/31/2026, the Bureau of Financial Services will need to manually perform some of the operational tasks that are currently in SunFocus.	The critical business processes (Weekly Medicaid Run module and Invoicing modules) will be 100% remediated by 05/01/2026 following three cycles of the Medicaid Runs have been tested and validated as a success criterion. Manual processes have been documented to perform the functions for the remaining modules.	Extensive manual processing in the Bureau of Financial Services	3/05/2026: Prioritization of the status related enhancements and fixes and Florida PALM remediation are being monitored and mitigated.
Open and Mitigating	01/31/25		Agency Business System	Known Impacted ABS	Decreasing	1 (Low/Low)	If remediation for In-house ABS applications that are impacted with the implementation of Florida PALM have not been planned for by 3/30/2026, AHCA may have resource constraints for the remediation, resulting in the inability of AHCA processes to function.	1) Hire a second PM to manage the ABS applications that are indirectly impacted by Florida PALM where impacts are associated with the Enterprise applications (PeopleFirst, FACTS, etc.)-Completed 2) Identify change requirements for identified applications. ABS: Versa - Completed ABS: ePar- In progress ABS: FX-PeopleFirst Impact ABS: AHCA Network-PeopleFirst Impact ABS: CATS - Due to the nature of this COTS software remediation is not required for Go-Live. Remediation can be completed after FACTS has made its changes. 3) Create Plan of ABS remediation and testing ABS: Versa - Completed ABS: ePar ABS: FX-No Impact ABS: AHCA Network - Impact ABS: CATS - N/A	PAR will need to be completed manually	3/3/2026: AHCA and DCF FACTS teams are meeting to discuss testing efforts for the current batch interface

AHCA Issues										
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period	Comments for Jan. - Feb. 2026
Closed	09/30/24	01/23/26	High - Impacts the ability	User Acceptance Testing	ABS Remediation Schedule different than Florida PALM	Remediation of the Agency Business System (SunFocus) application is not on the same schedule as the Florida PALM schedule. Some remediation activities will cross Segments, causing the agency timeliness metric to continue to be low.	Interface remediation will be completed to be ready to perform Cycle 2 Interface Testing before the August start date. Update the comments of the remediation tasks as they become complete.	01/30/26	1/13/2026	-Awaiting final Florida PALM Outbound file to be received.
Open	09/06/24		High - Impacts the ability	Staffing/Resource Availal	Florida PALM Tasks and SunFocus Operations Competing Resources	Production incidents and time sensitive activities will continue to interfere with the resource tight bureau. Accept the issue and work with the Florida PALM Project to identify when a deliverable will be late.	Leadership will prioritize the activities	12/31/26		
Open	10/28/24		Low - All impacts not listed	Agency Business System	FY25-26 Lack of Funding for Third-Party Vendor supported Agency Business System	Funding was not requested for Third Party Vendor-Supported applications for the FY25-26 due to analysis of agencies business systems being done concurrently with the deadline for the submission of the Legislative Budget Request. Those applications that have now been identified are ePAR (electronically routed PAR app) the is impacted by PeopleFirst changes and CATS (agency contract application that feeds FACTS).	Revised Plan of Action: Remediation of CATS is underway and will be completed to participate in End-to-End Testing. ePAR remediation impacts and planning remains under investigation., but can perform the process manually if necessary.	04/24/26	03/05/2026:	Discussions took place with DFS-FACTS and AHCA to plan requirements and testing efforts.

N/A	N/A	673	Submit Bimonthly Agency Readiness Status Report	03/02/26	03/10/26	100% - Submitted	03/06/26	3/3 - working on updates 3/6 - updates completed today with email to rose for sign off		
Indirect	N/A	674	Submit Monthly Progress Report - Testing	03/02/26	03/31/26	50% - In Progress		3/3 - IT team reviewing 3/6 - understanding Smartsheet links and values contribution to the newer progress report with UAT added		

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

APD Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	09/08/25		User Acceptance Testing	Compressed schedule reduces time for end-user training	Stable	9 (High/High)	Internal training assistance will be hired in early 2026	Adjust training schedule dynamically; prepare modular training that can be updated quickly; ensure "train-the-trainer" resources are ready.	Compressed schedule reduces time for end-user training	UAT - learn by fire - keeping teams aware of the multiple resources available to use the application to accomplish the test tasks.
Open and Monitoring	09/08/25		Agency Business System	Encumbrance ID and the ABC re-write change from FLAIR	Decreasing	9 (High/High)	Because the encumbrance id is not generated in real time and requires an overnight feed - this poses a huge impact on the flow of work/process in the ABC system	Discussion with PALM team to review options and see how things can be worked thru	process change will impact the way ABC handles transactions	APD has a work around is putting it into affect - will be closing this next go round
Open and Monitoring	09/10/25		Post Implementation	PALM Security - audit and transaction history trail for ALL activity within the system - currently noted as it pertains to transactions in the active CMS Framework.	Stable	9 (High/High)	Current Transaction was initiated in CMS and was posted with a successful view on screen/online, however the transaction was GONE the next day. The follow up with PALM was that they could not or had no way of knowing who interacted with this transaction - why was it gone, who did it, what is the history, where did it go? and the solution from PALM was they didnt know - NOT A GOOD ANSWER - and that the agency should retract/delete the transaction and re-do it - without understanding if this would cause a duplication etc.	PALM for CMS is currently in use- the APD Team is working to try and find a SME on the issue with explanation and there is not a solution or fix on tracking the history of what took place for audit - understanding - for how to fix and find	HUGE - it causes a loss of integrity - a loss of trust in the system - a need to challenge the security parameters used for this application	APD is still trying to understand the security system transaction history situation for the challenges of potential audit activity for the future
Open and Mitigating	05/02/25		User Acceptance Testing	Limited time for user testing due to technical delays - interface changes and updates not finalized	Stable	6 (Medium/High)	APD IT Teams preparation and training and UAT	Create a risk buffer in schedule for testing; prioritize high-value scripts - IT Team working sprint and actively testing as you go	Missed defect discovery leading to production errors	UAT with other agencies moves at the pace of the lowest denominator - adjusting as needed for an all inclusive PALM session overview experience
Open and Mitigating	07/07/25		User Acceptance Testing	Testers Lack Knowledge of the New PALM Platform	Stable	6 (Medium/High)	No one has seen that actual PALM application - logged on or used it yet - this will be a learn by fire scenario	Training, mentorship, guides expecting PALM direction and initial effort with teams/agencies	Challenged during UAT to fully test the system	UAT - learn as you go in order to assist the PALM team as a tester.
Open and Monitoring	09/08/25		Post Implementation	Increased support demand post go-live due to rushed testing/training	Stable	6 (Medium/High)	Post implementation support is questions for both IT and functional efforts	Strengthen hypercare team; extend support hours post go-live; provide quick reference guides and job aids.	Increased support demand post go-live due to rushed testing/training	APD is planning for hypercare and continued training and PALM support after go live
Open and Monitoring	05/02/25		Interface	Legacy system interfaces mapping with ABS-PALM APIs	Stable	6 (High/Medium)	APD IT Teams preparation and training and UAT	Develop interface translation layers; validate APIs early - continual review and update	Critical data exchanges fail; project delays and costly rework	APD has managed the Agency Business System challenges and is ahead of the timeline in efforts to update and make necessary changes within ABS's
Open and Monitoring	05/02/25		User Acceptance Testing	Inadequate cloud platform performance under high	Increasing	6 (High/Medium)	APD IT Teams preparation and training and UAT	Conduct load testing in pre-production; scale infrastructure proactively	Users face slow performance; loss of trust in system usability	UAT - slow processing while in UAT doesn't clear the open question of application speed and confident user experience for go lie

				user load due to multi agency impact							
Open and Monitoring	05/02/25		Post Implementation	Security configuration gaps during system transition	Stable	6 (High/Medium)	APD IT Teams preparation and training and UAT	Security audits and review access controls before go-live	Data breaches or access violations; potential audit or legal issues	Role mapping - System access and data are being continuously addressed with UAT roll out	
Open and Monitoring	05/02/25		Conversion/Configurator	Data corruption or loss during migration process	Stable	6 (High/Medium)	APD IT Teams preparation and training and UAT	Perform dry-run migrations; ensure backups are tested and validated - need PALM Conversion Plan as soon as ready <ul style="list-style-type: none"> o Perform multiple rounds of test migrations before UAT o Use automated reconciliation tools to compare legacy vs. cloud data o Include specific test cases for historical data validation o Assign a dedicated data QA team 	Permanent loss of financial or transactional data	PALM has yet to provide the actual conversion plan for data migration timeframe prior to go live - waiting	
Open and Monitoring	05/02/25		Deployment/Cutover	Failure of third-party integrations post-migration - unknowns for peripheral systems - STMS/MFMP/etc	Decreasing	6 (High/Medium)	APD IT Teams preparation and training and UAT	Engage vendors early; build fallback interface plans - APD attending all meetings at this time	Failure to process essential transactions like payroll or grants	Enterprise systems are reaching out to APD for testing and trial updates for UAT and this is in current mitigation with those 3rd party systems	
Open and Monitoring	05/02/25		Post Implementation	Inadequate disaster recovery or backup strategy during cutover - new system - what if's	Stable	6 (High/Medium)	APD IT Teams preparation and training and UAT	Implement robust backup and rollback strategies; conduct failover tests - once understanding of PALM conversion plan is in place - adjust and ready	Irreversible data loss or extended downtime during transition	PALM to provide an overview of disaster recovery and outage support at some time in the future - open to understanding the agency role in any special crisis	
Open and Mitigating	07/07/25		User Acceptance Testing	Incomplete or Incorrect Test Scenarios	Stable	6 (High/Medium)	APD Finance Teams creation of testing stories for UAT inadequate	<ul style="list-style-type: none"> o Involve key accounting SMEs in test case design o Map test cases to migrated business processes and compliance requirements o Conduct a pre-UAT review/approval of test scripts o Use traceability matrix to ensure coverage 	unable to test fully	UAT is providing the guidance - agency adaptation is still to come.	
Open and Monitoring	09/08/25		User Acceptance Testing	Delay in UAT completion pushes back project go-live	Stable	6 (High/Medium)	Planning due to PALM PAUSE	Build buffer into project plan; prioritize critical test cases; agree on criteria for UAT sign-off; escalate blockers quickly.	Delay in UAT completion pushes back project go-live	UAT phase roll out is still open and altho it appears there will be no further go live delays - there remains the open user testing to be completed with challenges to come.	
Open and Monitoring	09/08/25		Conversion/Configurator	Data migration defects not identified in time due to late UAT	Stable	6 (High/Medium)	Use of Config workbook data from current Mock versions - making certain the data is APD's	Perform early mock data conversions; include data validation as a separate workflow; increase data reconciliation effort post-UAT.	Data migration defects not identified in time due to late UAT	APD is actively participating in UAT - we dont know what we dont know so APD is working to trial all scenarios of use over the next 6 months	
Open and Monitoring	09/08/25		Conversion/Configurator	Cutover rehearsal shortened or skipped	Increasing	6 (High/Medium)	Determine of Freeze timeframe is critical to all transactions	Lock cutover rehearsal windows early; use dry-runs even if UAT lags; ensure rollback procedures are validated.	Cutover rehearsal shortened or skipped	Cutover plan from PALM - still pending	
Open and Mitigating	05/02/25		Training	1. Inadequate trainer knowledge	Stable	4 (Medium/Medium)	APD Teams preparing for PALM Training	Conduct Train-the-Trainer programs; certify trainers before rollout	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	UAT and Training are different efforts - with UAT providing insight on the use of PALM that will help to mitigate training challenges	
Open and Mitigating	05/02/25		Training	3. Inconsistent training across departments	Stable	4 (Medium/Medium)	APD Teams preparing for PALM Training	Standardize training materials and delivery; track attendance and completion	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	UAT is exposing the cross functional support and needs especially for a small agency with limited head count	
Open and Mitigating	05/02/25		Training	4. Technical issues during training (e.g., system crashes)	Stable	4 (Medium/Medium)	APD Teams preparing for PALM Training	Test systems in advance; have IT support on standby during training	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	UAT is different than training and the participation will assist with preparation for a positive training experience	
Open and Monitoring	05/02/25		Training	6. Training not aligned with actual job functions	Stable	4 (Medium/Medium)	APD Teams preparing for PALM Training	Customize training per role; gather pre-training feedback	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	Small agency task responsibilities still to be determined for module/role mapping/organization accounting support.	
Open and Mitigating	05/02/25		Training	7. Knowledge retention loss post-training	Stable	4 (Medium/Medium)	APD Teams preparing for PALM Training	Provide job aids, refreshers, and post-training support	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	APD is working to make this a full effort in resource direction, helpdesk support, SME and user experiences to learn the intricacies of PALM.	
Open and Monitoring	05/02/25		Training	8. Delayed training timeline	Stable	4 (Medium/Medium)	APD Teams preparing for PALM Training	Build buffer into project schedule; monitor progress regularly	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	Training is scheduled for late in 2026 - open to wait and see	
Open and Monitoring	05/02/25		Training	9. Overwhelming training content	Stable	4 (Medium/Medium)	APD Teams preparing for PALM Training	Break into modules; offer self-paced options	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	PALM is a lot and the exposure in UAT is helping to determine the depth at which our learning/training efforts will go	
Open and Monitoring	05/02/25		Staffing/Resource Availal	Delay in configuring role-based access and permissions - chances	Stable	4 (Medium/Medium)	APD IT Teams preparation and training and UAT	Map all roles early; perform iterative testing with key users - advantage during UAT	Access issues for users; delay in operations post-migration	UAT is making the role mapping challenges more evident and with that organizational challenges are being addressed - changed	

				updates learned during training and UAT						
Open and Monitoring	09/08/25		Training	Training content misaligned with final system functionality	Stable	4 (Medium/Medium)	Revisions and adjustments are dynamic and currently being supported	Develop training with placeholders for UAT updates; plan for quick revisions; validate training content with UAT leads.	Training content misaligned with final system functionality	Small agency org structure aligned with PALM GAAP will be mitigated as time allows
Open and Mitigating	09/08/25		User Acceptance Testing	User resistance and loss of confidence due to perceived instability	Stable	4 (Medium/Medium)	Communication of expectations remains	Maintain clear communication about reasons for delay; involve super users in UAT to advocate system readiness; reinforce benefits of new system.	User resistance and loss of confidence due to perceived instability	UAT is giving new insight with use and therefore is an opportunity for all to learn - APD is working to make this a positive experience always
Open and Mitigating	05/02/25		Training	2. Low user engagement or attendance	Stable	3 (High/Low)	APD Teams preparing for PALM Training	Mandatory training policy; offer flexible schedules and formats	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	APD small agency challenges to provide the end user adequate time to participate due to daily task responsibilities will remain a challenge thru go live
Open and Monitoring	09/08/25		Post Implementation	Missed regulatory or financial reporting deadlines if go-live slips	Stable	3 (High/Low)	deadlines and cutoffs for APD are very important	Identify critical reporting deadlines; prepare contingency plan (e.g., run legacy system in parallel); escalate early if deadlines are at risk.	Missed regulatory or financial reporting deadlines if go-live slips	open and will review mitigation plans closer to go live
Open and Monitoring	05/02/25		Staffing/Resource Availa	5. Resistance to change from employees	Stable	2 (Medium/Low)	APD Teams preparing for PALM Training	Communicate benefits early; involve staff in design and feedback	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	APD is focused on learning PALM as new and not comparison to old system - this is making it a more positive embrace for employees
Open and Monitoring	05/02/25		User Acceptance Testing	10. Lack of evaluation and feedback mechanisms	Stable	2 (Medium/Low)	APD Teams preparing for PALM Training	Implement surveys, quizzes, and performance tracking	Training is a work in progress and will adjust with any PALM received direction - PALM roll out in progress	UAT in progress - with sessions providing new insight - use of application - samples providing overview are helping to determine agency use of PALM

APD Issues										
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period	Comments for Jan. - Feb. 2026
Open	05/01/25		High - Impacts the ability of the agency to meet deadlines or milestones	Agency Business System	PALM Project Mapping Key	APD IT Teams preparation and training and UAT	Develop interface translation layers; validate APIs early - continual review and update	05/30/25		APD will keep this open with the effort to understand and map what we internally know even though PALM isn't providing any mapping documentation - only talking to it
Closed	09/22/25	11/06/25	High - Impacts the ability of the agency to meet deadlines or milestones		Encumbrance ID	The ABC re-write has exposed an issue that limits a very effective process in assigning IDs for encumbrances that will be delayed	review within APD and IT team in the process requirements - understand and see what PALM can support	01/30/26		Business Process change has been adapted to make this work within the APD requirements understand and taking into consideration any delays in data availability

APD Assumptions						
Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period	Comments for Jan. - Feb. 2026
People Data	Legacy system data is complete and accurate	Logged	05/12/25	Finance, IT, Audit, All modules using historical data		UAT vetting in progress
Processes Technology	Chart of Accounts structure will be successfully mapped to the new system	Logged	05/12/25	Budget, General Ledger, Accounting Leads		UAT vetting in progress
People Processes	All critical business processes are documented	Logged	05/12/25	All accounting teams, Change Management, Training Team		UAT and Training will help identify any changes to internal agency organizational accounting practices
Technology Data	Cloud system will support all required functionalities	Logged	05/12/25	Program and Financial Users, System Admins		UAT vetting in progress
People Processes Technology Data	Interfaces with peripheral systems will remain compatible	Logged	05/12/25	IT, Third-Party Vendors, Grants/Payroll/Procurement Units		UAT vetting in progress
Processes Technology Data	Data migration will occur with minimal downtime	Logged	05/12/25	All staff, especially Payroll, Accounts Payable, and Receivables		PALM Conversion plan pending
People Processes Technology Data	End users will receive adequate training prior to go-live	Logged	05/12/25	All functional end users		UAT and Training will help identify any changes to internal agency organizational accounting practices - training for system is still pending
People Processes	Security roles and access permissions will be properly configured	Logged	05/12/25	Security Admins, HR, Supervisors, External Auditors		APD challenges in review with June role mapping to be defined and completed for remaining UAT/Training and go live
Processes Technology Data	Reports used in the legacy system will be recreated accurately	Logged	05/12/25	Finance, Program Managers, Oversight Agencies		UAT
People Processes Technology Data	Project timeline will remain on schedule despite unknowns	Logged	05/12/25	Project Managers, Executive Sponsors, All involved teams		UAT and Training will help identify any changes to internal agency organizational accounting practices - training for system is still pending
People Processes Technology Data	UAT - the system requirements and user stories reflect the real-world processes and accounting requirements of the end users.	Logged	07/07/25	UAT - Critical features may be missing or behave incorrectly, requiring rework late in the project		UAT and Training will help identify any changes to internal agency organizational accounting practices - training for system is still pending
People Processes Technology Data	UAT Testers have sufficient training or knowledge of the new system as they execute UAT from PALM instruction, are able to validate the accounting processes.	Logged	07/07/25	UAT - hard to determine false positives and false negatives.		UAT and Training will help identify any changes to internal agency organizational accounting practices - training for system is still pending
People Processes Technology Data	Assuming that connected systems (e.g., payroll, enterprise systems, all modules, tax engines, banks) are available and simulate live interaction appropriately for UAT	Logged	07/07/25	UAT - Errors may appear that are integration-related (enterprise systems) rather than related to the core application, delaying sign-off.		Enterprise systems in UAT at this time - APD working with those teams
People Processes Technology Data	Timeline & Scheduling Assumptions • The overall project timeline will shift, or downstream activities (training, cutover prep, data migration) will need to be compressed or re-sequenced. • A buffer must be assumed for additional test cycles or defect resolution, since issues may be uncovered later than planned. • Project milestones tied to UAT completion (e.g., training readiness, go-live rehearsals) will also shift.	Logged	09/08/25	Schedule - dates - timelines must change		No change at this time
People	Resource & Cost Assumptions	Logged	09/08/25	Impact of financial is all		No change to assumption

Processes Technology Data	<ul style="list-style-type: none"> • Additional time will be required from testers, business SMEs, trainers, and project team members, potentially leading to higher project costs. • Extended overlap of legacy system and new system (e.g., parallel runs, dual licensing, support contracts) must be assumed. • Overtime or additional resources may be required to handle compressed activities. 			overarching to all aspects of the project	
People Processes Technology Data	Training & Change Management Assumptions <ul style="list-style-type: none"> • Training materials may need revisions after UAT is complete, as final system behaviors/configurations may not yet be validated. • End-user training may need to be shortened, delivered closer to go-live, or delivered in waves (e.g., super-user first, general users later). • Users may have less time to adapt before cutover, so additional hypercare/support must be assumed post go-live. 	Logged	09/08/25	All Users are affected	UAT and Training will help identify any changes to internal agency organizational accounting practices - training for system is still pending
People Processes Technology Data	Quality & Risk Assumptions <ul style="list-style-type: none"> • Not all test scenarios may be fully executed if UAT time is reduced, so assumptions must include higher risk of defects surfacing post go-live. • Data migration validation may be less thorough, requiring additional reconciliation effort during hypercare. • Post-go-live support demand will likely be higher than originally planned due to reduced user readiness. 	Logged	09/08/25	All Users are affected	UAT and Training will help identify any changes to internal agency organizational accounting practices - training for system is still pending
People Processes Technology Data	Stakeholder & Communication Assumptions <ul style="list-style-type: none"> • Stakeholders must assume increased communication needs to manage expectations and maintain user confidence. • Executive sponsors may need to assume greater tolerance for go-live risk or accept the trade-off of delaying further. 	Logged	09/08/25	All Users are affected	APD is communicating often and frequently using the teams model so that all team members - bottom up are in the loop

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

CITRUS Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	02/28/25		Business Process Change	Design Misalignment	Stable	9 (High/High)	Florida PALM designs fail to take into account the reporting and business needs of the agencies, requiring each agency to develop alternative solutions to meet their existing business needs currently met by FLAIR.	Citrus is working to resolve the reporting issues we anticipate through the use of interfaces from PALM.	Lack of reporting to our governing body.	This risk is valid for the reporting period.
Open and Monitoring	03/10/26		Role Mapping	Separation of Duties	Stable	9 (High/High)	Citrus has a smaller staff than is possible to use role mapping to establish separation of duties.	Citrus will develop a plan for compensating controls and submit it to A&A for approval by 6/26/26.	Possible audit findings. Issues using Florida PALM.	This risk was opened during the reporting period.
Open and Monitoring	02/28/25		Business Process Change	Foreign Currency Transactions	Stable	6 (Medium/High)	Citrus currently purchases foreign currency to pay overseas vendors. We use a SPIA account, and transfer funds as needed to wire payments overseas. Foreign vendors are transitioning away from accepting paper check, which is the only way the state will allow us to pay with USD (Treasury will not wire funds to a foreign bank).	Citrus is working with Treasury and CFO's office to identify possible solutions. Still to be identified is method for reporting foreign currency payments in FACTS.	If the issues is not resolved, information in FACTS could be incomplete/inaccurate.	This risk is valid for the reporting period.
Open and Monitoring	02/28/25		Staffing/Resource Availability	Funding Alignment	Decreasing	3 (High/Low)	The legislature has provided funding for this fiscal year, but there is a misalignment between the timing of project schedule, the availability of funds, and the timeframe staffing resources are needed.	Certain Readiness Tasks are delayed until remediation can be accomplished. It is anticipated that Citrus will be able to complete these tasks by Fall 2025.	This is a risk we re monitoring, and we do not anticipate it becoming an issue.	This risk has been lowered due to funding availability.

CITRUS Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026

CITRUS Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
People	The leadership of the Department of Citrus will support the project by providing resources, access to systems and stakeholders, and by supporting the organizational change management strategy created by the project team.	Logged	05/12/25	Citrus Accounting Dept and all Admin staff, CCN's PALM project team	This assumption is valid for the reporting period.
People Processes Technology	The Legislature will appropriate and timely release General Revenue funding for contracted services for Agency support of the PALM project and those resources are available to perform the work assigned to them as scheduled.	Logged	11/14/23	Citrus Accounting Dept and all Admin staff, CCN's PALM project team	This assumption is valid for the reporting period.
People Processes Technology Data	The timeline of the project is subject to the independent DFS Florida PALM project and all key milestones and transition dates are provided by the larger PALM Project.	Logged	05/12/25	PALM Project Team, Citrus Accounting Dept, CCN's	This assumption is valid for the reporting period.
People Processes	Citrus business process owners will provide input for necessary process mapping efforts with enough detail and time to implement needed changes according to the Florida PALM schedule.	Logged	05/12/25	Citrus Accounting Dept and all Admin staff, CCN's PALM project team	This assumption is valid for the reporting period.
People Technology	Citrus business system owners will provide requirements for necessary system modifications with enough detail and time to implement needed changes according to the Florida PALM schedule.	Logged	05/12/25	Citrus Accounting Dept and all Admin staff, CCN's PALM project team	This assumption is valid for the reporting period.
People Processes	Citrus project stakeholders, involved parties, and other interested individuals will be available for feedback and review of documentation to meet project milestones.	Logged	05/12/25	Citrus Accounting Dept and all Admin staff, CCN's PALM project team	This assumption is valid for the reporting period.
Technology	Citrus stakeholders have a clear understanding of the benefits and limitations of low-code development and are supportive of its implementation.	Logged	05/12/25	Citrus Accounting Dept and all Admin staff, CCN's PALM project team	This assumption is valid for the reporting period.
People Technology	The project team has access to relevant documentation, specifications, and knowledge about the legacy systems and their data structures.	Logged	05/12/25	Citrus Accounting Dept and all Admin staff, CCN's PALM project team	This assumption is valid for the reporting period.
People Processes	The DFS Florida PALM project team will provide a PALM UAT environment to all CCN members, SMEs, and End Users prior to go-live. The Department will be given sufficient time to test and practice critical transactions before go-live in this dedicated testing environment.	Logged	11/14/23	PALM Project Team, Citrus Accounting Dept, CCN's	This assumption is valid for the reporting period.
People Processes Technology Data	The DFS Florida PALM project will provide key information identifying the functionality, business processes, and timeline of the larger project in a timely manner to facilitate planning and execution.	Logged	08/30/24	PALM Project Team, Citrus Accounting Dept, CCN's	This assumption is valid for the reporting period.
Processes Technology Data	The DFS Florida PALM project team will provide a reporting solution at go-live to support the business needs of the Department.	Logged	11/14/23	PALM Project Team, Citrus Accounting Dept, CCN's	This assumption is valid for the reporting period.
Processes Data	The DFS Florida PALM project team will provide information regarding the data fields to support all Chart of Accounts values Citrus currently uses (such as OCA's).	Logged	11/14/23	PALM Project Team, Citrus Accounting Dept, CCN's	This assumption is valid for the reporting period.
Technology	The DFS Florida PALM project team will provide solutions and integration for Enterprise applications - WORKS, STMS, People First. Etc.	Logged	11/14/23	PALM Project Team, Citrus Accounting Dept, CCN's	This assumption is valid for the reporting period.

People	The DFS Florida PALM project team will provide both in-person, on-line, and recorded training for CCN's, SMEs, and all accounting staff.	Logged	11/14/23	PALM Project Team, Citrus Accounting Dept, CCN's	This assumption is valid for the reporting period.
People Processes Technology Data	Key tasks, such as user maintenance, vendor maintenance, vendor payment registration, etc. will be done outside of PALM in their respective enterprise systems, e.g. AOD, STMS, VIP, etc.	Logged	02/09/24	PALM Project Team, Citrus Accounting Dept, CCN's	This assumption is valid for the reporting period.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

COM Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	08/26/24		Business Process Change	Lack of support for Life-to-Date Accounting and Reporting	Stable	9 (High/High)	Commerce needs LTD balances for federal grant reporting, which is a predominant portion of funding for this department. PALM will make available a Project Costing module that has some type of LTD capability but details are not known to agencies at this time. Contingency plans have been identified and Commerce is currently working to determine best response if Project Costing module will not provide needed	Create internal life-to-date reporting system.	Commerce will face significant disruptions in financial oversight, reconciliation, and compliance. This gap will hinder our ability to produce accurate historical financial reports, negatively impact audit readiness, and delay decision making processes that rely on cumulative financial data.	Internal life-to-date reporting system is currently being built. Risk will remain stable until internal system is complete.

							support.			
Open and Mitigating	12/12/24		Training	Common Understanding of Florida PALM project goals	Decreasing	6 (Medium/High)	Florida PALM project impacts many business units in Commerce's F&A area. Team acknowledges there must be unity in understanding of project goals.	Provide project update communications to team or team members associated with the areas of impact via email, Teams channels, Teams chat, face-to-face and/or virtual meetings. Also provide opportunities to participate in workshops and CoLab sessions provided by PALM. We will also provide and share information to team members with office/agency social gatherings approved by management in approved locations/areas.	If there is no common understanding of the PALM project goals, then there could be misalignment among team members, leading to potential misunderstandings, inconsistent priorities, and inefficiencies in project task execution.	Commerce feels this risk continues to decrease but will continue to monitor at this time.
Open and Mitigating	12/12/24		Business Process Change	Documentation Tracking Process	Decreasing	6 (High/Medium)	Team identified the need for a consistent documentation tracking process.	Develop documentation tracking process tool, schedule meetings with supervisors and determine a centralized location for BPs. We will then develop a matrix to cross check and verify all BPs listing in the tracking tool are in the centralized location. Supervisors will provide any missing information or correct incorrect information.	If there is no documentation tracking process in place, then documentation updates may be missed, causing delays, inconsistencies, or errors in project deliverables.	Commerce is currently working to create a centralized tool for business processes documentation tracking. Risk is now a 6 (was a 9) but will remain as we update processes impacted by PALM project.
Open and Mitigating	01/30/25		Conversion/Configuration	Data Migration Process	Stable	4 (Medium/Medium)	Proactive efforts by project team to identify potential data-related risks.	<ul style="list-style-type: none"> - Perform a comprehensive data audit before migration to identify and resolve inconsistencies - Use automated data validation tools to ensure data accuracy during migration - Conduct multiple rounds of data testing in a staging environment to verify accuracy and completeness - Establish a plan to address any critical issues identified post migration 	If the data migration process from FLAIR to PALM encounters inconsistencies or errors, then critical financial data could be compromised, leading to reporting inaccuracies and delays in operational processes.	Commerce will continue to monitor this risk as data migration is still in progress.
Open and Monitoring	03/09/26		Interface	DW/BI Report (APR009)	Stable	4 (Medium/Medium)	A report which lists all disbursements vouchers needs to be provided. This report does not appear to be available in PALM online at this time.	Coordinate with the DW/BI team to confirm the development timeline and deployment schedule for the consolidated disbursement voucher report.	If the DW/BI report that consolidates all disbursement vouchers is not available on schedule and there is no equivalent report in PALM online, then Commerce may lack a centralized source to access complete payment details, potentially impacting financial oversight, reconciliation, and reporting accuracy.	This is a new risk that Commerce will continue to monitor.
Open and Mitigating	01/07/25		Training	End User Training	Stable	3 (High/Low)	Proactive efforts by project team to identify potential end user risks.	<ul style="list-style-type: none"> - Develop a detailed training plan tailored to various user roles, including hands-on practice sessions - Provide user-friendly guides, FAQs, and on-demand video tutorials for continuous learning - Partner with Florida PALM to provide support helpdesk information to address end-user questions during and after implementation - Involve SMEs and end users in Commerce specific and Florida PALM User Acceptance Testing for familiarization purposes, as well as feedback" 	If end users are not adequately trained or fail to adapt to Florida PALM, then system usage could be inefficient, causing a decrease in productivity and potential disruption to daily operations.	Commerce will continue to monitor this risk as UAT recent began. Agency specific training sessions have begun and will continue throughout UAT.
Open and Mitigating	01/07/25		Interface	FLAIR Integrations	Stable	2 (Medium/Low)	Proactive efforts by project team to identify potential interface risks.	<ul style="list-style-type: none"> - Conduct a system mapping and dependency analysis for all interfacing applications - Test integrations thoroughly during User Acceptance Testing - Partner with Florida PALM, third-party vendors, and in-house teams to ensure compatibility - Monitor system performance post-integration and address any issues promptly using Florida PALM help desk" 	If FLAIR does not seamlessly integrate with existing Commerce applications and third-party interfaces (MFMP, etc.), then there could be disruptions in data exchange, resulting in operational bottlenecks and delayed financial transactions.	Commerce will continue to monitor this risk as integration efforts are still in progress.
Open and Mitigating	01/07/25		Business Process Change	Business Processes Alignment with Florida PALM	Stable	2 (Medium/Low)	Proactive efforts by project team to identify potential business process risks.	<ul style="list-style-type: none"> - Review all Florida Commerce Finance & Administration business processes impacted by the Florida PALM implementation in order 	If existing business processes are not adequately reviewed and aligned with Florida PALM, the inefficiencies may persist or new	Commerce is currently working to align existing business processes with Florida PALM. Commerce will continue to monitor this risk.

DACS Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	10/31/24		Agency Business System	Florida PALM UAT Plan details needed for batch processing	Stable	3 (High/Low)	Pending information about UAT testing details will impact our internal management of this risk. The Department is waiting on more information from PALM regarding their full end to end testing plans. Update: FL PALM provided batch schedule at UAT Kick-off 01/23/2026	Internal management and mitigation of this risk is dependent on pending information about Florida PALM UAT testing details from the PALM Project. Our Agency CCN collectively continues to monitor any updates related to testing (PALM Technical Team communications, AC meetings, Florida PALM Website, Florida PALM Knowledge Center, Task Talk, etc.) Dates and timing impacts correlate to the Projects	FL PALM must be running regular batch processing during UAT to allow FDACS to interface Agency Business System test scenario data (API002, ARI007, ARI009, ARI011, IUI002, POI002, POI006, SDI009) to PALM during the testing window. Failure to successfully test batch processing is detrimental to the departments planning and preparation for go live fiscal operations.	FL PALM provided batch schedule at UAT Kick-off 01/23/2026. FL PALM plans on running regular batch processing during UAT which will allow FDACS to interface Agency Business System test scenario data (API002, ARI007, ARI009, ARI011, IUI002, POI002, POI006, SDI009) to PALM during the testing window. Failure to successfully test batch processing is detrimental to the department's planning and preparation for go live fiscal operations. UAT has just begun and the complete batch schedule has not yet been tested. Also, PALM has advised the schedule may be modified during UAT. This risk will remain open during UAT.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DBPR Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	01/13/25		Agency Business System	If significant problems are encountered during UAT when testing Versa Regulation output files (spreadsheet uploads and interfaces),	Decreasing	9 (High/High)	DBPR IT has many simultaneous projects on their plates and they are trying to prioritize to get the PALM project what is needed when it is needed.	Conduct structured walkthroughs, desk-checks, and as much unit testing as possible prior to UAT	There may not be enough time for DBPR IT to make modifications in time to be retested	DBPR-IT sent questions, questions were answered, waiting for a response.

				there may not be enough time for DBPR IT to make modifications in time to be retested						
Open and Monitoring	03/06/26		Deployment/Cutover	If a querying tool similar in ease of use as the FLAIR@DBPR application is not provided by PALM, DBPR may need to create their own version of PALM@DBPR. This may require development assistance instead of macros as was done in the past.	Increasing	9 (High/High)	DBPR staff are extensive users of the FLAIR@DBPR application. If this system is not replaced, it may negatively impact productivity.	A gap analysis is needed to show available data in the data warehouse that DBPR can query from, and the query abilities of FLAIR@DBPR. If the data warehouse is limited to report data, and if DBPR must have access to real time PALM data, this could become an issue. The complexity of PALM may be too high for existing F & A staff to develop a query tool on their own.	The solution for this cannot negatively impact productivity.	More investigation is needed on the scope of reports and the data warehouse, including access to data not necessarily contained in PALM reports, but necessary for queries. Some queries may require real-time data, but this must be confirmed.
Open and Mitigating	03/06/26		Deployment/Cutover	The OCM has left the agency the end of February. This may cause delays in updating procedures during PALM UAT	Stable	6 (Medium/High)	OCM left unexpectedly at the end of February. His task was to update procedure documentation since test cases have been completed.	Much of the procedure update documentation needs are captured in the Test Cases. This information can be used to populate draft procedures to start. There may be a need for the addition of policies to ensure quality, for example, PALM file upload naming standards, etc. to ensure uniformity and cleanliness at DBPR high standards. Discussions with Sally and supervisors will determine if this should be elevated to an issue, or if the PM and existing staff can complete the work.	Pending discussions with supervisors and F & A Chief.	New risk, updates will be provided after discussions are completed.
Open and Mitigating	02/19/25		User Acceptance Testing	If all business processes (Current-State and Future-State) are not reviewed before UAT begins, DBPR SMEs will have minimal time to catch up	Decreasing	4 (Medium/Medium)	Subject Matter experts need to review all workflows (present and future) to ensure the business functions are documented properly because this documentation serves as the foundation for many other PALM Project activities.	Make every attempt to schedule and conduct business process review sessions (Crosswalks) before UAT begins. UAT currently scheduled to begin in August 2025.	DBPR SMEs will have minimal time to catch up review of business processes	PALM has been documenting future state process steps as part of UAT Preparations. They are also adding videos, and providing both application and IT support during in-person UAT sessions, and they are providing the presentations early enough for printing before staff attend UAT. Also, most users have expressed that while the business processes themselves are comfortably familiar, the increase in the number of steps to complete a process is much higher than in FLAIR. There doesn't seem to be a need to "catch up." Rather, they know they need to perform the same business processes but with more steps.
Open and Mitigating	05/31/24		Business Process Change	If DBPR end users are not familiar with and understand PALM Future-State Processes, then translating Current-State Business Processes will be difficult and will negatively impact DBPR PALM readiness	Stable	3 (High/Low)	Documentation on Future-State business processes is being provided by The Project on the PALM website.	Establish and conduct PALM Education and related planning. Review Future-State processes with end users. Add Tasks to the Project Schedule and manage their completion.	Translating Current-State Business Processes will be difficult and will negatively impact DBPR PALM readiness	Test Cases, PALM Topic and Activities User Stories, and support materials for trainings have been published to the DBPR PALM Implementation Channel for UAT Testers. The OCM and the SAM are working with business units on issues, questions, etc. now until UAT Testing begins.
Open and Mitigating	11/15/24		Deployment/Cutover	If DBPR does not have a cutover plan for the duration when FLAIR is shutdown but PALM is not yet available, key business processes may not be able to be completely timely and could have negative consequences.	Stable	3 (High/Low)	Down time and other conditions need to be planned for to ensure a smooth transition.	Create a Cutover Plan that identifies all planned activities and possible impacts, taking into account Florida rules and regulations, and other considerations.	Key business processes may not be able to be completely timely and could have negative consequences	Completion of the cutover plan is a requirement for DBPR Go/No Go approval to move to PALM Production.
Open and Mitigating	08/19/24		Conversion/Configuration	If DBPR does not test email notifications from PALM as part of our UAT testing (particularly proxies and delegates), then DBPR may not have the desired flexibility once we go to production with PALM	Decreasing	2 (Medium/Low)	We need to not only test normal email notifications sent from PALM, but also special conditions and overrides to simulate the real world.	Be sure to create test scripts that incorporate proxies and delegates for PALM email notifications during UAT	DBPR may not have the desired email notification flexibility once we go to production with PALM	Email Notifications from PALM may be a non-issue. The flexibility in PALM is represented by WorkCenters and "open" Items pages that list artifacts needed approvals or responses including current status.

DBPR Issues									
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	06/04/25		Critical - Impacts the abil	Interface	ABS Versa Regulation remediation is behind schedule	DBPR IT has not produced any output files from the remediation of Versa Regulation for PALM and development of the direct interface API002 has not even been started, which should have started in May based on the re-baselined Project Schedule.	Escalate to DBPR leadership and make sure it is prioritized highly by DBPR IT.	10/31/25	DBPR is in the second round of issue resolution with DBPR IT and waits word on the last round of changes.

DBPR Assumptions						
Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026	
People Processes Technology Data	The Department will complete all necessary interface and spreadsheet upload builds to allow for business operations to continue in the Florida PALM solution.	Logged	04/01/24	DBPR IT Project Manager Organizational Change Manager DBPR Revenue staff DBPR Disbursements staff Accounting Systems Analyst	API002 is being updated after round 2 of testing.	
Processes Technology Data	The Florida PALM Project will be able to provide timely and complete requirements for agency business processes with enough detail and time to implement the changes according to the Florida PALM schedule.	Logged	04/01/24	All DBPR stakeholders	Payroll UAT requirements were in some cases a day before In-Person UAT.	
People Processes Technology Data	DBPR Divisions/Offices will identify and make the necessary business process changes with enough detail and time to implement the changes according to the Florida PALM Project Schedule.	Logged	04/01/24	All DBPR stakeholders	Testers stated that finally being able to work in Florida PALM has eased their anxiety.	
People Processes Technology Data	Testing of remediated agency and enterprise business systems and business processes will be rigorous and scheduled well-ahead of implementation to ensure enough time to resolve identified issues.	Logged	04/01/24	DBPR IT Project Manager Organizational Change Manager DBPR Revenue staff	Enterprise business systems are scheduling UAT Testing and requesting tester names.	
People Processes Technology Data	The Department will actively participate in the agency testing efforts of the new processes and validate the outputs meet the needs of the Department.	Logged	04/01/24	All DBPR division/office staff Project Manager Organizational Change Manager Finance & Accounting Bureau Chief	DBPR is currently running test cases	
People Processes Technology Data	DFS PALM (The Project) will maintain the Requirements Traceability Matrix (RTM) as well as recording the traceability details for all Business requirements	Logged	04/18/24	All DBPR division/office staff Project Manager Organizational Change Manager Accounting Systems Analyst Finance & Accounting Bureau Chief DBPR Sponsor	PALM is enforcing the RTM through Agencies populating the User Story Inventory	
People Processes Data	DBPR will identify any unique Business requirements resulting from review of the Future-State processes and will maintain these requirements in the DBPR PALM Readiness RTM as well as related traceability details for these requirements only	Logged	04/18/24	All DBPR division/office staff Project Manager Organizational Change Manager Accounting Systems Analyst Finance & Accounting Bureau Chief DBPR Sponsor	There have not been any requirements unique to DBPR.	
People Processes Technology Data	All state-wide enterprise Business Systems will be remediated by their owners and are not the responsibility of DBPR; however, DBPR will be responsible for testing all systems.	Logged	06/21/24	All DBPR division/office staff Project Manager Organizational Change Manager Accounting Systems Analyst Finance & Accounting Bureau Chief Project Sponsor	Enterprise Business System UAT testing is at the scheduling stage	
People Processes Technology Data	The Project Management Plan (PMP) will be reviewed quarterly (every 3 months) for accuracy and the appropriate updates will be applied so that the PMP does not become outdated and obsolete.	Logged	08/07/24	Project Manager Finance & Accounting Bureau Chief Project Sponsor	The schedule is currently being updated to include completion of the first session of UAT testing.	
People Processes Technology Data	DBPR can resolve all technical hurdles and get Bank Deposit files out of Versa to FGCC without involving the DBPR Business staff	Logged	10/23/24	DBPR IT DBPR Revenue staff Project Manager	API010 is scheduled for testing Bank Deposit files from Versa after API002 testing is complete.	
People Processes Technology Data	DBPR Finance and Accounting staff can review the QLIK report generated out of Versa Regulation when they need to see Remittance Type (Deposit Type) details	Logged	12/04/24	DBPR Revenue staff	This will be tested once the Versa interface is complete.	
People Processes Technology Data	DBPR IT will complete the ABS modification for Versa Regulation (ABS) in time for all required testing	Logged	03/05/25	DBPR IT Project Manager	Versa required more modification than planned. F & A is waiting for a response after answering questions sent in February.	
People Processes Technology Data	Existing DBPR high-level Risks related to PALM education and training will continue to be mitigated/managed and any specific challenges related to training will be addressed as assumptions within the Training Plan rather than creating new individual Risks	Logged	04/02/25	Project Manager Organizational Change Manager	PALM's Education and Training materials have significantly reduced or removed any high level training risks.	
People Processes Data	DBPR as well as the Project will follow PMI best practices and Rule 60GG statute.	Logged	05/28/25	IV&V endorses this.	The project is being tracked as required.	
People Technology Data	PALM will provide a tool with the same capabilities as FLAIR@DBPR so that staff can query PALM data	Logged	03/06/26	Finance and Accounting Bureau Chief Project Manager Finance and Accounting Supervisors	DBPR has heard in leadership meetings that other agencies are considering creating their own tool if they do not have the same functionality available as in FLAIR@DBPR.

DCF Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	11/18/25		Business Process Change	Loss of Cross-Agency Payroll Processing Capability in PALM	Increasing	9 (High/High)	DCF currently has the ability in FLAIR to process salary and OPS payroll payments for employees of other state agencies based on People First permissions. In PALM, this functionality will be restricted and DCF will only be able to issue payments for DCF employees, eliminating the cross-agency payroll processing capability that DCF currently provides.	Collaborate with PALM team to identify and implement a long-term solution that restores cross-agency payroll processing capability or establishes a sustainable alternative process.	Loss of Current Functionality: Elimination of established business capability that DCF performs for other state agencies Workflow Disruption: Interruption to current payroll processing workflows for non-DCF employees Service Impact: Potential service interruption for other state agencies that depend on DCF for	No change for this risk for this reporting period

									payroll processing Process Redesign Required: May necessitate establishment of new inter-agency coordination procedures and process changes Relationship Impact: Could affect DCF's service relationships with other state agencies	
Open and Monitoring	05/06/25		Agency Business System	Risk of not completing system development/repair by deadline for interface testing approval, potentially resulting in exclusion from PALM end-to-end testing at a future date.	Increasing	6 (Medium/High)	The Florida PALM Project has imposed a deadline for agencies to identify and have in place the interfaces for systems that will connect to PALM. Risk of not completing system development/remediation by that deadline for interface testing approval, potentially resulting in exclusion from PALM end-to-end testing. Since many of the development teams that will address these builds and remediations are newly online, there is a high likelihood that work will not be completed by this deadline.	Avoid. Establish aggressive development milestones Increase development resources Weekly progress monitoring Early interface testing preparation Prioritize critical system components Regular communication with PALM project team Mock up files as if they were coming from our apps, for completion of April/May testing	Missing development deadlines can exclude the project from critical testing phases, impacting overall project success and delivery.	No change for this risk for this reporting period
Open and Mitigating	05/06/25		Staffing/Resource Availa	Out-of-balance prioritization of PALM with other business processes	Increasing	6 (Medium/High)	Potential negative impacts to user acceptance training, business interface development and deployment, and readiness for go-live may result if activities related to the transition to Florida PALM are raised to the same (or higher) priority than other, legacy business processes in and around FLAIR.	Mitigate. Work with business units to develop work management plan to ensure adequate distribution of personnel resources across competing priorities. Involve SMEs frequently in discussion of interface systems to ensure mapping of existing FLAIR chartfields to PALM chartfields. Engage Agency Liaison and Sponsor as necessary to set priorities for business system managers	Imbalanced prioritization can strain resources and affect the efficiency of other business processes, leading to operational challenges.	No change for this risk for this reporting period
Open and Monitoring	12/30/25		Business Process Chang	DCF Budget Consolidation to Headquarters - Impact on PALM Systems and Functionality	Increasing	6 (Medium/High)	DCF is planning a major organizational change to consolidate all budget authority to Headquarters (Org L2=20 or 30) at the department level, moving away from the current regional budget structure (L2=31, 32, 33, etc.). While expenditures will continue at the regional level, all budgetary control and authority will be centralized. This significant policy and structural change is planned for implementation on July 1, 2026, and may have substantial impacts on existing systems, particularly AJT/CJT functionality and future FRC functionality within PALM.	Conduct comprehensive impact analysis through cross-functional working group to identify all system, process, and organizational barriers prior to July 1, 2026 implementation. Develop mitigation plans for each identified impact area and coordinate with PALM implementation timeline.	If critical system limitations identified, escalate to executive leadership for policy modification or timeline adjustment.	No change for this risk for this reporting period
Open and Mitigating	05/06/25		Business Process Chang	If encumbrances are not accomplished in MFMP then sufficient budget may not be available for purchase even though purchase order is approved.	Increasing	6 (High/Medium)	DCF accumulates expenses that are payable from multiple fund sources (Federal, Grant, GF, etc). In FLAIR, encumbrances could be made against a single fund, regardless of whether or not that fund was sufficient to pay the obligations. When the expenses were realized, they were split across multiple funds to accumulate a sufficient amount. Since MFMP will budget check against PALM at the time of the encumbrance, a new business process will be needed to replace prior one.	Mitigate. Provide training and job guides to teach that budget check must be conducted before seeking purchase order approval.	Failure to accomplish encumbrances can lead to budgetary issues and financial mismanagement, affecting project funding and execution.	No change for this risk for this reporting period
Open and Mitigating	05/06/25		Staffing/Resource Availa	Operational Staff Turnover - General	Stable	4 (Medium/Medium)	Personnel changes are an ever-present risk to the project.	Accept. Ensure job-specific processes are documented and generic enough to permit retraining of new incoming staff.	Similar to management turnover, this can cause delays in operations but can be managed with proper documentation and training.	Risk of key staff turnover will exist for the life of this project
Open and Mitigating	05/06/25		Agency Business System	FL PALM's inclusion of Speed Keys	Stable	4 (Medium/Medium)	FL PALM's inclusion of Speed Keys, particularly with	Mitigate. Adjust documentation where needed If Speed Keys	Improper integration of speed keys can disrupt business processes	No change for this risk for this reporting period

			Enterprise Applications, particularly with Enterprise Applications, can support current business processes that utilize Expansion Option with front end processing.				Enterprise Applications, may not be able to support current business processes that utilize Expansion Option with front end processing.	Business processes are not adopted such that they can support "front end processing" for "splits" then a new application must be made to act as a front end to conduct those operations.	Business processes, requiring additional resources to develop new applications and potentially causing delays.	
Open and Mitigating	05/06/25		Agency Business System	Incomplete/Imp Data Cleansing Activities	Increasing	4 (Medium/Medium)	FL PALM initiated agency data cleansing activities in September 2024 with Mock 1. After the first error dump, it was discovered that there were algorithmic errors that precluded the Mock 2 data extraction on November 30, 2024. Since that time, the focus of the data cleansing timeline has shifted to meet stage gates on the PALM schedule rather than focus on data integrity.	Avoid. Continue data cleansing activities, otherwise UAT testing with the data sets will produce unexpected and inaccurate results.	Inaccurate data cleansing can lead to flawed data analysis and decision-making, affecting the reliability of project outcomes.	No change for this risk for this reporting period
Open and Mitigating	05/06/25		Agency Business System	Incomplete/Imp Current State Analysis	Stable	4 (Medium/Medium)	DCF's project strategy shifted after the due dates of several of the initial current state assessment tasks had lapsed. In light of this change, current state analysis has occurred on an evolving basis.	Mitigate. Due to change in implementation strategy and change in stakeholders, avoiding inconsistencies in current state analysis is unlikely. Remediation must take place when and where appropriate.	Misunderstanding the current state can result in flawed project planning and execution, leading to inefficiencies and potential project failure.	No change for this risk for this reporting period
Open and Mitigating	05/06/25		Deployment/Cutover	Incomplete/Imp UAT planning and execution	Decreasing	4 (Medium/Medium)	With the approval of Amendment 12, UAT has shifted to a two-fold purpose: 1) test PALM; 2) Train on how to use PALM. The second of these two purposes could derail deliberate focus on testing PALM and connected ABSs.	Avoid. Build user stories that accurately represent current business processes so that users are aware which processes to test against PALM and enterprise systems. Ensure a time management plan for SMEs so that a testing/work balance can be achieved.	Poor user acceptance testing can result in untested processes and system failures post-implementation, affecting project success.	No change for this risk for this reporting period
Open and Monitoring	05/06/25		Business Process Change	Federal Grant System Integration Approval Requirements	Increasing	4 (Medium/Medium)	Potential delays or complications in obtaining federal approval for transition of GRANTS remediation/replacement when interfacing with Florida PALM versus current FLAIR system. This may impact federal grant management and reporting capabilities.	Mitigate. Early engagement with federal stakeholders. Detailed documentation of PALM-GRANTS interface specifications. Parallel testing of both systems during transition. Regular status updates to federal authorities. Contingency planning for extended approval timeline.	Delays in approval can affect project timelines and funding, potentially jeopardizing project success.	No change for this risk for this reporting period
Open and Monitoring	05/06/25		Training	Delays and negative impacts may result if adequate training materials and information are not made available by the Florida PALM Project Team.	Stable	4 (Medium/Medium)	The PALM Project team has mentioned statewide training a number of times, only to remove commitments from discussion at a later date. The common rationale is that the agencies will be responsible for training.	Monitor. Continue to request materials and information from PALM. Work with SMEs and other agencies to develop comprehensive training plan independent of PALM Project team.	Lack of adequate training materials can hinder user adoption and system effectiveness, affecting overall project outcomes.	No change for this risk for this reporting period
Open and Mitigating	05/06/25		Staffing/Resource Availability	Project Manager/Agency Liaison Turnover	Stable	2 (Medium/Low)	Personnel changes are an ever-present risk to the project.	Mitigate. Ensure project approach and status are well-documented.	Disruption in leadership can lead to communication breakdowns and loss of project momentum. New leadership may require time to understand project intricacies, potentially causing delays in project timelines and affecting team morale.	Risk of key staff turnover will exist for the life of this project
Open and Mitigating	05/06/25		Staffing/Resource Availability	Project Staff Turnover	Stable	2 (Medium/Low)	Personnel changes are an ever-present risk to the project.	Accept. Ensure project staff responsibilities are well defined and documentation is up-to-date	While manageable, staff turnover can lead to temporary disruptions in workflow and productivity. It may require additional resources for recruitment and training, impacting project costs and timelines.	Risk of key staff turnover will exist for the life of this project
Open and Mitigating	05/06/25		Business Process Change	Operational Management Turnover - General	Stable	2 (Medium/Low)	Personnel changes are an ever-present risk to the project.	Accept. Ensure job-specific processes are documented and generic enough to permit retraining of new incoming staff.	Changes in operational management can lead to inefficiencies in process execution and decision-making. It may require time for new managers to adapt, potentially affecting project deliverables and stakeholder satisfaction.	Risk of key staff turnover will exist for the life of this project
Open and Mitigating	05/06/25		Staffing/Resource Availability	Department Leadership Turnover	Decreasing	2 (Medium/Low)	Personnel changes are an ever-present risk to the project.	Accept. Monitor political developments as they unfold, and adapt as needed.	A shift in department leadership can alter project priorities and affect strategic alignment, potentially leading to changes in	Risk of key staff turnover will exist for the life of this project

									leading to changes in project scope or objectives.	
Open and Mitigating	05/06/25		Staffing/Resource Availa	Financial Leadership Distraction by competing priorities	Decreasing	2 (Medium/Low)	Including EOY activities, the budget process, and day-to-day resource challenges, the agency has many distractions that may impact the ability to focus on PALM at key times in the project lifecycle.	Avoid. Engage stakeholders in a constant dialogue regarding the status and direction of the Project.	If financial leadership is distracted, it can lead to mismanagement of resources and financial oversight, affecting project funding and resource allocation.	No change for this risk for this reporting period
Open and Monitoring	05/06/25		Training	Not enough time for training before go live.	Stable	2 (Medium/Low)	The announced plan for rollout of PALM UAT suggests the window for SME Training will be too small for adequate training given the competing priorities for legacy business activities and processes.	Monitor. Continue to promote the importance of prioritizing the PALM transition at a level equal to or greater than performance of legacy business processes.	Insufficient training can lead to user errors and operational inefficiencies, affecting the smooth transition to new systems.	No change for this risk for this reporting period
Open and Mitigating	05/06/25		Business Process Chang	Potential for inaccurate or inconsistent mapping of organizational codes during transition from FLAIR to PALM, affecting financial tracking, reporting, and departmental accountability.	Stable	2 (Medium/Low)	The changes to chartfield purposes and lengths with PALM have necessitated a complete org code restructuring for the agency. This new structure will not be fully testable until access to PALM is provided.	Mitigate. Conduct a Comprehensive audit of existing FLAIR org codes. Documentation of mapping logic and decisions. Stakeholder validation of crosswalk methodology	Inaccurate mapping can affect financial tracking and accountability, leading to compliance issues and financial discrepancies.	Access to PALM has been provided with Pre-UAT and now UAT. Testing the new structure is underway
Open and Mitigating	05/06/25		Staffing/Resource Availa	Project Sponsor Turnover	Stable	1 (Low/Low)	Personnel changes are an ever-present risk to the project.	Ensure sponsor commitments and operational plans are well documented and rationale is well established.	May result in delays in decision-making, potential loss of funding, and a decrease in stakeholder engagement. The project may struggle to align with organizational goals, leading to potential scope changes or project cancellation.	Risk of Executive turnover will exist for the life of this project
Open and Mitigating	05/06/25		Staffing/Resource Availa	Operational Staff Turnover - Key Personnel	Stable	1 (Low/Low)	Personnel changes are an ever-present risk to the project.	Accept. Work to document key personnel knowledge and specific operational processes in the event of a sudden or unexpected departure.	Loss of key personnel can create significant knowledge gaps and operational inefficiencies, impacting project execution and outcomes.	Risk of key staff turnover will exist for the life of this project
Open and Monitoring	05/06/25		Deployment/Cutover	Cutover date from FLAIR to PALM not formally established	Stable	1 (Low/Low)	Amendment 12 shifted go live to July 26 and is now aligned with end-of-year activities. At an ESC meeting earlier this year, one of the discussion items pertained to the cutover date. As of this date, we do not have confirmation of a specific date when cutover will occur.	Monitor. Continue to engage with PALM contract to obtain meaningful and timely schedule for cutover. Establish "roughed-in" and anticipated cutover date and build agency plan around this expectation.	Uncertainty in transition timelines can disrupt planning and resource allocation, leading to potential delays and confusion.	Go-Live was extended to Jan27. However risk is still applicable with no definite Flair Cut-over date identified.

DCF Issues									
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	05/08/25		Critical - Impacts the ability of the agency to move forward with work without resolution	Agency Business System	Cost Allocation Not Available in PALM. (See attachments)	DCF is revisiting as plans for remediating internal applications for PALM. Several overtures have been made to PALM RA to communicate functional impacts to DCF processes and requesting one or more sessions with PALM technical and DFS F&A staff regarding DCF concerns.	On going pending SpeedKey and other conversation with Enterprise applications	08/28/26	No change for this issue for this reporting period
Open	05/08/25		Critical - Impacts the ability of the agency to move forward with work without resolution	Agency Business System	DCF's journal distribution process	Given information provided, DCF team has concluded there are 2 viable options: building a front end application to perform front end splits or utilize Speed Key functionality (amongst PALM and Enterprise Applications) to simulate splits. Further conversation will be had post Segment 4 as of 8/20.	As DCF is moving forward with reviewing and updating processes, we have several concerns related to the journal distributions which is a critical business process in DCF. We have sent the related concerns to the PALM team, conversations are on-going. Several of our updates are dependent on the concerns being addressed.	08/28/26	No change for this risk for this reporting period
Open	05/08/25		Critical - Impacts the ability of the agency to move forward with work without resolution	Agency Business System	Budget Funding Process since PTAXX cannot be loaded in FACTS.	DCF's project strategy shifted after the due dates of several of the initial current state assessment tasks had lapsed. In light of this change, current state analysis has occurred on an evolving basis.	Develop alternate budgeting process for TANF processing that estimates and budgets revenue per year.	08/28/26	No change for this issue for this reporting period
Open	05/08/25		High - Impacts the ability of the agency to meet deadlines or	Business Process Chang	MFMP to PALM interface will not support more than 100	Given information provided, DCF team has concluded there	Restructure invoices and implement manual processing in the short	08/28/26	No change for this issue for this reporting period

			milestones		splits per invoice line item, some of our Collocated expenditures are expected to split to at least 500 lines, directly impacting our ability to utilize that enterprise business system.	are 2 viable options: building a front end application to perform front end splits or utilize Speed Key functionality (amongst PALM and Enterprise Applications) to simulate splits. Further conversation will be had post Segment 4 as of 8/20.	term Develop intermediate processing systems and request interface enhancements in the medium term System integration improvements and potential accounting structure redesign for the long term		
Open	05/08/25		High - Impacts the ability of the agency to meet deadlines or milestones	Deployment/Cutover	Agency often experiences delays between requests for meetings and other communication with various PALM teams and acknowledgement of these requests.	PALM RCs are placed between agencies and SMEs on various topics. This has proven to cause confusion and miscommunication on several occasions.	Continue to submit requests and follow-up with RCs to ensure message is received and appropriate prioritization occurs.	08/28/26	No change for this issue for this reporting period
Open	05/08/25		High - Impacts the ability of the agency to meet deadlines or milestones	Conversion/Configuration	Staffing challenges in General Services are presenting difficulties with readiness workplan tasks related to assets, leading to voids in data migration.	DCF's project strategy shifted after the due dates of several of the initial current state assessment tasks had lapsed. In light of this change, current state analysis has occurred on an evolving basis.	Meet with impacted stakeholders to create strategy for resolving personnel and training shortfalls.	08/28/26	No change for this issue for this reporting period

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DEM Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	05/21/25		Agency Business System	Interface need fulfillment	Stable	6 (High/Medium)	If the PALM interfaces do not cover all required data elements as currently engaged by DEMES to FLAIR connections, then either the elements will need to be accessed via the data warehouse or DEMES will need to be changed to interact correctly with the new PALM structure	DEMES development assets have been onboarded to the PALM project to project any issues that may arise and attempt to port all elements of PALM on top of the FLAIR structure	Cost will be added to the DEMES development project.	DEM is addressing as a part of interface testing.
Open and Mitigating	06/20/25		Agency Business System	New Interfaces Required due to changing ABS	Increasing	4 (Medium/Medium)	If there is no way to ask for new interface connections to our ABS starting now moving into the future then any	If new interface needs arise, email our Readiness Coordinator and technical coordinator with the	Wasted Development Dollars, decreased ABS functionality	DEM will continue to coordinate with RC as needed.

				functionality			new (or overlooked) functionality that requires an interface connection not initially listed will be impossible	new need and what new interface is requested.		
Open and Monitoring	05/21/25		Interface	EOG/DEM Interface relationship	Stable	2 (Medium/Low)	EOG and DEM interfaces and elements are under the same OLO umbrella.	Working directly with Kelley Sasso in EOG to put process agreements in place.	Increased lead time in access aspects of processes or reporting confusion when summarizing agency workload	DEM is communication with EOG during UAT to determine a joint approach prior to go-live.
Open and Mitigating	05/21/25		Agency Business System	PA Payment Process	Increasing	2 (Low/Medium)	Many projects related to DEM incidents are built by an enterprise business system Florida PA. If the Florida PA development team is not aware of the inbound and outbound Project information interface needs the process of creating projects related to an incident may become more complex	Will socialize with Florida PA users and then the poc for those users to ensure the appropriate interface conversation is had	IT spend will be used to upgrade Florida PA or create a secondary process/system for data movement	DEM will address during interface testing.
Open and Monitoring	05/21/25		Post Implementation	Need PALM Promoters	Stable	2 (Low/Medium)	If PALM is seen as creating work or uncertainty then the finance team will be unwilling to explore further functionality	Communication about PALM including changes and updates is ongoing, frequent and positively positioned	The FDEM agency Will have trouble with accounting post PALM launch	Resolved
Open and Monitoring	06/20/25		Interface	Backend Report Information	Stable	2 (Low/Medium)	If no information is released about how reports are created using interface data then the teams building ABS functionality from reports will be unable to replicate report information in the regular exports and a manual process will need to be used	Monitoring the Knowledge Center to determine if new information is released	Inclusion of a manual process and person hour requirements in ABS updates	Reporting functionality will be explored in UAT.
Open and Monitoring	05/21/25		Business Process Chang	Payroll Process	Increasing	1 (Low/Low)	If the payroll processes built in PALM cannot support the needs of the FDEM Payroll team, then the payroll system currently managed by FDEM IT may need continuing support meaning the Payroll process may become more complex/expensive	Highlighting Payroll within UAT as an important module with downstream impact so we can quickly close or escalate this risk	We cannot sunset the Payroll system and we may require IT spend to update	DEM will address during UAT.
Open and Mitigating	05/21/25		Conversion/Configurator	Grant LTD balances	Stable	1 (Low/Low)	If life to date balances are not transferred either as a datum or as a concept between FLAIR grant tracking and PALM project costing then a system of balance tracking processes will need to be built to managed life to date reporting	The FDEM Finance team is building it's reporting effectiveness to increase the agility of building reporting structures to the necessary level to meet this challenge	Process complexity will be added to the Finance team	DEM will conduct testing and modify processes, as applicable, based on the results.
Open and Mitigating	05/21/25		Conversion/Configurator	Fund Data Freshness	Stable	1 (Low/Low)	If stale funds are carried over into the project costing module then the day to day operation of project accounting will increase in complexity	The budget team in the finance bureau has been tasked with clearing stale funds/project ids out of our system	Project costing module will create less value for the accounting team	DEM will address in its data cleansing.
Open and Monitoring	05/21/25		Deployment/Cutover	FLAIR to PALM shutdown around Year End	Stable	1 (Low/Low)	If FLAIR shuts down before PALM goes live then our business processes will be delayed	Request more information from Felecia	DEM will need to develop a plan to address cash flow, payroll, and payments to vendors/subrecipients.	The downtime between FLAIR going down and PALM go-live has been communicated to agencies by the PALM team. DEM will need to develop a plan for continuity during this interim period.

DEM Issues

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DEP Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	11/04/24		Agency Business System	Timeline for ABS system testing and PALM UAT	Stable	9 (High/High)	PALM Process Changes were introduced in a staggered approach which impacted ABS remediation efforts until PALM changes and impacts were completed. As a result, some ABS system testing may not be fully completed until all agency UAT is in progress.	Continuing to monitor remediation progress. Remediation is anticipated to complete for all applications except one by the all agency UAT start date.	Will require ABS testing to be continued during UAT	All agency tier 1 and 2 systems have been remediated, though some updates and final internal testing are being finalized.
Open and Mitigating	02/25/26		Training	Training Center	Stable	6 (Medium/High)	Official PALM training content is not scheduled to be provided to agencies until the Fall of 2026. DEP's training plan implements end user	DEP will create PALM training information based on existing process steps, demo videos, and SME knowledge from the knowledge center and	Agency resources will spend additional time creating PALM training information for end users which will reduce time spent reviewing testing of PALM and	This risk will be monitored as training information is being identified and developed.

							training prior to this timeframe, which will likely cause the agency to rely on existing PALM information in the knowledge center to create its own training materials.	testing activities. PALM training materials will be reviewed to supplement agency training information once available.	ABS issues, and other go-live preparation activities.	
Open and Monitoring	08/31/23		Staffing/Resource Availability	Loss of knowledge due to staff turnover and time to get added staff trained to meet expectations	Stable	6 (High/Medium)	Accounting for staff turnover that may occur during the implementation phase of the project.	Ensure job-specific processes are properly documented, staff are cross trained and backups are trained on processes.	Will require retraining of new resources and potential reshuffling of existing resources which could affect the agency's ability to meet critical deadlines	This risk continues to be monitored. A mitigation plan is also being implemented due to a SME leaving the agency.
Open and Mitigating	11/20/24		User Acceptance Testing	PALM data availability for ABS testing of remediated applications	Increasing	6 (High/Medium)	Based on preliminary information about PALM's mock conversion data and configuration processes, agencies will not have access to PALM data files until full UAT in February 2026. Waiting for full UAT training with PALM files could create testing and remediation delays that would coincide with PALM UAT and agency training efforts.	DEP will establish a data strategy for testing based on the mock conversion and configuration data submitted to PALM. Additional mock files and data will have to be created where PALM does not have planned conversions. Sample test data will be created by using FLAIR data files mapped to PALM values. DEP will also establish testing scenarios and cases to ensure that transactions are posted correctly to the new Chart of Accounts and verifiable totals possible for new and old transactions based on reporting.	The movement of Full UAT to February 2026 from December 2025 will cause a delay in completing ABS testing activities and validating system processes and reports.	This risk is being monitored as the agency has begun all agency testing. Continued monitoring is needed to determine any delays.
Open and Mitigating	11/20/24		Business Process Change	Availability of reports through PALM	Increasing	6 (High/Medium)	PALM reporting information is being provided in a staggered cadence, with many reports dependent on the outcome of the data warehouse design which will extend report definitions and mockup completion until February 2026. Reports not provided by PALM, will require agency resources to build reports utilizing a mix of interface data and DW/BI custom reporting. There is a risk that agency reporting needs may not be identified until UAT, depending on when PALM releases DW/BI information to the agencies. Delayed identification of reports needed for PALM could cause additional strain on agency remediation schedules and the ability to provide management reporting needs in time for go-live.	DEP is monitoring changes to PALM reports through the knowledge center. DEP is now mitigating this by identifying critical reports that PALM will not provide or may be provided in the data warehouse. These critical reports will be developed in DEP applications.	Will require additional agency resources to build suitable reports for PALM using DW/BI and ABS systems data which could cause delays in critical information needs for management.	This risk is being monitored as all agency testing has begun to identify further mitigation needs.
Open and Monitoring	09/06/24		Training	Training and Testing Resource Conflicts	Increasing	6 (High/Medium)	Internal training efforts for agency users is dependent on agency SME's completing PALM system training and testing during UAT efforts, test ABS, develop agency training material, and being able to train agency end users while also being expected to conduct all agency UAT.	PALM has moved Full UAT start date to February 2026. Formal training for PALM is scheduled for October 2026, so DEP will need to build internal training to assist end users.	SMEs would be unfamiliar with the new systems to confidently complete UAT and unable to properly train end users, which would lead to incomplete and inaccurate UAT results. Invalid UAT results would potentially lead to an unsuccessful go-live.	This risk is being monitored as all agency testing has begun to identify potential issues in creating and implementing the agency's training plan.
Open and Monitoring	05/08/25		Business Process Change	Changing Requirements and Impacts on Resources and Delivery	Stable	6 (High/Medium)	High volume and impact changes to PALM processes and interfaces could negatively impact the agency's ability to remediate and test ABS prior to interface testing and UAT. Changes are anticipated to continue, though large volume or late developing updates in these areas have to be analyzed for impact and work redirected to change remediation and process knowledge efforts. Changes in requirements and replanning of activities due to unforeseen changes can lead to rescheduling of project activities. This can disrupt project flow	The agency will continue to monitor the PALM Change log and proactively seek to understand how to allocate resources and knowledge transfer across the agency (SMEs and End Users). Pre-UAT testing allowed SME's to review PALM screen functionality for the first time and understand how PALM may work prior to Full UAT.	Business system remediation could be delayed or extended impacting interface testing and business system testing and preparedness. Impacts to interface testing have already been realized. Additionally, impacts to role assignments and workload estimations could occur.	This risk has been realized in some cases of interface changes and role/activity updates that are causing additional workloads. This will continue to be monitored to potentially move the risk to an issue if the changes are significant.

							workgroup members, affect dependencies, and require changes to resource allocations in a short time leading to unforced errors, overloaded resources and delayed delivery schedules.			
Open and Monitoring	05/02/25		Training	UAT Preparation and Readiness	Stable	4 (Medium/Medium)	The extended timeframe between design sessions and UAT and the unknown details of PALM training could lead to SMEs being unfamiliar with PALM processes and their affect on agency processes which could lead to inefficient or inaccurate end user training and testing. UAT preparation activities are dependent on agency staff reviewing knowledge center resources, using newly developed agency workgroup materials, and preparing testers for the PALM UAT testing process, updated agency processes, defect tracking, and coordinating ABS updates. The DEP PALM team will be responsible for ensuring SMEs and end users are equipped with the knowledge and information to be efficient and successful during UAT.	DEP is a member of the PALM workgroups that are producing UAT preparation materials and is developing tasks for SMEs to be prepared for UAT. The PALM core team is also creating reference guides based on PALM process steps to aid users ability to perform various tasks.	Lack of training and preparedness for testing and detailed PALM navigation and process steps could potentially affect the efficiency and effectiveness of SME UAT. This could lead to uncertainty and delays in preparing end users for testing and completing full integration testing.	This risk is being monitored as we begin all agency testing.
Open and Mitigating	01/12/26		User Acceptance Testing	Test Case Identification	Stable	4 (Medium/Medium)	Due to the variety and volume of processes changing due to PALM, the agency may not identify all needed scenarios that need to be tested. This includes verifying remediated reports and ABS reflect correct balances.	DEP continues to analyze test cases as changes are identified, testing multiple roles for the same test cases, participating in cross agency collaborations for test cases, scripts, etc., identifying negative test scenarios, and multiple data inputs/options for processing transactions.	Critical processes or scenarios not tested could lead to critical issues upon PALM implementation, delaying recording and reporting information timely.	This risk is being monitored as we begin all agency testing.
Open and Monitoring	02/25/26		User Acceptance Testing	Conversion and	Stable	4 (Medium/Medium)	Agency conversion and configuration data available for testing will conclude with data as of June and July 2026 (DR2). Additional updates to data identified after this time frame (6 months) will not be available in the UAT environment to test based on the current testing information. Significant variances in testing data identified after DR2 could result in unverified information that would impact the success of PALM implementation for the agency.	DEP will continue to identify applicable testing scenarios and data updates to ensure data conversions and configurations are accurate.	Unknown issues affecting ABS and reports could result from untested data conversions and configurations.	This risk is being monitored as we begin all agency testing.
Open and Monitoring	02/27/26		Deployment/Cutover	Revert ABS after	Stable	3 (High/Low)	PALM is scheduled to make a final go-live decision on January 4th, 2027. Agency's will have to follow suite to migrate business systems based on this decision. If PALM has to delay go-live for any reason, agency business systems will not be able to revert back to their previous FLAIR setup without causing large risks and issues to data and processing abilities.	DEP will delay the migration of ABS to the PALM production versions as late as possible after PALM approves the final go-live and monitor PALM activities for possible mitigating activities.	DEP would continue to feature freeze ABS for a longer period of time and potentially loose some agency data. The ability to continue agency business functions would be negatively impacted.	This risk will be monitored as we move closer to go-live and as additional information on cutover activities is finalized.
Open and Monitoring	12/29/25		Role Mapping	Role Mapping and Permissions	Stable	2 (Low/Medium)	Role mapping exercises were initially believed to be utilized as a result of the lessons learned from SME UAT. Due to the switch to Pre-UAT testing with limited SMEs, the ability for role assignments to be tested was delayed. Additionally, SME testing was removed from PALM scope and agencies were asked to include SME testing as part of Full UAT testing. This risks the ability of role assignments to be properly tested within the agencies to a window at the end of the UAT cycle.	DEP has assigned roles with no long term conflicts for the initial phase of all agency UAT. DEP will perform testing to mimic end user role conflicts during the first phase of testing to prepare for their end users testing efforts and role needs.	There will be a short UAT window for agency SMEs to work with end users on role assignments to help plan for an efficient and effective work flow. This may lead to some re-arrangement of roles within the agency prior to go-Live or post go-live.	This risk is being monitored as we begin all agency testing.

DEP Issues										
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period	Comments for Jan. - Feb. 2026

DEP Assumptions					
Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
People Processes Technology	Agency critical tier 1 and tier 2 processes and business systems are successfully tested with PALM UAT environment and have zero "critical" defects prior to recommending readiness for go-live.	Logged	06/30/25	All Tier 1, 2 and 3 systems and interfaces and DEP business processes affected by PALM.	This assumption remains true for this reporting period.
People Processes Technology	Agency SME's have completed initial testing and are ready to train end users prior to fiscal year end.	Logged	06/30/25	All SME's and end-users scheduled for training and end user testing. This impacts agency's ability to certify readiness for go-live by SG4 in November 2026.	This assumption remains true for this reporting period.
People Processes Technology	PALM process steps, navigation guides, and other UAT materials will be provided in a timely fashion in advance of end user UAT to allow SMEs to develop DEP training content for end users.	Logged	06/30/25	SMEs would be required to create all PALM training materials and end users will be unable to effectively test PALM functionality during the full UAT testing phase.	This assumption remains true for this reporting period.
People Processes Technology	Final changes to external systems such as MFMP, Works, STMS, People First and FACTS will be provided by the respective enterprise partners, along with process impacts, in advance of end user UAT, to allow time for specific content to be incorporated into DEP training.	Logged	06/30/25	SMEs would be required to create enterprise training materials and end users will be unable to effectively test enterprise systems functionality during the full UAT testing phase.	This assumption remains true for this reporting period.

Agency Sponsor Confirmation

As Agency Sponsor, I understand my role and responsibility for monitoring and reporting on my agency's readiness status. I have reviewed and confirmed the accuracy of my agency's readiness status as reflected in this dashboard.

Other Task Completeness:

Score = 99.05%

- Submitted Complete = 62
- Submitted Incomplete = 0
- Completed After Submission = 1

The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

The Change Champion Network composition reflects the completeness of your CCN makeup.

- Unique Filled Role = 12
- Duplicate Filled Role = 6
- Vacant Role = 0

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DFS Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	04/17/25		Conversion/Configuration	ENTERPRISE A&A - Conversion and Data Validation:	Stable	9 (High/High)	There is a risk that the agencies' data conversion validation process may not be thorough or accurate, leading to incomplete or incorrect data being converted to Florida PALM.	<ul style="list-style-type: none"> A&A will work closely with the Project to understand where agencies need support and additional guidance in understanding their agency's FLAIR data. A&A will provide guidance to agencies to help them understand the critical things to consider and evaluate for conversion. A&A will meet with agencies through workshops or one-on-one sessions to further support agencies in 	This could result in operational inefficiencies, data integrity issues, potential delays in project timelines, and incorrect trial balance information in Florida PALM, which could impact financial reports.	A&A has reviewed. Due to logic changes to the GLC001, A&A will be monitoring this risk more closely.

							cleaning up their data in preparation for conversion.			
							<ul style="list-style-type: none"> • Closely working with project and agencies on mock conversion results to find solutions. • Reviewing Conversion Validation Approach to mitigate risk 			
Open and Monitoring	10/20/23		Deployment/Cutover	ENTERPRISE A&A - Project Timeline.	Stable	9 (High/High)	<ul style="list-style-type: none"> • The Project timeline is very conservative regarding flexibility, and A&A's involvement is critical for project success. A&A Our level of involvement pulls our resources in multiple directions putting a strain on our time to complete tasks. A&A change management and internal preparation for A&A preparedness activities have already started, but having adequate resources will be key to successful implementation. 	<ul style="list-style-type: none"> • Recruit knowledgeable and skilled staff, not entry level positions, to help with preparedness activities and management of daily operations. • Retain our critical staff that are involved in Florida PALM activities and those who are picking up added job responsibilities so that subject matter experts can dedicate time to Florida PALM activities. • Provide expectations that staff will cross-train and provide knowledge transfer to increase the depth need to continue operating with a high level of service and accuracy. • A&A was approved for 9 FTEs to be onboarded for FY 2026. 	It can hinder successful implementation of project.	A&A has reviewed and will continue to monitor this risk closely.
Open and Monitoring	10/11/23		Staffing/Resource Availal	ENTERPRISE A&A - Resource Impacts.	Stable	9 (High/High)	<p>Resource impacts due to A&A operational staff spending a significant amount of time performing Project related tasks.</p> <ul style="list-style-type: none"> • Project tasks may require additional time outside employees designated working hours to attend meetings, review time sensitive documents, or contribute to critical tasks. Some positions are not granted flexibility to flex time throughout the month, but they must flex it within the week. This policy limitation causes a strain on availability of resources. Allowing current staff more flexibility to flex their time beyond the work week would help with resource allocation. • As we get closer to implementation, the number of items that will require attention will continue to increase. This will include, assisting agencies with data management, preparing enterprise data for conversion, developing cut-over and FLAIR close out plans, participating in all levels of integration and UAT testing, validating testing results, participation and validation of mock and production conversions, developing policy around new processes. 	<ul style="list-style-type: none"> • Contract with staff aug who can help with data analysis, developing testing scenarios, perform testing functions, support cut-over, support FLAIR retirement activities. • Hire additional staff (FTE or OPS) to learn current operations so that our experienced staff can continue to participate with the Florida PALM Project in design, testing, and implementation activities. • Consider providing current staff with Special Pay Increase to acknowledge the increased job responsibilities and retain these critical members of the team. • Work with Human Resources to properly document team members who should be classified as SES staff. • Establish plans for reduction of current operational activities and prioritize responsibilities based on risk and probability. This could include posting all payments and suspending pre-audit activities, suspending Article V and Contract Management audits, suspending processing of EFT applications, as examples. 	Pulling resources from operations, will increase workloads, and will cause stress and an increased chance of employee burnout.	A&A has reviewed and will continue to monitor this risk closely.
Open and Monitoring	10/11/23		Staffing/Resource Availal	ENTERPRISE A&A - Risk of External Impacts on Business Processes.	Stable	6 (Medium/High)	<p>A&A serves all other agencies; therefore, our processes are at risk from external impacts:</p> <ul style="list-style-type: none"> • Agencies – All A&A processes are downstream of agency processes. Agencies may lack their own training and resources for proper preparation. If agencies are not ready for implementation, this will cause significant issues for A&A to be able to continue operations at an acceptable level and could cause more significant increase in work or rework for A&A staff around go live. • Project – There may be changes in Project 	<ul style="list-style-type: none"> • Continue to work closely with the Florida PALM Project to identify areas where significant training will be needed for agency staff. • A&A OFFE team make outreach with agencies to determine training needs for skills that will be needed in Florida PALM users. • Participate with all FFMS and Enterprise partners to ensure remediation, testing and change management needs are understood and acted upon. • Assist agencies with readiness tasks such as data analysis and cleansing. 	This will cause significant issues for A&A to be able to continue operations at an acceptable level and could cause more significant increase in work or rework for A&A staff around go live.	A&A has reviewed and will continue to monitor this risk closely.

						<p>directions or decisions that negative affect A&A that would cause an increase of time and resources or provide confusion and lack of clarity among A&A's expectations.</p> <ul style="list-style-type: none"> • Government/Florida Statutes/Regulations – Any potential changes to laws, regulations, or elected officials could change Project direction or restrict A&A's operations. 	<ul style="list-style-type: none"> • Develop contingency plans for agencies that are not prepared for Florida PALM implementation. • Monitor activities, changes in rules and regulations, and agencies competencies. • Establish contingency plans as risks become more probable (as information becomes available) and communicate those changes as quickly and clearly as possible. • A&A is seeking funding through the LBR process to contract for financial expertise that State Agencies can use to identify knowledge gaps and areas needing improvement and address those issues. 			
Open and Monitoring	10/08/24		Agency Business System	ENTERPRISE A&A - ABS Testing.	Increasing	6 (Medium/High)	<p>A&A is responsible for several enterprise business systems, some of which are interdependent. Testing each system through the entire process, from start to finish, will be critical to determine success. This will require testing to be synchronized according to the Interdependencies and workflow. Failure to do so could result in functions not being appropriately tested. This risk is really meant to address the issue around the complication of staging multiple business systems and the data within them for testing. This requires a huge effort and any misalignment of data, or refresh dates, can impact testing results, or the ability to test processes. Both Interface Testing and User Acceptance Testing can be impacted.</p>	<ul style="list-style-type: none"> • Identify all enterprise business systems that will need to be tested. • Work with Division/Office management to allow dedicated technical and functional resources to be available for enterprise business systems testing efforts when the UAT timeline is released. • We plan to work through the CCN Network with other agencies on planning and collaboration that needs to happen for those cross agencies testing scenarios. • A&A has onboarded a UAT Testing Team, and is currenting working to onboard an HCM functional expert to assist with transformation. 	<p>It has potential to impact, or delay go live if agency enterprise systems cannot be fully tested in the allotted time. The enterprise owners and systems impacted includes STMS, PeopleFirst, PCard Works, FACTs, LASPBS, and other critical agency business systems that interface with Florida PALM.</p>	A&A has reviewed and will continue to monitor this risk closely.
Open and Monitoring	01/25/24		Deployment/Cutover	TREASURY - Outstanding warrants at cutover	Stable	6 (High/Medium)	<p>Discussions relating to the status of outstanding warrants at the cutover from June 2026 to July 2026 has not been finalized and could, potentially have impacts to warrant recipients and reconciliation processes.</p>	<ul style="list-style-type: none"> • Continue to collaborate with the Florida PALM Project on policy relating to outstanding warrants. • Potential solutions being discussed between PALM and Treasury including the possibility that warrants would be maintained in FLAIR and concurrently canceled and reissued in PALM while maintaining warrant number. Note that solution is pending approval from Treasury. 	<p>Could potentially have impacts to warrant recipients and reconciliation processes.</p>	Treasury is actively participating in Cutover discussions and planning meetings with Florida PALM, A&A, and FLAIR.
Open and Monitoring	12/13/23		Conversion/Configurator	TREASURY - Concentration account	Increasing	6 (High/Medium)	<p>The current Deposit Concentration Account was issued in 2016 contract ends in March of 2026. DFS has already invoked one 5-year renewal and does have one 6-month extension available. If a different financial institution is awarded the contract during the procurement process, an implementation will need to occur with Florida PALM.</p> <p>The new bank and all of the subaccounts (currently 550+) will need to be configured in PALM, along with file transmissions, BAI codes, returned item processing, book to bank processing, cash transfer processing, and reconciliation rules. Agencies will be involved in this transition and will need to communicate new depository instructions to their vendors, including Federal</p>	<ul style="list-style-type: none"> • Continue to collaborate with the Florida PALM Project and seek resources through staff augmentation, additional FTE, or contracts as needs are discovered. • The current concentration account agreement, Contract #TR201, has a 6-month extension available as permitted in Section 287.057, F.S. if additional time is needed. Treasury and OPCS will work together to implement the extension when appropriate. • Stay in close communications with Edward Nabong within OPCS on the vendor negotiation status. Edward is the sole point of contact for the ongoing ITN, and all communications must be directed specifically to him if negotiations 	<p>Although unlikely, if Wells Fargo does not agree to extend their contract, this could result in agencies not being able to make deposits into their accounts and impacting agencies revenue.</p>	Treasury and Wells Fargo are in the process of executing a 6 month extension of the current contract until September 2026. Treasury is still actively negotiating a new Concentration Account contract.

						<p>agencies. Agencies would also need to receive and distribute new depository supplies to their locations.</p> <p>This could also impact User Acceptance Testing if processes are validated using current contractor and new vendor values are not in the UAT environment.</p>	<p>not concluded before December 2025, DFS will extend our contract with existing financial institution in 6-month increments.</p>			
Open and Monitoring	02/19/24		Business Process Change	CCN - Potential loss of CCN resources.	Stable	6 (High/Medium)	<p>The loss of CCN resources would constrain current CCN staff capacity and could result in the loss of critical functional and institutional knowledge, which is imperative to the success of the Florida PALM Project.</p>	<ul style="list-style-type: none"> • Create a knowledge base of CCN operational processes and procedures; develop training methods to facilitate knowledge transfer; and provide cross-training among CCN members where feasible. • Use of dedicated back-up CCN Liaisons will aid in the short-term continuity. 	<p>It could result in the loss of critical functional and institutional knowledge.</p>	<p>Risk reviewed and still valid</p>
Open and Monitoring	10/11/23		Deployment/Cutover	ENTERPRISE A&A - Planning.	Decreasing	6 (High/Medium)	<p>Planning for some critical activities has not been done. Until these plans have been developed, A&A cannot adequately determine needed resources, time and effort.</p> <ul style="list-style-type: none"> • Cutover planning • FLAIR retirement planning • Stabilization period planning • Specialized knowledge that may be needed for new processes, such as processing States' taxes from payroll • Financial Reporting mappings and data rollup 	<ul style="list-style-type: none"> • Continue to collaborate with the Florida PALM Project and seek resources through staff aug. additional FTE or contracts as needs are discovered. • Cutover planning sessions are in progress 	<p>Lack of required resources to support around go live and beyond.</p>	<p>A&A has reviewed and will continue to monitor this risk closely.</p>
Open and Mitigating	11/13/25		Interface	TREASURY - Operations.	Stable	6 (High/Medium)	<p>June 12th 2025-First meeting with JPM. Testing was originally scheduled for August, PALM requested we move the timeline to June so we can start early. June 23rd was the second meeting and a weekly schedule was established for Mondays.</p> <p>The lack of engagement from the task owner is causing delays to the execution of the test plan.</p> <p>The following tasks need to complete for a successful implementation of JP Morgan Interface Financial wave disbursements test files.</p> <p>Lack of engagement from task owner at the Florida PALM implementation vendor could lead to implementation delays. The key resource who is also a task owner has not participated in meetings to provide updates and / or confirmation that the following tasks will be completed in a timely manner:</p> <p>Confirm approval to transition BAI2 file to the production environment Send first Positive Pay test file for review Send first ACH file for review Task Owner to provide Technical SME (JP Morgan) with production server details Confirm approval to move Bank Title File to Production.</p>	<p>Mitigation Plan: Treasury will escalate to Accenture as per the escalation matrix to get confirmations from Task Owner or senior management</p> <p>Mitigation Status Update: Treasury escalated to Accenture and task owner has attended multiple recent meetings and is appearing to be engaged.</p>	<p>JPM acknowledge the risk that these delays would impact further interface testing that should be completed before UAT begins. If testing is not complete and verified timely, the project go live date could be impacted. DFS would not be able to send ACH origination files and positive pay files to the bank and would not be able to receive and reconcile disbursement activity from the bank. The potential for fraud is a high risk as well.</p> <p>INBOUND FILES: /ARP01-POSITIVE PAY FILE-API005, PRI045 /ACH01-ACH FILE-CMI002, CMI016, PRI012, PRI056 OUTBOUND FILES: /H2H01-PREVIOUS DAY BANK STATEMENT-CMI003 /RET-ACH RTN FILE-CMI001 /ACK-ACH ACKNOWLEDGMENT-CMI006 /ABA-AUTHORIZED BANK FILES-API030</p>	<p>Florida PALM and JPMorgan continue to work on interface testing. There are ongoing issues with connectivity that have not yet been resolved.</p>
Open and Monitoring	12/13/23		Conversion/Configuration	TREASURY - CMIA	Stable	4 (Medium/Medium)	<p>Relating to CMIA, expenditures for agency covered programs will need to be tracked in PALM by CFDA number so clearance patterns can be calculated. Agencies will be responsible for providing the PALM chartfields for their covered programs and</p>	<ul style="list-style-type: none"> • Continue to collaborate with the Florida PALM Project and seek resources through staff augmentation, additional FTE, or contracts as needs are discovered. 	<p>If PALM cannot track and calculate the clearance pattern for CMIA, Federal reporting will be impacted</p>	<p>Florida PALM has asked for a test plan for CMIA testing in UAT. Treasury is drafting the test plan for execution in UAT.</p>

							PALM will need to track the expenditures for those account codes. Clearance patterns will have to be calculated by CFDA Number for CMA reporting.			
Open and Mitigating	02/27/24		User Acceptance Testing	OIT/ABS - Third Party Vendors	Stable	4 (Medium/Medium)	Agency business systems supported by third-party vendors could have different design and build timelines for Florida PALM remediation activities.	<ul style="list-style-type: none"> Communicate the Florida PALM timelines with third-party vendors. Provide information and advisory support to the functional area(s) related to remediation activities and timelines. Provide advisory support if needed related to interfaces, interface field mapping, and possible functional changes. 	This could impact the Department's ability to meet the scheduled finish dates for Florida PALM Readiness Workplan tasks related to design, build, and testing activities.	Risk reviewed and still valid
Open and Mitigating	10/20/23		Staffing/Resource Availa	OIT/ABS - Resource Impacts.	Stable	4 (Medium/Medium)	Resource impacts due to unforeseen system changes from DFS divisions, other projects, and external entities.	<ul style="list-style-type: none"> Work closely with the ABS functional and technical owners to coordinate the timeline of changes with the Florida PALM timeline. Work closely with the ABS functional and technical owners on design strategies related to Florida PALM integration. 	It could cause delays in the ABS Remediation timeline.	Risk reviewed and still valid
Open and Monitoring	10/11/23		Business Process Chang	ENTERPRISE A&A - Process Changes.	Increasing	4 (Medium/Medium)	<ul style="list-style-type: none"> All bureaus within the division will have significant process changes. Insufficient preparation or reluctance to adopt and adapt to changes could result in delays; operational deficiencies; and critical operations, tools, technologies, and resources not being available. Performance issues at implementation if staff are not able to adapt and produce results at the current, expected level of output. 	<ul style="list-style-type: none"> Prepare staff through regular change management engagements. Perform knowledge transfer on why things are done so we can ensure better understanding of future processes. Complete thorough process analysis and mapping of each process, along with the technology, tools, and resources to future functionally can ensure that we have identified where operational changes will occur and to what extent it will be affected. Monitor staffs' engagement. Analyze current skill sets and mentor or provide training needed to acquire the proper skills and address skill gaps. Review organizational charts and identify succession planning or knowledge transfers for known gaps. A&A has contracted with a People Soft experienced resource to help with implementation activities, including identifying staffing model changes and process changes. A&A onboarded a UAT Testing Team, and is working to onboard an HCM functional expert to assist with transformation. 	Due to the unique activities that A&A performs at an enterprise level, reduced performance could have a negative impact on agencies.	A&A has reviewed and will continue to monitor this risk closely. We have several meetings coming up to go over process changes, as well end user onboarding and education during UAT.

Other Task Completeness

Other Task Completeness:

Score = 99.21%

- Submitted Complete = 60
- Submitted Incomplete = 0
- Completed After Submission = 3

The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

The Change Champion Network composition reflects the completeness of your CCN makeup.

- Unique Filled Role = 14
- Duplicate Filled Role = 0
- Vacant Role = 0

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DJJ Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	12/03/24		User Acceptance Testing	Separation of Qualified Employees - F&A	Stable	9 (High/High)	If DJJ loses quality staff, then the agency may be at risk of losing historical agency knowledge. The Reporting and Reconciliation supervisor has recently left the agency. This person was included as role for UAT SME.	Libby will be the SAM until the training, then it will change to Marcia so that Libby can operate other roles; SME end user roles will need to be reviewed and if applicable, reassigned to other employees. Encourage SMEs to document and archive their job functions and business processes to allow for swift training and knowledge transfer; Continue to advertise to recruit for vacant positions; Continue to allow for management	Bureau staff may not be as prepared for UAT SME.	Risk is being monitored

								decisions that support personnel actions to retain qualified employees.		
Open and Monitoring	12/22/25		User Acceptance Testing	Limited SME and Staff availability for UAT could negatively impact testing and its outcome	Increasing	9 (High/High)	Project SMEs and staff performing UAT also need to perform their regular duties during the same period. This implies limited availability for either UAT or regular duties, which could affect UAT negatively. Attempts are being made by the affected bureaus to boost staffing, but the gaps still remain because it has been difficult to find capable persons to fill vacant positions.	Escalate the staffing issue to leadership; Request additional hiring resources.	UAT and regular work delays, reduced deliverable quality and increased risk of rework.	Monitoring Risk
Open and Mitigating	08/19/25		User Acceptance Testing	Delay In Documenting Test Scripts	Stable	6 (Medium/High)	If SMEs wait for the PALM Project to provide test procedures before writing UAT test scripts, they may be overwhelmed and not have sufficient time to complete the creation of their UAT test scripts.	Use the current business processes documented by DJJ to draft/create generic aspects of tests of the scripts with assistance from PMO, and then complete the scripts with the PALM Project test procedures when they become available. However, F&A has opted to wait for PALM to provide more specific and actionable information before proceeding; they are prepared to work overtime, including weekends, if needed, to get this done.	SMEs could be overwhelmed trying to create the test scripts from scratch during UAT.	In person trainings are being held now, we are expecting after the session to be able to write the test scripts
Open and Monitoring	11/04/24		User Acceptance Testing	Limited Staff for UAT	Stable	6 (High/Medium)	Vacancies and competing priorities within bureaus heavily affected by the implementation of PALM have caused less time to work on preparing for UAT.	Mitigation Plan: bureaus are actively advertising, interviewing, and recruiting for vacancies as they occur. Additionally, bureaus are training backups to work emergency activations, so if needed, they can free up SME's for UAT.	Bureau SME's and staff may be unavailable for UAT if positions are not filled and competing priorities not realigned.	Monitoring risk
Open and Mitigating	02/28/25		Business Process Change	Reliance on Florida PALM and Data Warehouse for Reporting Functionality	Stable	6 (High/Medium)	FLAIR @ DJJ is an agency system that staff rely on to pull financial information and to conduct research. When PALM goes live, FLAIR @ DJJ will only maintain financial historical information; it will not be remediated to incorporate PALM financial information. Because of this, users will need to rely on untested PALM and Data Warehouse reports for their duties, potentially leading to challenges.	SMEs to work with Agency Liaison to ensure that all related financial reports and research information are documented and tested during UAT; Bureau staff will study the reports currently available in the Knowledge Center; PMO to stay abreast of changes and/or updates to reports and communicate major changes to pertinent bureaus.	Reporting functionality will be severely hindered.	Risk is being monitored
Open and Monitoring	11/04/24		User Acceptance Testing	Staff Involvement in UAT Preparation	Stable	6 (High/Medium)	Vacancies and competing priorities within the bureaus responsible for UAT preparation are limited with the amount of time spent on preparing for UAT.	Bureau Chiefs are monitoring vacancies and are striving to fill them within a timely manner so that preparation of UAT is not impacted; PALM Administrators within Budget and Finance and Accounting are preparing the majority of the test scripts with input from the SMEs when available.	Preparation and understanding of expectations during UAT will not be learned by UAT SMEs. UAT will be less informed and may take longer to get through test scripts; Staff will not have a sufficient knowledge base or understanding of the elements of PALM, which could lead to frustration, lack of motivation, and prolonged participation in UAT.	Monitoring Risk in UAT
Open and Monitoring	08/11/25		User Acceptance Testing	Test Scenarios Unidentified	Stable	6 (High/Medium)	Required testing items may be inadvertently omitted during UAT.	Newly identified test scenarios will be documented and test scripts will be created as UAT testing evolves.	Untested scenarios can result in post-deployment defects and/or unmet functional requirements.	Monitoring Risk
Open and Monitoring	07/01/25		User Acceptance Testing	People First UAT Unknown	Stable	6 (High/Medium)	We don't have any information about when People First UAT will begin, what's going to be included, or how it will be structured.	There isn't anything to mitigate at this point. DJJ staff will wait until we receive information from People First about UAT.	If we are unable to test People First during end-to-end UAT, the agency will not be able to see how PALM works with People First and how the data looks. Additionally, not having any information about the PF UAT timeline prevents HR staff from preparing for end-to-end testing and developing internal training materials.	Monitoring Risk
Open and Mitigating	04/21/25		Conversion/Configuration	Encumbrance Conversions into Florida PALM	Stable	6 (High/Medium)	Current business processes do not include the reconciliation of encumbrances between AOD and FLAIR and contract encumbrances are not managed by	Budget: Budget PALM Administrator and FCO Analyst actively monitor the FWOS, the FCO Tracking Log, and FLAIR Encumbrance report to reconcile actual expenditures vs	If encumbrance balances are correct in FLAIR, but not in AOD, the AOD PALM Realm will be updated so that FLAIR balances are converted. This impact will be minimal since	Monitoring Risk

							bureaus so that they remain in balance with approved allotments. The management of encumbrances is done manually in FLAIR.	encumbrance balances. Contract activations can be manually updated in FLAIR by F&A, but changes needed to AOD encumbrances require updates made by requestors within the bureaus. Email requests are sent to requestor requesting updates in AOD as to not further disconnect the relationship of encumbrance between AOD and FLAIR.	encumbrances are managed in FLAIR. Duplicate encumbrances and contract encumbrances not properly managed will consume budget when converted to PALM. This will reduce the remaining allotment available to pay invoices to vendors.	
Open and Monitoring	01/05/25		User Acceptance Testing	Limited Guidance Provided prior to UAT Regarding PALM Payroll Processing	Increasing	6 (High/Medium)	Information and process steps have been released by the Project, but not for any payroll-related processes. Biweekly payroll will be tested the third week of February and the only information DJJ has is what has been provided in the Knowledge Center and Advisory Council meetings.	Check with PALM Coordinator about when materials, process steps, and/or guidance may be available for training environment before UAT starts. Bureau staff should review the business process steps provided in the Knowledge Center prior to their in-person UAT meeting to familiarize themselves again with the payroll process in Florida PALM.	Staff will not be as prepared heading into UAT; testing payroll may take longer than expected.	Still outstanding material has not been delivered
Closed	01/23/26	02/24/26	User Acceptance Testing	Resources and schedule conflicts in PALM UAT and enterprise systems (ES) UAT, especially as it is unclear when the ES would be ready for testing	Increasing	6 (High/Medium)	PALM UAT SMEs and end users are also required to perform enterprise systems UAT as well as perform their regular work activities between 2/2/26 and 11/6/26, especially as it is unknown when the enterprise systems would be reading for testing. With limited staff and time, this has the potential to create personnel and schedule conflicts with a negative impact.	Staff augmentation (new hires) would be one way to ensure staff are not over-tasked, and testing schedules free from conflicts are created for both PAM and enterprise systems UAT.	Unless the suggested mitigation plan is implemented timely, completing both PALM UAT and enterprise systems UAT within schedule would be difficult.	Risk was closed on 02/24/26
Open and Monitoring	02/20/26		Staffing/Resource Available	Possible reduction in PALM funding to DJJ starting 7/1/2026	Increasing	6 (High/Medium)	Senate proposed budget	Monitoring closely proposed	Funding reduction would	Monitoring closely proposed FY 26/27 appropriations.
Open and Monitoring	06/06/25		Interface	People First DB Links	Increasing	4 (Medium/Medium)	People First is yet to deliver the DB Links used by DJJ's agency business systems. Upon reaching out to People First directly, we did not receive confirmation that the DB links will be available before interface testing. People First impacted DB links list is shared with all agencies, the date by which People First DB links will be ready is still not known. expected to look for additional information	Currently systems are remediated with the information provided by People First.	Will not be able to test the ABS that has been remediated for PALM without the updated DB Links from People First. Impacted ABS: HRES	Still Waiting for DB Links from People First
Open and Mitigating	06/03/25		Conversion/Configuration	Data Cleansing Maintenance - Projects	Decreasing	4 (Medium/Medium)	Prior to PALM, Project IDs were not deactivated or deleted in FLAIR and there was not a process to do so. In preparation for Go-Live, the Budget PALM Administrator and Facility Services staff researched all Project IDs and determined those that needed to be deactivated and deleted. A script was created and run to mark those Project IDs as I or D in FLAIR. These data need to be reviewed on a recurring basis so that inaccurate or incomplete information is not converted to Florida PALM.	Mitigation plan has ensured that the additional details associated with Project IDs are being correctly input in FLAIR by F&A staff (those fields that are required for conversion into PALM). Additionally, the Facility Work Order System (DJJ's ABS to manage Projects) has been remediated to incorporate a financial reconciliation and Project ID close-out workflow. For monitoring, Budget is actively reviewing, updating, and/or correcting Project Data to ensure the data requirements for conversion are met.	Inaccurate Project data converted into PALM will result in conversion failures, too many records being converted, or inaccurate records being recorded. This would require additional efforts to clean the data in multiple system.	Monitoring Risk
Open and Mitigating	10/31/25		User Acceptance Testing	PALM Administrator Vacancy in HR	Increasing	4 (Medium/Medium)	This vacancy in the HR PALM Administrator role may delay UAT preparation and execution. This position is essential for validating test scripts, coordinating HR input, and ensuring timely issue resolution. Interim support may be needed to maintain testing timelines.	Continue aggressive effort to recruit OPS; work with PMO to begin UAT prep	UAT preparation and execution may be delayed. This could result in incomplete or delayed test script validation, reduced coordination of HR input, slower issue resolution, and overall disruption to UAT timelines and quality.	Monitoring Risk
Open and Monitoring	02/12/26		Interface	IU Transaction data that are currently sent to Print Plus as part of the	Increasing	4 (Medium/Medium)	IU Transactions are available today in FLAIR; they are sent to Print Plus as part of the standard FLAIR data extract Print Plus	Discussing what a mitigation plan looks like. if we don't have IU transactions built into Axiom Pro when PALM goes live what will	Agencies confirmed the issue and expressed interest in storing supporting documentation for IU transactions in Axiom	Monitoring Risk

DJJ Issues										
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period	Comments for Jan. - Feb. 2026

DJJ Assumptions						
Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period	Comments for Jan. - Feb. 2026
Processes Data	Chart of Account (COA) will not change beyond what the FL PALM team has forecast	Logged	08/01/23	Marcia Haye (F&A)	Reviewed for current period.	Still applicable.
People	All SMEs will be available to work on required PALM-tasks.	Logged	04/17/24	Bureau SMEs	Reviewed for current period.	Still applicable.
People	There is a commitment from end users to the PALM Project.	Logged	04/23/24	All	Reviewed for current period.	Still applicable.
People Technology	PALM funding is maintained at the current level or greater allowing current BU-specific PALM administrators to be kept on staff.	Logged	04/23/24	PMO, F&A, General Services, Budget	Reviewed for current period.	Still applicable.
People Processes Data	There will be sufficient engagement from DJJ's SME's who are knowledgeable about agency business processes.	Logged	04/23/24	F&A, Budget, General Services, HR, BPCA, BCM	Reviewed for current period.	Still applicable.
People Processes Technology Data	The PALM team will provide sufficient and adequate guidance to DJJ.	Logged	04/23/24	F&A, Budget, General Services, HR, BPCA, BCM, PMO	Reviewed for current period.	Still applicable.
People	DJJ PMO can drive the implementation of the PALM Project with four team members.	Logged	12/03/24	PMO	Reviewed for current period.	Still applicable.
Data	Unreconciled payroll warrants will not be included in the Outstanding Warrant Report (APR018).	Logged	04/21/25	HR	Reviewed for current period.	Still applicable.
People Technology	Cutover will be no longer than approximately 3 weeks.	Logged	04/30/25	Supplier payments	Reviewed for current period.	Still applicable.
Technology	PALM will incorporate additional interfaces after Go-Live, if needed by DJJ.	Logged	05/01/25	IT, F&A	Reviewed for current period.	Still applicable.
Technology Data	PALM will not alter the interfaces DJJ has selected.	Logged	05/01/25	IT	Reviewed for current period.	Still applicable.
Data	If balances on purchase orders in AOD are different than what's reported in FLAIR, when encumbrance data is converted to PALM, AOD will update to reflect the FLAIR/PALM balances. As long as encumbrance balances are maintained in FLAIR, the full balances of the purchase orders from AOD will not be converted to PALM, potentially causing budget checking issues.	Logged	05/01/25	F&A, Budget, General Services	Reviewed for current period.	Still applicable.
Data	We assume that Florida PALM is updating the report export document as changes are made and enhancements are added from Pre-UAT testing.	Logged	05/05/25	Agency Liaison and SMEs	Reviewed for current period.	Still applicable.
Data	Zero dollar contracts in FACTS will not be converted to PALM	Logged	10/15/24	BCM, F&A contract disbursement payments	Reviewed for current period.	Still applicable.
People Processes Technology	FACTS will be available to test when end-to-end user testing for PALM begins. When asking FACTS about UAT, the response was that "...we are still in the testing phases with Florida PALM. We will provide the agencies with an update when the UAT environment becomes available."	Logged	06/26/25	BPCA, Contract Tracking System (ABS), and F&A Contract employees	Reviewed for current period.	Still applicable.
Processes	The BOSP Beneficiary Form will be updated from FLAIR to PALM account values and provided to the agencies prior to PALM Go-Live	Logged	07/25/25	Human Resources	Reviewed for current period.	Still applicable.
People Data	Employees will be provided training on the object code to account crosswalk.	Logged	08/20/25	UAT SMEs and End-Users involved in UAT Full	Reviewed for current period.	Still applicable.
Data	Regarding old FCO categories associated with active assets - the Project will implement a change for this in future conversions. This will allow for the asset records to be converted to Florida PALM.	Logged	09/04/25	Asset and property conversion data (General Services)	Reviewed for current period.	Still applicable.
People	Identified SMEs and end users will be available throughout UAT and will have documented and understood the test cases assigned to them prior to execution.	Logged	09/05/25	UAT SMEs and End-Users	Reviewed for current period.	Still applicable.
Technology	The Florida PALM system will remain continuously available and accessible for the full duration of User Acceptance Testing (UAT).	Logged	09/05/25	All End-Users	Reviewed for current period.	Still applicable.

The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

The Change Champion Network composition reflects the completeness of your CCN makeup.

- Unique Filled Role = 16
- Duplicate Filled Role = 13
- Vacant Role = 0

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

RW Tasks - Completed or Open Items

Project Impact	Critical Operational Element	Task ID	Task Name	Task Planned Start Date	Task Planned End Date	Agency Reported Task Progress	Agency Submission Date	Status Comment	Project Verification of Completion	Agency Corrected Submission Date
Direct	Technology	576	Complete Internal Agency Business System Test and Remediation to prepare for Cycle 2 - Technical Interface Testing	01/06/25	07/25/25	75% - Consolidating/Inputting Information for Submission		Blocked due to missing Single Pay procedures, which prevents testing.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DLA Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	01/13/26		Staffing/Resource Availal	Limited SME availability and Potential SOD Conflicts during UAT Due to Operational Workload	Increasing	9 (High/High)	Agency SMEs are responsible for supporting Florida PALM UAT activities while also managing day-to-day operational responsibilities. Due to limited staffing and overlapping responsibilities, SMEs may encounter potential	The risk was discussed with PALM team. Agency will monitor SME availability and potential SOD conflicts during UAT and adjust participation as needed based on operational priorities.	Delays or gaps in UAT execution may occur, resulting in reduced test coverage, delayed defect identification and resolution, and potential impacts to overall project readiness and go-live timelines.	Agency continues to support UAT activities. Potential SOD conflict exists only for Budget functions due to limited staffing. This has been communicated through emails.

							segregation of duties(SOD) conflicts during testing.			
Open and Monitoring	01/13/26		Deployment/Cutover	Potential System Downtime During PALM-FLAIR Transition	Increasing	9 (High/High)	During the transition from FLAIR to Florida PALM, there may be anticipated periods where system availability is reduced. Clarification has been requested from the PALM team regarding any planned downtime.	Agency raised the question with PALM RCs and is awaiting confirmation regarding anticipated system downtime. Agency will monitor updates.	It may delay processing activities, impact UAT execution, and affect day-to-day operational tasks during the transition period.	Agency continues to monitor communications from DFS/PALM regarding any anticipated system downtime during the FLAIR to Florida PALM transition.
Open and Monitoring	01/14/26		User Acceptance Testing	UAT Data Readiness Dependency on Mock Conversion 4	Increasing	9 (High/High)	Data cleansing based on Mock Conversion 4 is scheduled to be completed by March 13, while UAT is planned to begin in February. If UAT begins before Mock Conversion 4 data is available or validated, testing may need to proceed with incomplete or non-final data.	Agency has raised the concern with PALM RCs and is awaiting guidance on UAT data expectations.	UAT execution may be delayed or limited, resulting in reduced test coverage, increased work, and potential impacts to testing timelines.	03/05/2026: Agency conversion and validation activities are currently in progress and scheduled to complete by March 13. The agency continues UAT activities while monitoring data readiness.
Open and Mitigating	04/30/25		Role Mapping	Segregation of responsibilities with a Florida PALM user role.	Increasing	6 (Medium/High)	FLAIR user access allows the agency to restrict functions but Florida PALM user roles do not allow for restricting activities.	We need to determine if this will be a training issue or if responsibilities will need to be shifted to HR for payroll related activities.	HR will have to assume additional responsibilities.	SMEs are currently attending UAT training sessions and becoming familiar with their assigned roles. The agency will continue to monitor if any role restrictions or responsibility adjustments are required.
Open and Monitoring	01/13/26		Deployment/Cutover	Inter-Agency PALM Go-Live Readiness Impacting DLA Operations	Stable	6 (Medium/High)	Agency relies on Inter-agency transactions and coordination to support day-to-day operations. If one or more dependent agencies are not ready for Florida PALM go-live, required inter-agency processes and transactions may be delayed or disrupted, potentially impacting agency's operational continuity.	The risk was previously discussed with PALM RCs. Agency will continue to monitor updates from DFS and adjust planning as needed to minimize operational priorities.	Delays or disruptions in inter-agency processes may impact DLA's day-to-day operations and require interim or manual procedures until all dependent agencies are fully live in Florida PALM	Agency continues to monitor updates from DFS and other agencies regarding Florida PALM go-live readiness. No direct impact to DLA operations has been identified at this time.

DLA Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	12/20/24		Critical - Impacts the abil	Interface	Approval seeking on batch upload to Import process for supporting documents	The need for batch upload approval was identified to improve the efficiency of importing supporting documents.	If there is no project solution it will require considerable staff effort to complete the supporting docs	04/14/25	3/06- Currently PALM supports uploading individual documents within each transaction and bulk upload functionality is not available. The agency will continue monitor for any updates or enhancements from PALM regarding batch/bulk upload capability.
Open	04/09/25		Critical - Impacts the abil	Business Process Chang	Manual payroll split for federal grants.	Manual process may be required to split payroll costs related to federal grants rather than utilizing Florida PALM payroll accounting functions.	We are hopeful that the future tasks will allow us to rectify the issue	09/25/25	This is still be required. Agency will continue monitoring PALM Payroll functionality and evaluate future tasks that may address this process.
Open	05/21/25		Critical - Impacts the abil	User Acceptance Testing	Data Warehouse	we have no way to test whether the new data warehouse will function the way that it does today because it's not available for us to test it.	We will explore optional reporting solutions.	06/30/26	Monitoring until DW/BI reporting becomes available.
Open	09/10/25		High - Impacts the ability	Conversion/Configuration	Review and validation of extensive APLM Supplier file	The PALM Supplier file is significantly large, making it difficult for F&A staff to complete reviews within the required timeframe. This may impact timely validations and downstream processes.	Extend review timelines or allocate additional resources to ensure accurate validation of supplier data.	11/07/25	DFS confirmed that Single Pay voucher testing using API002 will occur during testing UAT, likely after March, and coordination will continue with DFS during this process.

DLA Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
Processes	Processes will require modification to accommodate new roles	Logged	09/07/23	Finance & Accounting	Due to limited staffing in Budget, SOD conflicts may occur for Budget Management roles. Process adjustments and mitigation controls will be implemented as needed.
Data	Data field changes will impact systems	Logged	09/07/23	Finance & accounting, VANExt, EGrants, SQL reporting	Data field changes are being addressed for API002. Its is still in progress due to mapping and validation of some required PALM chart values.
People Processes Technology Data	Final build is complete and available for UAT and Interface Testing	Logged	12/20/24	Finance & accounting, VANExt, EGrants, SQL reporting	Final build is supporting UAT and interface testing. All interfaces are progressing except API002, which is still under development.
Processes Data	Supplier records were added by DLA, but PALM and FLAIR outputs show discrepancies that need clarification.	Logged	09/10/25	Finance & Accounting	Supplier records and confidentiality designations continue to be reviewed with DFS. Clarification is ongoing for suppliers or single pay.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DMS Risks

Sheet Name	Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
DMS Risks	Open and Mitigating	02/19/25		User Acceptance Testing	User Acceptance Testing (UAT) Failure To Ensure Successful End User Training	Increasing	9 (High/High)	<p>Current scheduled readiness tasks require agencies to have created their testing and training plan for all business processes without knowing or seeing the manual procedures in PALM to perform the business process transaction. Under this situation, DMS is unable to create a detailed enough test and training to ensure successful end user training.</p> <p>Owner: Stephen Russell, DSGI</p>	<p>Feb 19: Based on discussions with PALM in the touchpoint meeting, PALM will create "process steps" that will provide the needed detail to create the UAT tests and End User Training.</p> <p>UAT success will be dependent on PALM publishing the "process steps" in time to be utilized by the agencies for UAT plans.</p> <p>The success of end-user training and testing for PALM at any state agency is contingent of having detailed instructions of the steps to perform for each Business Process, also called a User Manual. Currently, the "process steps" are not available. Based on the PALM project timeline and need for accurate, uniform information as the basis of testing the training, the PALM Team will need provide these "Process Steps" in the form of a user manual for the Tier 1 and Tier 2 's Business Process before testing and training scripts can be created.</p>	<p>This will negatively impact the validity of testing DMS business processes in the new PALM system and conduct lucrative End User Training.</p> <p>Not having the Business Process steps available in early enough time to allow state agencies to create test scripts and training courses, creates a HIGH risk of failure to UAT.</p>	<p>DMS's UAT execution strategy involves a systematic approach to documentation culminating in the production of a comprehensive step-by-step Florida PALM end-user manual that will effectively include every activity and function possible in the system with image references and commentary throughout. This manual could be used to lessen impacts resulting from knowledge gaps, as it will document agency nuance and provide insight into PALM functionality concerning continuity of existing operations. Moreover, DMS has implemented a UAT protocol which is adaptive in nature and takes into consideration expected changes to process steps and other operational specifications. Test cases are modified, as needed, to more accurately reflect the steps required to administer a given activity. Agency business systems have been remediated in ways that should serve to buffer against PALM-related functional change. Notwithstanding these actions, the risk of inaccurate or incomplete process steps and operational requirements, made available by PALM, present challenges to readiness.</p>
DMS Risks	Open and Monitoring	04/09/25		Interface	Interfaces and Possible Redevelopment	Increasing	9 (High/High)	<p>Interfaces</p> <p>Late discovery of defects, requirements changes, or any other event that could cause redevelopment for DMS could strain resources on the DMS team.</p> <p>Owner: OIT / Production Support</p>	<p>Weekly internal technical meetings to review and address. Recommend PALM establish a cutoff date to any changes to fields and interface layouts. Interface testing readiness is crucial to DMS success.</p>	<p>Changes will negatively affect the interface reliability.</p>	<p>We continue to monitor this risk. UAT Ticket #0009245 has been submitted pertaining to a potential issue concerning interface file layout changes and remains unresolved. If confirmed that changes have been made to either system functionality, file layouts, or other requirements - this risk would be escalated into an issue.</p>
FRS Risks	Open and Monitoring	09/22/23		Conversion/Configurator	Retiree payroll warrants and EFTs not being processed timely and/or accurately.	Stable	9 (High/High)	<p>Retiree payroll warrants and EFTs (approximately \$12 billion per year for 472,000+ payees) not being processed timely and/or accurately.</p> <p>Currently, because we are using the accounts payable module, instead of a payroll module, we may not be able to schedule payrolls with a specific timing. We may not be guaranteed that the payments will be made</p>	<p>Going through confirming requirements, build an acceptable design, extensive testing - especially formal parallel testing to ensure everything is running properly for several cycles. Working with PALM to get more information to better define the programming needs.</p>	<p>FL Statute mandates that FL retirees are paid on the last business day of each month and dates are set one year in advance.</p> <p>Members are aware that their benefit is received on the last business day of the month. RP cannot coordinate to print "Early" as retirees will have a false understanding of monthly timing.</p>	<p>2026-03-06: Confirmed risk.</p>

							<p>payments will be made timely, or the checks will be printed prior to the pay date.</p> <ul style="list-style-type: none"> • Pay dates for Retired Payroll is set a year in advance. After going through an approval process, these dates are sent to DFS every year before December prior to the year beginning. (Payroll schedule attached.) <ul style="list-style-type: none"> o This may need to be adjusted on the fly for natural disasters. o Pay date for Retired Payroll is the last business day of every month, as required by statute (F.S. 121.091(1), F.S. 121.091(3), and F.S. 121.091(4)). o Florida PALM needs to be responsible for scheduling changes or adjustments. • We believe we can make this work using the Accounts Payable (AP) module, however, this could be an extremely human driven and coordinated process, if this cannot be pre-established with supplemental and monthly fixed dates. • Of other known retirement systems, none process benefit payments through Accounts Payable (AP) modules. • Potential Options: <ul style="list-style-type: none"> o Have a direct interface with the state disbursement bank (currently JP Morgan) (this is how other states function). o Third Party sending bank files to and from our state disbursement bank account. o Build the AP module around our pay cycle. (Supplemental and Monthly) 		If checks are deposited on a different day other than the last business day of the month, tax payments/accounting will be affected as well.		
FRS Risks	Open and Monitoring	04/08/25		Deployment/Cutover	Cut over and the impact on payroll, both weekly and monthly retirement processing.	Stable	9 (High/High)	<p>Cut over and the impact on payroll, both weekly and monthly retirement processing:</p> <ul style="list-style-type: none"> - Timing if down in July, impacts COLA, service retirement and DROP exit; - EFT Reversals; - Direct Deposit starts/stops (Sun-Thur); - Need to know in advance so we can send communication to members regarding the Direct Deposit starts and stops; - Holds/in Lieu of list where the member has direct deposit set up, but we have put them on the in lieu of list to create a physical warrant in lieu of direct deposit. - Legacy warrants paid in the DFS system conversion into PALM 	<p>timing of when there will be no access – run monthly payroll early or ensure monthly payroll will not be impacted. This will need sign off on not processing weekly payrolls during the “down” time and busiest months.</p>	<p>RetiredPayroll will not be able to run weekly or monthly payrolls. The monthly payroll is mandated by statute and tax monies and retiree payments will have to be allocated prior to the transition time.</p>	2026-03-06: Confirmed risk.
FRS Risks	Open and Monitoring	07/11/25		Deployment/Cutover	Active Retirement Receipts and Report Processing during transition period from the legacy system to PALM.	Stable	9 (High/High)	<p>Affected:</p> <ul style="list-style-type: none"> • M30 FRS monthly/SUSORP, SMSOAP biweekly retirement data files (PALM PRI030). • Receipt processing by Division for retirement files for state and non-state agencies. • Payments submitted to Retirement through the Dept. of Revenue (DOR) for non-state agencies. <p>Pursuant to chapter 121 F.S. (various references) contributions are due to the Division of Retirement no later than the 5th working day of the month immediately following the month during which the payroll period ended. Accompanying payroll data must be transmitted concurrent with the contributions. Submissions that are not able to process (missing data/contribution or out</p>	<p>Factors outside of the Division's control:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Dependent on when it occurs and the length of time. <input type="checkbox"/> Dependent on DOR's accommodations for the transition. <p>Factors within the Division's control:</p> <p>The assessment of penalties (delinquency fees) is programmed into IRIS based on dates data or contributions are received and/or when a submission balances. (A waiver would not fall within the intent of the law, and granting such may require approval from the Governor's office.)</p> <ul style="list-style-type: none"> <input type="checkbox"/> The Division could program IRIS to not assess delinquency fees for late submission for a period of time, but this would be a blanket approach covering all agencies. (Note, the state's submissions are not assessed 	<p>Any delay in processing could affect the timely transfer of funds for the FRS Investment Plan or SUSORP/SMSOAP to member accounts for investment. While there may not be a loss of earnings assessed (if a moratorium is short term), there may be pushback from the membership, especially on the SUSORP side. If DOR if does not provide accommodation for the transition, what will happen? There are over 900 agencies of which the state is considered one. We do not track the agencies that use DOR and cannot force agencies to pay in a particular way, and many agencies have their own limitations on the way they can remit payment, and any change may require broader approval from their leadership/board or constituent group.</p>	2026-03-06: Confirmed risk.

							<p>of balance), are considered delinquent, and a penalty is assessed. SUSORP/SMSOAP are on a biweekly schedule. The Division receives payment from the Bureau of State Payrolls for the state's submissions. Non-state agencies have the option to remit payment through DOR and through other sources. Concern: During the transition period to PALM, if there is a moratorium enacted on processing, without an allowance for parallel processing under the legacy system, and it falls on either the monthly or biweekly due dates</p> <ol style="list-style-type: none"> 1) Preventing the state's monthly and/or biweekly from being submitted 2) Preventing non-state agencies from transmitting funds through DOR 3) Preventing the Division's Accounting team from receiving funds transmitted from any source (EFT/ wire transfer, check) 4) Preventing the Division's Accounting teams entering logging information (in FLAIR?) <p>The impact could be far reaching.</p>	<p>delinquency fees.)</p> <ul style="list-style-type: none"> ☐ Payments received from non-state agencies (outside of DOR) could be held internally, if they are logged into IRIS and allocated with the actual receipt date. If this occurs properly, IRIS will not register a delinquency. 		
STMS Risks	Open and Monitoring	11/06/23		Timeline. Competing deadlines immediately prior to go-live.	Increasing	6 (Medium/High)	<p>Timeline. Competing deadlines immediately prior to go-live. Fiscal accountants and other users will be trying to learn PALM as well as changes to departmental and enterprise systems affected by PALM implementation, at the same time. The STMS Team, as well as other system owners, may need to make late changes while also trying to train end users.</p>	<p>Identify impacted users and trainings that will be offered, to coordinate a DMS training schedule. Meetings with PALM.</p>	Unable to meet timelines to go-live.	Competing priorities for testing and training will continue to be a risk until PALM is live.
DMS Risks	Open and Mitigating	04/27/23	Staffing/Resource Avail	PALM and Statutorily Required Tasks Overlap	Stable	6 (High/Medium)	<p>Timeline and Resources. There are multiple overlapping Palm tasks with due dates that utilize the same personnel resources as statutorily required tasks during year end. Owner: Eric Thiele, FMS</p>	<p>Complete the tasks early or ask for a later due date. Most PALM tasks completed early - some still in progress. Year end required tasks complete.</p>	<p>This will negatively impact the testing and training tasks prior to GoLive.</p>	<p>As UAT progresses, along with day-to-day activities, the risk remains. Continued monitoring is needed to evaluate the progression of UAT-related results against acceptance criteria. The volume of testing (and associated timeframes) required to properly evaluate the system remains indeterminate.</p>
MFMP Risks	Open and Monitoring	04/30/24	Business Process Chang	DFS Vendor Portal	Stable	6 (High/Medium)	<p>On June 5, 2025, DFS PALM and DFS Accounting & Auditing agreed to update the MFMP-DFS vendor exchange so that only vendors registered and validated in FLIPS can transmit to PALM and MFMP. This required MFMP to redesign, rebuild, and retest several system components to support the new process. In 2024, DFS A&A decided not to convert "N" type vendors, including foreign and fictitious records. In November 2025, this decision was revisited due to MFMP's plan to stop allowing new "N" type registrations in Q3 FY26. In December 2025, A&A agreed to continue supporting non-standard IDs for foreign vendors and to work with those vendors on required updates.</p>	<p>MFMP and Florida PALM continue to design the master vendor data exchange based on MFMP and Florida PALM's existing requirements. MFMP will continue to work with DFS and Florida PALM on planning activities for the new vendor portal; however, based on the current lack of formal requirements, a defined implementation plan, timeline, etc., MFMP cannot begin building to support the new vendor portal at this time.</p>	<p>Failure to successfully integrate supplier records between MFMP, Florida PALM, and FLIPS would cause several critical issues within the Procure to Pay process in the State of Florida.</p>	<p>MFMP completed the vendor exchange rebuild in August 2025 but was unable to conduct end-to-end testing with FLIPS until February 2026 due to FLIPS' parallel design, build, and testing efforts. While these updates do not require design changes from MFMP, testing of "non-standard" vendor IDs remains pending, awaiting FLIPS design updates. As MFMP begins PALM UAT and Interface Cycle 3 testing, comprehensive validation of the vendor exchange across all expected vendor ID types is critical. Outstanding questions regarding supplier processes, along with the absence of confirmed testing milestones, present risks to integration readiness and overall go-live stability.</p>
MFMP Risks	Open and Monitoring	06/06/25	Interface	MFMP Florida PALM Testing Delays	Stable	6 (High/Medium)	<p>Due to a lack of return data from Florida PALM mock testing, MyFloridaMarketPlace (MFMP) was unable to participate in Mock One testing and did not have Mock Two PALM</p>	<p>The Department will continue to monitor timely completion of testing activities and openly communicate with the Florida PALM project when data return deadlines are not</p>	<p>Continued delays in receipt of testing data from Florida PALM to MFMP will hinder the Department's ability to complete testing activities that have a dependency on</p>	<p>MFMP completed the vendor exchange rebuild in August 2025 but was unable to conduct end-to-end testing with FLIPS until February 2026 due to FLIPS' parallel design</p>

							conversion data until the end of May 2025 to begin evaluating. Florida PALM not returning Mock Two conversation data to MFMP until six business days before the planned start of Florida PALM's Interface Cycle Two Testing (June 2025) presents significant risk with the two programs being unable to evaluate possible errors and valid or invalid failure reasons until shortly before the start of Cycle Two testing. Mock One and Two testing was intended to begin exploring conversion results and troubleshooting issues that arise prior to the start of Cycle Two Testing.	met. If these return deadlines continue to have delays, they may result in an overall delay in the MFMP and Florida PALM testing timelines.	available Florida PALM testing return data.	build, and testing efforts. While these updates do not require design changes from MFMP, testing of "non-standard" vendor IDs remains pending, awaiting FLIPS design updates. As MFMP begins PALM UAT and Interface Cycle 3 testing, comprehensive validation of the vendor exchange across all expected vendor ID types is critical. Outstanding questions regarding supplier processes, along with the absence of confirmed testing milestones, present risks to integration readiness and overall go-live stability.
							Based on these events and according to Florida PALM's current timeline, this puts MFMP a full cycle behind in testing efforts from the Florida PALM data perspective. MFMP has continued to complete all system and integration design, build, and test activities in its timeline that it has control over; however, any testing requiring data from Florida PALM is behind the anticipated schedule. Although these testing efforts can be completed during Cycle Two testing, this requires several activities to occur later in the cycle than originally anticipated, introducing risk on both sides of the project to meet the completion dates in preparation for User Acceptance Testing, End-to-End testing, and Go-Live Dry-Run testing.			
FRS Risks	Open and Mitigating	11/07/23	Business Process Change	Retirement needs to be able to go negative in specific funds	Decreasing	6 (High/Medium)	Retirement benefits payments must be supported by PALM to allow for timely release of funds. This would create a loss of earnings for the trust funds if transfer is delayed. Retirement needs to be able to go negative in specific funds, not all funds have been approved that are required to be able to go into negative cash balances. Specifically fund 70500 (need to invest Health Insurance Subsidy (HIS) and Investment Plan (IP) Investment Vouchers need to post even if the fund is negative in cash), other funds needed were previously approved. The current process has allowed us to keep loss of earnings at a minimum, however, if the process is changed and we are unable to go negative and must wait on funds to be available to transfer funds to Investment Plan (IP) member accounts we will be forced to pay more loss of earnings which would negatively effect the Florida Retirement System (FRS) Trust Fund. Including National Guard supplementals.	Programming needs to be completed to allow for flexibility so funds can be released timely. Continue to work with the PALM team.	If the process is changed and we are unable to go negative and must wait on funds to be available to transfer funds to Investment Plan (IP) member accounts, we will be forced to pay more loss of earnings which would negatively affect the Florida Retirement System (FRS) Trust Fund.	2026-03-06: Confirmed risk.
FRS Risks	Open and Monitoring	11/07/23	Conversion/Configuration	Pulling reports from FLAIR/PALM is mandatory to complete the statutory requirements.	Stable	6 (High/Medium)	Pulling reports from FLAIR/PALM is mandatory to complete the statutory requirement to publish the ACFR by December 31st. Multiple agencies are involved in this publication.	Plan for report identification and testing. Verify reports are available.	If the information in FL PALM is not complete or correct, and/or we are not able to pull reports, the ACFR will not be accurate and will cause an audit finding.	2026-03-06: Confirmed risk.
FRS Risks	Open and	09/17/23	Interface	Any significant	Stable	6 (High/Medium)	Any significant change	Going through	MFMP and Direct	2026-03-06: Confirmed

FLNS IRIS	Open and Monitoring	02/17/24		Interface	Any significant change to existing Retiree payroll, EFT processing, BOSP retirement reporting, and/or interface files between IRIS and FLAIR could require substantial programming and lead time.	Stable	4 (High/Medium)	Any significant change to existing Retiree payroll, EFT processing (EFT processes, including payment information for retirees, pre-noting, bank account changes, EFT returns, stop payments, etc., not being automated or not being processed timely and/or accurately), BOSP retirement reporting, and/or interface files between IRIS and FLAIR could require substantial programming and lead time.	Going through confirming requirements, build an acceptable design, extensive testing. Clearly define processes, make sure no interfaces are missed - all designs/build/tests are accounted for. Some items have a work around, some do not - unknown solution at this time. The only option would be to create online entries manually in Florida PALM. Working with PALM to get more information to better define the programming needs.	If EFTs and Direct Deposit stops are not done timely it could result in monies being put into a fraudulent, closed or the wrong account. The impact could also include overpayments due to death.	2020-03-09. Continued risk.
STMS Risks	Open and Monitoring	05/01/25			API133 - new interface	Stable	4 (Medium/Medium)	New interface for voucher errors likely to be used by STMS. This will provide error messages for vouchers.	Initial meeting with PALM 5/1/25 to discuss interface. Continue to review the interface and determine the impact to STMS.	Possible delay in schedule with adding a new interface.	Additional changes to the API133 interface were emailed by Tanya. Until this interface and changes are fully tested in UAT, the risk will remain open.
DMS Risks	Open and Monitoring	04/21/23		Deployment/Cutover	Sandbox Function	Stable	4 (Medium/Medium)	Functionality. Will Agencies have enough time to work in the sandbox environment to ensure their respective divisions can test and see if the current work they perform in FLAIR can be achieved in the PALM Environment? If time is limited and a required field is missing, will there be enough time for it to be fixed and re-tested prior to the January 2026 go live date? Owner: Jason Ottinger, DSGI	Roll out sandbox test capabilities as sections are completed for Agencies to test. Sandbox environment is not secure for testing - PALM needs to work on true test environment. Sandbox status has not changed. PALM is addressing this risk.	This remains a risk until UAT goes into production.	With UAT having been commenced and the UAT2 environment being placed in service, we are now able to evaluate this risk based on previous concerns. There remains questions and concerns pertaining to operability of the testing environment, and as such, we continue this risk.
DMS Risks	Open and Monitoring	06/30/25		Identity Provider (IdP)	Testing Environment Access	Stable	4 (Medium/Medium)	In reference to Task 591 - Confirm IdP Configuration for Florida PALM, both DMS SAMs successfully logged in to test access. However, loading of the page and the search function was excessively delayed. This may cause backlog issues in the UAT environment during testing activities. This note appears in the comments column of the DMS UAT IdP Smartsheet. Owner: OIT / Production Support	The Project has acknowledged this potential risk and will keep DMS informed re: mitigation.	This may cause backlog issues in the UAT environment during DMS PALM testing activities.	This risk has been reviewed and is continued.
MFMP Risks	Open and Monitoring	02/24/26		Business Process Change	DFS Vendor Port	Stable	4 (Medium/Medium)	DFS confirmed that FLIPS will go live with ACH request functionality in October 2025 but has not provided additional milestones, testing phases, or a broader implementation timeline. MFMP requested details on the strategy for transitioning existing suppliers, including communication and change management plans, but has not received an update. With more than 100,000 suppliers statewide, it is unclear how vendors will be notified to update their remittance information in FLIPS once it becomes the system of record. Currently, suppliers make these updates in MFMP, and after PALM go-live, MFMP will no longer be able to support them, creating transition concerns. On December 2, 2025, MFMP again requested information on FLIPS' testing strategy, timelines, and environment readiness. DFS advised that A&A would meet internally on December 4 to discuss next steps. MFMP also outlined key testing and integration needs, including bi-directional API processing, supplier conversion validation, record ingestion, and	MFMP and Florida PALM continue to design the master vendor data exchange based on MFMP and Florida PALM's existing requirements. MFMP will continue to work with DFS and Florida PALM on planning activities for the new vendor portal; however, based on the current lack of formal requirements, a defined implementation plan, timeline, etc.	Failure to successfully integrate supplier records between MFMP, Florida PALM, and FLIPS would cause several critical issues within the Procure to Pay process in the State of Florida.	MFMP completed the vendor exchange rebuild in August 2025 but was unable to conduct end-to-end testing with FLIPS until February 2026 due to FLIPS' parallel design, build, and testing efforts. While these updates do not require design changes from MFMP, testing of "non-standard" vendor IDs remains pending, awaiting FLIPS design updates. As MFMP begins PALM UAT and Interface Cycle 3 testing, comprehensive validation of the vendor exchange across all expected vendor ID types is critical. Outstanding questions regarding supplier processes, along with the absence of confirmed testing milestones, present risks to integration readiness and overall go-live stability.

								over the system, and support for API134 updates to CBE codes.			
FRS Risks	Open and Monitoring	11/07/23		Conversion/Configuration	Unknown risks due to changes to major statewide systems during modernizations.	Stable	4 (Medium/Medium)	Unknown risks due to changes to major statewide systems during modernizations. (Example: Changes to HR Class Code System, Changes to People First System)	Solution is continued information sharing and communication with PALM team and Retirement. As well as adhering to the Retirement reporting format. Continuing to monitor Class Code implications by being aware of what is coming out of HR regarding class codes.	IRIS is designed based on the way the classification system is today. If the system is changed, operation and administration of Special Risk, EOC and SMSC will be affected. A complete overhaul may be needed.	2026-03-06: Confirmed risk.
DMS Risks	Open and Monitoring	05/01/25		Deployment/Cutover	Act of God/ office closure during cut over.	Stable	3 (High/Low)	If an Act of God (Pandemic, Hurricane, Tornado, Snow, etc.) were to cause office closures during the deployment/cutover from FLAIR to PALM there would be great risk to accurate, timely participation. Owner: Stephen Russell, DSGI / Eric Thiele, FMS	Key staff in financial wave roles will be identified and included in coop planning for any disasters that occur in the cutover timeframe.	If risk becomes an issue COOP Plan must be activated.	This risk has been reviewed and is continued.
FRS Risks	Open and Monitoring	02/17/22		Agency Business System	Bureau of State Payrolls' (BOSP) reporting and payment of contributions to the Division of Retirement for both the FRS and optional retirement plans not being completed timely and/or accurately.	Stable	3 (High/Low)	Bureau of State Payrolls' (BOSP) reporting and payment of contributions to the Division of Retirement for both the FRS and optional retirement plans not being completed timely and/or accurately.	Going through confirming requirements, build an acceptable design, extensive testing. In the process of working through the design with PALM. No work around except using the existing payroll system.	The delay will affect allocations to balance the retirement reports, which will delay posting of contribution data in IRIS. This will result in the delay of fund transfers to Investment Plan member accounts, which may result in loss of earnings. If the employer submitted timely and the delay is on Retirement, the loss of earnings could be assessed to the Division of Retirement. For the pension plan, the trust fund will have a loss of investment earnings, which are needed for benefit payments.	2026-03-06: Confirmed risk.
FRS Risks	Open and Mitigating	02/17/22		Interface	Upload of revenue accounting transactions from the Division's business system (IRIS) to PALM not being processed timely and/or accurately.	Decreasing	3 (High/Low)	Upload of revenue accounting transactions from the Division's business system (IRIS) to PALM not being processed timely and/or accurately. This risk includes the timely and accurate posting of revenues in PALM. (These transactions record the receipt of retirement contributions of approximately \$6 billion per year.) If this risk happens, Retirement would not be able to receive the revenue and be able to invest (loss of earnings) and allocate to employer's accounts (the delay will affect allocations to balance the retirement reports which will delay posting of contribution data in IRIS which delays funds transfers to Investment Plan member accounts which may result in loss of earnings. If the employer submitted timely and the delay is on Retirement, the loss of earnings could be assessed to Retirement).	Going through confirming requirements, build an acceptable design, extensive testing. The risk would be on IRIS - would be able to take information from the Department of Revenue website and manually enter, reconcile, and adjust in IRIS. Completed everything regarding strategy, need to test in UAT.	The delay will affect allocations to balance the retirement reports, which will delay posting of contribution data in IRIS. This will result in the delay of fund transfers to Investment Plan member accounts, which may result in loss of earnings. If the employer submitted timely and the delay is on Retirement, the loss of earnings could be assessed to the Division of Retirement. For the pension plan, the trust fund will have a loss of investment earnings, which are needed for benefit payments.	2026-03-06: Confirmed risk.
FRS Risks	Open and Monitoring	04/29/25		Deployment/Cutover	Act of God/ office closure during cut over.	Stable	3 (High/Low)	If an Act of God (Pandemic, Hurricane, Tornado, Snow, etc.) were to cause office closures during the deployment/cutover from FLAIR to PALM there would be great risk to accurate, timely participation.	Key staff in financial wave roles will be identified and included in coop planning for any disasters that occur in the cutover timeframe.	If risk becomes an issue COOP Plan must be activated.	2026-03-06: Confirmed risk.
MFMP Risks	Open and Monitoring	05/01/24		Staffing/Resource Availability	Project Staff Turnover	Stable	2 (Medium/Low)	Over time, the Florida PALM project team has encountered staff turnover. This can present risk associated with knowledge transfer, or lack thereof, between the existing resource and their successor. New project staff must be informed and prepared to continue open integration and interface design decisions. Delayed or incomplete knowledge transfers for the successor may delay	MFMP will work with Florida PALM to assist in expediting any knowledge transfer incoming successors require to mitigate delays in design decisions	Insufficient transfer of knowledge can result in delays in design decision making, putting the implementation timeline or quality of design efforts at risk.	Still monitoring

								design decisions, thus risking the implementation of the MFMP to Florida PALM integration according to the existing timeline.			
STMS Risks	Open and Mitigating	11/06/23			Functionality. Inability to design new STMS user interface for creating vouchers	Decreasing	1 (Low/Low)	Concern about creating UI for vouchers.	Provide training in PALM for creating vouchers so that we can attempt to replicate the process and minimize confusion for users in both systems. Provide information about flat files with information required to build vouchers in STMS and confidently pass combo edit checks using the PALM Combo Edit Check API. Meetings with PALM continue.	Training issues with end users.	UAT started for STMS on 2/23/26. When vouchers are successfully sent and processed, this risk will be closed.

DMS Issues

Sheet Name	Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
DMS Issues	Open	02/19/25		High - Impacts the ability of the agency to meet deadlines or milestones	User Acceptance Testing	Risk of User Acceptance Testing (UAT) Failure Owner: Stephen Russell	From an operating perspective - changes to process steps, particularly following the initial distribution of such information, may undermine the integrity and/or efficacy of certain UAT strategies in that test cases might have been developed based on out-of-date information and/or data. From a technical perspective - changes to system functionality, relative to Cycle 2 technical interface testing, may hinder effective UAT testing for certain impacted interfaces.	DMS, as part of its UAT strategy, has implemented a UAT protocol which is adaptive in nature and takes into consideration expected changes to process steps and other operational specifications. Test cases are modified, as needed, to more accurately reflect the steps required to administer a given activity. Agency business systems have been remediated in ways that should serve to buffer against PALM-related functional change.	11/06/26	We continue to monitor this issue.
MFMP Issues	Open	06/06/25		High - Impacts the ability	Interface	DFS Vendor Portal	The Department was originally made aware in March 2024 of a new vendor portal project the Department of Financial Services (DFS) was pursuing to replace their current W9 portal and vendor electronic funds transfer (EFT) business process. After further discussions with DFS, the Department logged a risk for this vendor portal in April 2024, citing the concern that a new DFS vendor portal design, build, and test process operating parallel with MFMP and Florida PALM's implementation activities and during the current build schedule presents significant risk the MFMP to Florida PALM integration and interface implementation. Since that time, DFS completed a competitive solicitation and awarded a contract in December 2024 to begin their design, build, and test process. Up until that activity, and since that time, the Department has continually requested information from DFS on how supplier integrations between MFMP, Florida PALM, and the new DFS vendor portal are intended to function, with very few updates. Beginning on April 23, 2025, the Department attended bi-weekly design sessions with Florida PALM and DFS	The Department will continue to meet with DFS A&A and Florida PALM to confirm business and functional requirements. Once those are confirmed, MFMP will make changes in VIP, AOD, and our interfaces to accommodate the changes in approach. MFMP will include these changes in its testing efforts to ensure everything is functioning as expected. Agency Customer education will be essential in mitigating this issue, emphasizing the importance of choosing the correct remittance address associated with their payments. Because this will present a moderate change in business process for customers, they should plan for this change prior to Florida PALM and FLIPS Go-Live.	TBD	Still monitoring

Accounting and Auditing (A&A) to better understand what is to be called the Florida Integrated Payment System (FLIPS) functional and technical requires so that the Department can ensure a successful integration between the two systems and Florida PALM. Based on previous knowledge and these discussions starting in April, there are two primary issues with FLIPS related to MFMP and Florida PALM's ability to be successful with a July 2026 Go Live:

1. Timeline and Scope – MFMP and PALM have worked together to design and build the interface based on PALM's defined supplier interface requirements for over a year, with testing scheduled to begin in June 2025. During that time, no information was available allowing the two programs to design what FLIPS would require, and any designs or supplier integration models do not currently accommodate FLIPS as part of the process. Attempting to make an integration shift this late in the process is an issue that has resulted in increased scope and project cost, a shift in testing timelines that have already been planned out, and use of time already allocated to other Florida PALM – MFMP integration activities to instead redesign the supplier integration approach. Interface Cycle Two – Technical Testing is scheduled to begin on June 9, 2025, and extend through the end of October 2025. This means the Department and Florida PALM are required to dedicate resources to redesigning the supplier integration approach and expected to test that integration in the same timeline window. FLIPS will also need to participate in this testing, meaning they must be far along enough in their build process to begin testing between August and October 2025, likely requiring MFMP, Florida PALM, and FLIPS to utilize the contingency period of Interface Cycle 2 Technical Testing in November 2025. Based on all of these considerations, DMS is raising the risk originally logged in April 2024 to an issue as of June 2025.

2. Supplier Data Connection and Remit Information – As of June 5, 2025, less than one week before Interface Cycle 2 Technical Testing is scheduled to begin, it has been communicated to the Department by DFS A&A that they have decided the expectation is for MFMP to not send any supplier data to Florida PALM or FLIPS. DFS A&A intends on all supplier data responsible for direction of the payment process to originate from FLIPS and be sent over to Florida PALM for creation of a PALM Supplier ID. Florida PALM would then send remittance address

							information to MFMP for inclusion in the MFMP Vendor Information Portal (VIP) and Ariba On Demand (AOD). This introduces issues with connecting vendor records between all three enterprise systems, requiring remittance data to be applied in MFMP strictly at the Tax ID level because no unique identifier will be integrated between MFMP and Florida PALM prior to FLIPS sending			
STMS Issues	Open	10/01/24		High - Impacts the ability	Interface	GLI012 - Time out error when testing web service connection	PALM & STMS Teams are troubleshooting the connection issue. Multiple meetings have been scheduled. STMS provided the IPs to the sandboxes for whitelisting.	Provided the IPs to whitelist in 4/4/2025. STMS requested another session to confirm PALM is seeing connection attempts. If still an issue, STMS will request Salesforce assistance.	07/31/25	STMS will begin working with PALM again for webservice connection in UAT environment in March 2026.
STMS Issues	Open	10/28/25	12/30/25	High - Impacts the ability	Interface	Interface Changes required after errors received from processing Inbound files.	Raised concern about inconsistency in POI006 Interface with error log received after processing file. The Receipt Quantity should be 1 when Amount Only Flag = Y. The current interface for Receipt Quantity is "Conditionally Required when the "Amount Only Flag" = 'N'. The Quantity should always be a positive value and should not be a negative value. Zero is allowed. The Receipt Line Quantity should not exceed the remaining quantity on the PO Line Quantity."	11/4/25 - PALM is updating the processing rules. After review, it will be posted to Knowledge Center.	11/28/25	This is still open and will be tested in the UAT environment during the carry forward period scheduled.
DMS Issues	Open	01/15/25		Low - All impacts not listed as Critical or High	Interface	MIP Interface Selections Owner: OIT / Production Support	MIP interfaces selected may not be 100% remediated without testing.	Could be manually resolved with more manpower, but would want to make changes to interface selection and possibly the interfaces themselves to account for missing / unknown elements. Oct 23: Confirmed interfaces. MIP has updated and automated internal FLAIR reports. Next steps are in progress - id data fields that need to be integrated with MIP and PALM. Feb 19: Reconfirmed interface selections. Potential interfaces are selected, but may not be initially required. March 10: Full integration testing has commenced and DMS is in the process of evaluating interface functionality and interoperability with the Florida PALM system relative to acceptance criteria."	06/30/26	We continue to monitor this issue as UAT progresses.
DMS Issues	Open	08/21/24		Low - All impacts not listed as Critical or High	Role Mapping	End Users New to DMS and PALM Owner: Evelyn Harrison, OOS	The majority of the DMS End Users are new to DMS. An even larger percentage have held their current jobs at DMS for less than 5 years.	Consistent monitoring, training and follow up. Regular communication, meetings, and increased involvement in the project Readiness Workplan Tasks. March 10: In addition to the above efforts, DMS's UAT execution strategy involves a systematic approach to documentation culminating in the production of a comprehensive step-by-step Florida PALM end-user manual that will effectively include every activity and function possible in the system with image references and commentary throughout. This manual could be used to lessen impacts resulting from knowledge gaps, as it will document agency nuance and provide insight into PALM	06/30/26	We continue to monitor this issue.

design the new functionality concerning continuity of existing operations.

DMS Assumptions						
Sheet Name	Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
DMS Assumption	People Processes Technology Data	Personnel using the Florida PALM system will have a lower sense of familiarity with operational function compared with that of FLAIR. There will be unforeseen vacancies in positions with key functional Florida PALM roles, either during UAT or after go-live, which will compound impacts related to user inaptitude concerning system familiarity.	Logged	09/07/23	All DMS PALM end users are impacted. Owner: Evelyn Harrison, OOS	We continue to monitor this assumption closely, specifically as it relates to UAT, as UAT may serve to increase user familiarity with the system and its operational function.
DMS Assumption	People Processes Data	Florida PALM users will require more time to complete activities performed manually in the system relative to the current duration of time required to perform the same tasks in FLAIR.	Logged	03/10/26	Florida PALM users required to perform manual tasks via system functionality.	This is a newly logged assumption.
FRS Assumption	Data	The State Retirement file from Bureau of State Payrolls (BOSP) will contain all of the same data elements that it currently contains, the reporting will function as it currently does, and Retirement will continue receiving the same information from People First.	Logged	08/28/24	Bureau of Enrollment and Contributions, IRIS	2026-03-06: Confirmed assumption.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DOAH Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	07/05/23		Training	If resources are not fully trained to do their jobs, go-live will continue but DOAH will not be ready for go-live.	Decreasing	6 (High/Medium)	DOAH is a small agency with limited workforce. There are eight purchasing and accounting positions, one budget director, and one personnel director that perform functions in FLAIR today. It is critical these personnel are able to perform their function in PALM.	DOAH will work with the DOAH's SMEs and PALM team to ensure staff's capabilities to function in PALM by attending meetings, reviewing information from the Knowledge Center, and Thursday Talks to keep abreast of information. Have affected staff (all end users) participate in testing and training for PALM. All SMEs have participated in Segment III and IV workshops.	DOAH will not effectively function in PALM and business processes will be delayed for completion. This will effect our internal and external customers.	During this period, new staff have been learning their core functions and responsibilities. During staff meetings and other PALM focused meetings, discussions have focused on UAT preparation.

Open and Mitigating	11/07/24		User Acceptance Testing	If Axiom Pro is not reconfigured for UAT, accountants will be unable to test and verify the functionality of the application with FL PALM..	Decreasing	2 (Medium/Low)	DOAH utilizes the Axiom Pro application for our voucher schedule workflow approval and as a repository for our voucher schedules.	Agency Liaison will collaborate with other agencies and Image API to ensure the reconfiguration is completed prior to UAT. Agency Liaison will request status updates from Image API to ensure timeliness of end product.	Staff will make plans to test the process using our previous method of assembling and storing our vouchers.	Docufree/Image API provided a DEMO for the voucher cover sheet and noted that we will be able to test in Mid-March.
Open and Mitigating	08/28/24		Staffing/Resource Availal	The staff's previous experience with system implementation may lead to low or lack of engagement in transitioning to the new financial system.	Decreasing	1 (Low/Low)	Staff's experience with the previous rollout of the CMS was did not go well. They are anxious about transitioning to a new system.	Agency Liaison will integrate PALM awareness through emails, meeting discussions and providing updates regarding PALM during management staff meetings. Agency Liaison will provide staff with PALM resources to become familiar with the system. SMEs and future end users will participate in Segment IV meetings and meet regularly to discuss PALM implementation in designated meetings so the conversation is focused."	Staff will not be actively engaged and will hinder the testing and training with PALM. Thus, not having trained staff to function in PALM on the Go-Live date.	During this period, all staff have completed their prerequisite training and all end users are prepared to participate in the in-person UAT sessions.

DOAH Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	03/03/26		Low - All impacts not listed	Staffing/Resource Availal	Accountant III- Disbursements Leave During UAT	Accountant III- Disbursements will be on extended leave from the third week of May until the third week in August.	The core functions of the Accountant III- Disbursements position will be handled by staff outside of the Purchasing and Accounting unit. These staff will have to be trained prior to the Accountant III- Disbursements leave of absence. Other duties performed by the Accountant III- Disbursements will be managed by the Purchasing and Accounting unit. During the leave of absence, PALM UAT testing related to this position will have to be conducted by back-ups.	08/24/26	Management has identified staff that will be providing coverage of the Accountant III-Disbursements' core functions during their absence.

DOAH Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
People Processes Technology Data	Staff will be able to perform their assigned function proficiently in PALM on Go Live Date	Logged	09/08/23	End Users	All PALM UAT prerequisite trainings have been completed by staff and all end users are prepared to participate in the in-person UAT sessions conducted by the project team.
Technology	Axiom Pro Application will be reconfigured to pull the vouchers in PALM by UAT.	Logged	10/31/24	End Users	Docufree/Image API provided a demonstration for the voucher cover sheet and noted we would be able to test the system in mid-March.
People	All positions will be filled with staff trained on current business processes.	Logged	04/04/25	End Users	All purchasing and accounting positions have been filled and focus has been on training them on their core functions and responsibilities.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DOE Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	07/02/25		Staffing/Resource Availal	Operational Staff Turnover - General	Stable	4 (Medium/Medium)	Staff turnover is an ever-present risk and is especially significant when contemplating a new financial platform.	Mitigate. Ensure job-specific processes are documented and generic enough to permit retraining of new, incoming staff.	Delays could occur.	No comments this period
Open and Mitigating	07/15/25		Interface	Weak integration plan between legacy agency systems and PALM	Stable	4 (Medium/Medium)	Current agency systems may not align or integrate cleanly with PALM data structures or workflows.	Mitigate. Continue to evaluate ABS during PALM testing.	Delays in data flow and reporting; potential data loss or duplication.	ABS tests are moving through Cycle 2 with one remaining system (FLAGS) on track for testing this month.
Open and Monitoring	07/15/25		Training	No training plan or materials provided for end users	Increasing	4 (Medium/Medium)	Training needs assessment not conducted; PALM training assets not yet distributed	Monitor. Coordinate with PALM training team; develop internal training schedule and delivery method	Low adoption, user errors, and surge in post-go-live support needs.	Developing in-house training methodology for the beginning of UAT.

				end users			distributed.	delivery method.		
Open and Monitoring	07/29/25		Staffing/Resource Availa	Overlapping UAT and Training Development	Increasing	4 (Medium/Medium)	Critical path activities such as SME testing and internal training design are scheduled simultaneously.	Monitor. Separate workstreams with distinct leads and buffer schedules.	Reduced availability of key resources and delays in readiness activities.	No comments this period
Open and Mitigating	07/29/25		Conversion/Configuratio	Data Integrity Issues During FLAIR-to-PALM Conversion	Increasing	4 (Medium/Medium)	Data extracted from the legacy FLAIR system may be incomplete, inconsistent, or poorly structured, posing conversion challenges.	Mitigate. Perform multiple test conversions and reconciliations; involve business SMEs to verify data mapping accuracy.	Financial records may be inaccurate, requiring extensive reconciliation and delaying go-live.	Data cleansing and conversion activities are yielding positive results.
Open and Mitigating	11/22/24		Staffing/Resource Availa	The project leans on several key people who possesses the primary knowledge of the business applications. If these individuals become unavailable (due to illness, departure, or other reasons), there is a risk of project delays, errors, and reduced efficiency in resolving technical or operational challenges.	Stable	2 (Medium/Low)	Matt has extensive knowledge of the Comptroller's business applications. The staff that backs Matt up knowledge of the applications are limited and would cause delays if the Matt becomes unavailable.	Mitigate: 1.) Knowledge Sharing: Implement regular knowledge-sharing sessions to distribute expertise among team members. 2.) Documentation: Develop comprehensive documentation for business applications, ensuring critical knowledge is stored and accessible. 3.) Cross-Training: Train other team members to create redundancies in expertise. 4.) Backup Plans: Establish a clear plan for knowledge transition and business continuity. 5.) Mentorship Programs: Pair the individual with a mentee who can gradually acquire similar expertise. By addressing this risk proactively, the project can reduce its dependency on a single resource and ensure continuity.	-Delays in project timelines due to the lack of expertise available to address critical issues. -Reduced quality of deliverables due to incomplete understanding of business applications. -Increased operational and knowledge transfer costs if the individual exits or is unavailable. -Potential for project failure in critical phases where the knowledge is essential.	No comments this period
Open and Mitigating	07/29/25		Business Process Chang	Moderate OCM efforts.	Stable	2 (Medium/Low)	Organizational Change Management efforts have been minimal, risking user adoption and SME readiness.	Mitigate. Accelerate internal OCM activities, engage leadership, deliver targeted messaging.	Delayed adoption and lack of preparedness during implementation.	No comments this period
Open and Mitigating	07/29/25		Interface	ABS and interface compatibility with PALM	Stable	2 (Medium/Low)	Interfaces and legacy systems may fail to transmit or receive PALM-compatible data.	Mitigate. System integration testing, interface validation, early defect tracking.	Critical data failures during financial processing or reporting.	No comments this period
Open and Mitigating	01/07/25		Agency Business System	ABS Applications (FLAGS, Deposit, Indirect Cost and PARS) risk being not ready for UAT and go-live due to insufficient remediation.	Stable	2 (Low/Medium)	DOE has encountered development delays resulting from moving interface file standards with the Project and lacked one developer for applications.	Monitor. Prioritize Applications: Assess and prioritize applications based on criticality and impact. Focus remediation efforts on the highest-risk applications first; Reallocate resources: Identify and allocate resources from less critical projects or consider temporary hires/contractors to bolster the team; implement phased rollout: Consider a phased rollout approach where non-critical features are delayed to allow for necessary remediation; Conduct regular progress reviews: Implement weekly check-ins to monitor remediation progress and adjust resources as needed.	Significant delays could occur	ABS tests are moving through Cycle 2 with one remaining system (FLAGS) on track for testing this month.
Open and Mitigating	07/29/25	12/19/25	Staffing/Resource Availa	Competing Responsibilities for Key Roles During Testing	Increasing	1 (Low/Low)	Key agency staff fulfilling Project Team roles (e.g., BAs, Liaisons, Workgroups) are also managing core business responsibilities, limiting availability for PALM testing and training.	Mitigate. Secure dedicated time allocations through resource management planning and escalate conflicts to Sponsor for prioritization.	UAT execution may be delayed or insufficient, leading to missed defects and rework.	UAT started. Executing testing plan.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DOEA Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	03/05/26		Training	Understanding the why	Increasing	9 (High/High)	As testing has progressed and users have navigated the system, we have identified gaps in general understanding of the agency's and state's business processes. While our sessions have been effective in helping bridge these knowledge gaps, the information is being absorbed gradually. Many of our users joined the agency within the current fiscal year and were initially shown only where to perform tasks, without	Targeting office hours for specific units covering the why and what as well as communicating with individuals on their understanding. Developing more clear and concise learning session agendas to cover the overall financial processes and how individual units affect others.	Increased likelihood of errors and strain on the knowledgeable staff resulting in reduction of overall readiness and confidence entering production	Added new risk based on current capabilities

							the broader context of why those tasks are completed in a particular way. As a result, we are now learning PALM while still becoming comfortable with FLAIR, all as we approach one of the busiest periods of the year. Although we anticipated some challenges, the extent of the knowledge gaps became more apparent through our testing discussions.			
Open and Mitigating	09/05/24		Conversion/Configuration	Data Clean Up	Increasing	4 (Medium/Medium)	While cleaning up existing data, making sure new data entered meets PALM requirements for conversion. This was Risk 4 from the archived Risk log.	Reviewing conversion inventory carefully to minimize post go-live clean up. Communicating new requirements to staff. Also working with contracted staff to aid in the clean up of data.	Inflated workload post go-live for Agency staff.	As conversions are more understood, agency is continuing to identify areas that require additional review.
Open and Monitoring	10/21/25		Training	Lack of information on PCard Works	Decreasing	4 (Medium/Medium)	This risk is to document the concern about the lack of information being shared by the PCard Works vendor regarding the coming changes due to Florida PALM. Other vendors (STMS and MFMP) have had meetings on a regular basis regarding the PALM Changes. The concern is that the Department won't be able to create training documents and test scripts for that system in a timely manner (i.e. the training documentation gets communicated to end users after go-live or a few weeks before go-live).	Regularly communicate with the PALM project on the status of the PCard Works.	The Department won't be able to create training documents and test scripts for that system in a timely manner (i.e. the training documentation gets communicated to end users after go-live or a few weeks before go-live).	Enterprise system has communicated but there are still plenty of unknowns and limited ability to create training documents.
Open and Mitigating	09/10/23		Business Process Change	Streamlining Manual Processes	Stable	2 (Low/Medium)	Agency has been dependent on manual and/or outdated processes prior to data entry currently in FLAIR. This is replacing Risk 1 from the archived Risk log.	Having internal cross-functional meetings to reduce dependencies on manual/physical processes.	Minimal impact - more work for the training team and staff to learn in tandem with new system.	Agency still reliant on manual processes, however continuing to modernize with digitization but not automation.

DOEA Issues									
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	01/16/24		Low - All impacts not listed	Staffing/Resource Availability	New Staff Knowledge	Filled vacancies and new hires are being trained but still have knowledge gaps. This increases the workload on existing staff	Continue training new hires, and continuing to update desk procedures to make sure they are up to date.	06/30/26	The knowledge is increasing but new staff is having to learn FLAIR and learn/test in PALM and enterprise systems.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DOH Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	04/22/25		Business Process Chang	The intention is for DFS to setup all of our organization codes and they have to route through their team for an approval process as well.	Stable	9 (High/High)	N/A	DOH will wait for the Organization codes to be set up by DFS	This will delay things for DOH	Risk reviewed with CORE team on 03/06/2032
Open and Monitoring	04/22/25		Business Process Chang	DOH currently uses multiple RDS and existing reports in preparation of Federal Grant Reporting. DOH is concerned how	Increasing	9 (High/High)	N/A	DOH is reviewing all the information available on Knowledge center to understand and implement changes to the best of ability. DOH resources are also reviewing current Grants reports start to end again.	DOH will have to continue working on remediation with the information they have.	Risk reviewed with CORE team on 03/06/2034

			the agency will generate Grant Reporting within PALM.							
Open and Monitoring	04/22/25		Business Process Change	PALM eliminating the IBI field for DOH	Stable	9 (High/High)	N/A	DOH is working on a work-around to address this issue.	DOH will have to continue working on remediation with the information they have.	Risk reviewed with CORE team on 03/06/2035
Open and Monitoring	04/22/25		Post Implementation	<p>With the implementation of PALM there will be many enterprise processes that are overseen by one agency that will impact all agencies.</p> <p>One example of this is DFS. DFS oversees areas such as Vendor Relations, Auditing, Financial Statements and New Account Codes. DFS will solely establish processes that will impact the successful implementation of PALM at the agency level based on these processes in relation to PALM being provided prior to implementation.</p> <p>Enterprise entities like AG/IG's offices or Agencies like DMS, DFS may present new processes / changes at or close to Go-Live or during Hypercare, that may present more work on the Agency. For example, auditing of payments and the increased number of returns and possibly hold up of payments all while transitioning and learning how to work within PALM. Back in 2019 when we went live with the Statewide Travel Management System (STMS), our trips were sampled for audit and returned by DFS increased from approximately 0-2 trips returned per month to 34 trips returned in April 2019 and 197 trips returned in May 2019. Once these trips were returned, we had to review the return and clear up the issue with the returns which meant coordinating with each traveler for each trip returned. This was very time consuming and a struggle to learn a new system and deal with the</p>	Stable	9 (High/High)	N/A	DOH will await the changes in policies and procedures	DOH will have to prepare for possible delays.	Risk reviewed with CORE team on 03/06/2037

			influx in sampled trips being returned.							
Open and Monitoring	04/22/25		Business Process Change	Payroll Reallocation Voucher Adjustment: • How will we complete payroll reallocations for a voucher that posted in FLAIR in November - December 2026 when PRP is to process in January 2027 using the PALM data? • How will FIRS or CHDs edit or correct any vouchers between November - December 2026 when we go to PALM January 2027? • If only the balances are rolling over to PALM, then what about the voucher details? This is specific for Payroll Reallocation, but this will be true for all Vouchers."	Stable	9 (High/High)	N/A	DOH is reviewing all the information available on Knowledge center to understand and implement changes to the best of ability.	DOH will have to continue working on remediation with the information they have.	Risk reviewed with CORE team on 03/06/2032
Open and Monitoring	04/22/25		Deployment/Cutover	Missing or Incomplete information - Clear understanding and instructions from the Project team to the agency to complete tasks. Time to process the ask of the task and have enough time to discuss and complete the task correctly.	Stable	9 (High/High)	N/A	DOH is in constant touch with the Readiness Coordinator to understand / clarify instructions	DOH PM will be in touch with the PALM Project Readiness Coordinator	Risk reviewed with CORE team on 03/06/2032
Open and Monitoring	10/22/25		Conversion/Configuration	Cross Agency: Uncertainty around Data Warehouse Data and Access may cause a delay in agency planning or rework.	Increasing	9 (High/High)	The answer to this risk affects our designs for agency data structure.	Check documents released by the PALM Team to confirm assumptions or resolve end user needs by creating reports in FDW	The longer that this design is delayed the more likely that rework will be required at the agency level to meet historical data needs for Agency Business Systems and Users, which will potentially put the Go-Live Date at risk.	Risk reviewed with CORE team on 03/06/2034
Open and Monitoring	02/21/26		Interface	MFT - Team is having issues getting access to Cycle 3 files. We have not received files in a timely manner. We are having this issue since Feb 21, 2026	Increasing	9 (High/High)	PALM upgraded MFT and this changed the security permissions, taking away "Delete" permission from the file share location. This issue caused Cloverleaf to fail. PALM and DOH team are working together to resolve this issue for the last 3 weeks.	We have no mitigation for this.	Work with PALM team to get files in a timely fashion	This is a new risk
Open and Monitoring	03/06/26		User Acceptance Testing	SME's cannot test all functionality. Few controls are missing or not available to SME's. SME's are learning in limited scope - not understanding the complete end to end process.	Increasing	9 (High/High)	This was discovered during UAT	SME's will continue to participate and understand and ask questions as much as they can.	Work with PALM team to get the full picture.	This is a new risk, added in the CORE meeting on 03/06/2026
Open and Monitoring	03/06/26		User Acceptance Testing	Many big impactful changes are being made without understanding the complete process within the system.	Increasing	9 (High/High)	This was discovered during UAT	SME's will continue to participate and understand and ask questions as much as they can.	Work with PALM team to get the full picture.	This is a new risk, added in the CORE meeting on 03/06/2027
Open and Monitoring	03/06/26		User Acceptance Testing	Limited number of SMEs at UAT	Stable	9 (High/High)	Only 3 SMEs are allowed by PALM to attend UAT sessions	SME's will continue to participate and understand and ask questions as much as they can.	3 SMEs that go to PALM UAT will work with rest of the SMEs	This is a new risk, added in the CORE meeting on 03/06/2028
Open and Monitoring	03/06/26		User Acceptance Testing	Auditors do not accept reports that do not	Increasing	9 (High/High)	Auditors have rejected reports that are not produced from source	We will review the DW / BI reports	Work with PALM team to add reports needed by auditors	This is a new risk, added in the CORE meeting on 03/06/2029

				come out of the source system. Current RDS reports come out of FLAIR (source system)			system.			
Open and Monitoring	03/06/26		User Acceptance Testing	Configurations and Configurations are not coordinated with source system teams and PALM Project team. Directions are given adhoc. Smartsheets throw errors and DOH has experienced that batch jobs running adhoc as the team is updating the configurations.	Increasing	9 (High/High)	PM has informed RC	We are working very hard on getting the	DOH team will continue to work on this	This is a new risk, added in the CORE meeting on 03/06/2030
Open and Monitoring	04/22/25		Training	Lack of Training: The training needs to be specific to the State of Florida implementation, including specific Chart of Accounts ChartField values as well as other configured elements. In addition, there also needs to be technical related training for interfacing methods, data access for the IW, and remediation techniques	Increasing	6 (High/Medium)	N/A	DOH is working on creating Foundational trainings and involved in UAT Pre-requisite meetings with DFS team.	DOH will have to have expedite training.	Risk reviewed with CORE team on 03/06/2033
Open and Monitoring	04/22/25		Training	The training timeframe given will not be enough time for us to create and launch agency specific trainings. End users won't have time to take them before go live either.	Stable	6 (High/Medium)	N/A	DOH training team is currently working on metrics to create a UAT plan to manage trainings for all PALM users.	DOH will have to have expedite training.	Risk reviewed with CORE team on 03/06/2036
Open and Monitoring	10/22/25		Business Process Change	Cross Agency: Uncertainty Around Batch Schedule during E2E Interface Testing, may create challenge for agency ability to perform E2E Testing	Decreasing	6 (High/Medium)	We can't know when new information is going to be coming from PALM to schedule processes to populate Agency Business Systems with up to date financial information.	Worked closely with the PALM team to coordinate and resolve issues that arise during Interface Testing.	The later that this is delayed the more likely that there will be impacts at the agency level that will require rework to meet the PALM Batch Schedule and potentially put the Go-Live Date at risk at the agency level.	Risk reviewed with CORE team on 03/06/2033
Open and Monitoring	10/22/25		Conversion/Configuration	Cross Agency: Limited use of special characters may lead to rework/ additional work at agencies	Stable	4 (Medium/Medium)	The project could have automated the removal of special characters. Configurations and conversions were updated by technical resources.	Configurations and conversions Smartsheets were updated by technical resources.	Rework/additional work will be needed	Continues to be a risk.
Open and Monitoring	04/22/25		Business Process Change	Agency is unable to determine how the Trial Balance, Schedule of Allotment Balances, year-end closing processes and Schedule 1 processes will be completed with the Account field which combines the current FLAIR General Ledger Code and Object Code.	Stable	3 (Low/High)	N/A	DOH is reviewing all the information available on Knowledge center to understand and implement changes to the best of ability.	DOH will have to continue working on remediation with the information they have.	SMEs are still testing and confirming critical processes.
Open and Monitoring	09/09/25		Agency Business System	Timely completion of AxiomPro system remediation.	Stable	2 (Low/Medium)	AxiomPro is a 3rd party managed Agency business system, which is used by at least 9 different agencies.	DOH is working with Image API to identify the requirements and the final report.	DOH will work with Image API on an alternate solution.	Risk reviewed with CORE team on 03/06/2032
Open and Monitoring	10/22/25		Agency Business System	Cross Agency: Timely completion of AxiomPro	Stable	2 (Low/Medium)	AxiomPro is a 3rd party managed Agency business system, which is used by at least 9	1. Vendor to refer FL PALM knowledge center to plan & design the system remediation	ABS remediation of several agencies will be impacted. Some agency may have manual	Risk reviewed with CORE team on 03/06/2033

				system remediation			different agencies.	2. Vendor to perform unit testing with the information provided by the FL PALM team. 3. FL PALM Team to make sizable and reliable sample/ test files available. 4. Vendor to perform exhaustive Technical Testing of the system integration (Cycle 2 - Testing) and complete defect fixes. 5. Agency to monitor the progress of the system remediation and provide support/ consultations.	workaround however this may impact go-live readiness for a few agencies.	
Open and Monitoring	04/22/25		Agency Business System	Awaiting confirmation and finalized configurations, conversions, and interfaces so DOH can calculate work effort on remediation and develop project timelines for completion of necessary tasks.	Decreasing	1 (Low/Low)	N/A	We are creating DOH's FDW	DOH will have to continue working on remediation.	DOH is updating as many deltas in the configuration and conversion efforts
Open and Monitoring	04/22/25		Training	Payroll Design Sessions are scheduled to complete / finalize by the PALM project in July-October 2024 (Segment IV). Agencies may not have enough time to understand and implement change of processes, requirements, interface files.	Decreasing	1 (Low/Low)	N/A	DOH is reading all the available information on knowledge center to understand Payroll changes.	DOH will have to continue working on remediation with the information they have.	Awaiting testing and confirmation from People First.

DOH Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	05/01/25		Low - All impacts not listed	Agency Business System	Changes to PALM website, PALM tasks, and the Interface files: Our agency is taking a lot of effort to educate and train technical and non-technical staff. Constant changes disrupts processes and it takes time to find the same information and retrain staff. For e.g., DOH staff got used to receiving emails for Interface and Report updates, now we have 2 or 3 resources who will check the Change Log every so often	DOH staff got used to receiving emails for Interface and Report updates, now we have 2 or 3 resources who will check the Change Log every so often	Resources will check PALM site and Change Log every week	06/30/26	We are using the bell icon and following all the PALM pages online

DOH Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
People Processes Technology Data	PALM will provide solution and remediation of enterprise applications i.e., STMS, PeopleFirst, etc.	Logged	05/01/25	DOH Finance and Accounting	No new comments
People Processes Technology Data	PALM will maintain the project "On schedule"	Logged	05/01/25	DOH PALM Project team	No new comments
People Processes Technology Data	Enterprise entities like AG/IG's office, or Agencies like DMS, DFS will not add changes or new processes at Go-Live or during PALM HyperCare period	Logged	05/01/25	DOH Finance and Accounting	No new comments

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DOL Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	06/02/25		Business Process Change	Delay in monthly transfer to the EETF. This occurs on the 20th of each month.	Increasing	9 (High/High)	A&A will schedule the close each month. It has been suggested that close will take place after interest has been received each month. Currently, interest is not available until after the 20th which will put us behind in our monthly transfers.	Discuss with Florida PALM closer to go-live to develop resolution.	DOE will not receive monthly transfer.	Closer to go-live; DOL will require discussion with Florida PALM and may need to involve A&A to develop a workaround which will avoid a lapse in the transfer process.
Open and Monitoring	05/01/24		Business Process Change	The new Claims and Payment System (CAPS) may delay training efforts in Florida PALM	Stable	4 (Medium/Medium)	The implementation of Lottery's new Claim and Payment System (CAPS) is tentatively scheduled to go-live during FY 26-27. The implementation may impact Florida PALM training activities. The new CAPS will be replacing the current system known as Fortune.	Lottery will develop a proactive strategy for the upcoming launch of the new CAPS; will focus on early communication, training for Florida PALM activities, continuous monitoring, and establish contingency plans to address any potential adjustments required in the supplied data.	There may be resource constraints which may result in scheduling delays and project slippage.	CAP still remains a risk for DOL; despite no significant updates or changes.
Open and Mitigating	05/26/25		Business Process Change	Fiscal year-end agency audits will overlap with Florida PALM go-live	Stable	4 (Medium/Medium)	New go-live date will conflict with the audit schedule and may impact go-live and UAT.	Lottery will develop a mitigation and communication plan to ensure successful end of year close-out activities and go-live transition.	There may be resource constraints which may result in delays.	Since go-live is on track for Jan. 2027; aligns with audit deadline. As a result, DOL is concerned there may be limited resources.

DOL Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	02/24/26		High - Impacts the ability of the agency to meet deadlines or milestones	User Acceptance Testing	Change Analysis Tool - incorrect reporting	The Change Analysis Tool generated user story ID's for activities that are not utilized or performed by DOL. The UAT execution monthly progress report is reflecting inaccurate tracking data. This may led to misrepresentation of testing progress, incorrect performance metrics, and potential reporting discrepancies to project stakeholders	Project controls how the change analysis tool feeds the monthly progress report	02/27/26	Inaccurate data reflected in the UAT Monthly Execution Progress Report

DOL Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026

RW Task Timeliness

RW Task Completeness

Direct Impact Task Timeliness

Direct Impact Task Timeliness:

Score = 95.42%

- Submitted On Time = 39
- Submitted Late = 9
- Pending Submission = 0

Other Task Timeliness

Other Task Timeliness:

Score = 93.08%

- Submitted On Time = 79
- Submitted Late = 12
- Pending Submission = 0

Direct Impact Task Completeness

Direct Task Completeness:

Score = 87.87%

- Submitted Complete = 33
- Submitted Incomplete = 3
- Completed After Submission = 11

Other Task Completeness

Other Task Completeness:

Score = 92.54%

- Submitted Complete = 50
- Submitted Incomplete = 0
- Completed After Submission = 13

The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

The Change Champion Network composition reflects the completeness of your CCN makeup.

- Unique Filled Role = 15
- Duplicate Filled Role = 0
- Vacant Role = 0

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

DOR Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	06/28/24		User Acceptance Testing	DOR - PALM and ABS UAT	Stable	2 (Medium/Low)	All enterprise systems will be remediated and operating with PALM COA data in the test environment used for UAT so that agency business systems may be fully validated by processing actual data generated by normal business processes in the test environment. Originally filed by Shannon Segers	Unable to mitigate at agency level; must be mitigated by the enterprise.	Work with SMEs, PALM Projects and DOR remediation Teams	monitoring, awaiting UAT access for enterprise systems
Open and Monitoring	12/04/24		Business Process Change	PALM Reporting and Datawarehouse	Stable	2 (Medium/Low)	With Agency Reporting Systems like RABBIT and FICAS retiring away, DOR will solely rely on PALM Reports and the proposed PALM	Unable to mitigate at agency level; must be mitigated by the enterprise.	With no other ABS planned for RABBIT and reporting systems, DOR will explore datawarehouse capability for tis	DW/BI currently in UAT, no author role yet.

							Datwarehouse for all its reporting needs. Until the PALM Data warehouse is available, DOR is not sure whether it can meet its reporting needs. PALM Datwarehouse is proposed to be available in June 2025.		reporting needs	
Open and Monitoring	10/17/23		Staffing/Resource Availa	GTA - EFile and Pay	Stable	1 (Low/Low)	The GTA E-services project may be conducted at the same time agency business system remediation is conducted. Originally filed by Business Technology Office	Staff augmentation resources to support Florida PALM activities.	Need to ensure PALM resources are not diverted to EFile & Pay until SUNTAX remediation is completed.	Efile to finish by June 2026
Open and Monitoring	09/24/25		Interface	Interface testing delays and file structure, file format/ layout, requirements changes	Stable	1 (Low/Low)	As ABS testing with PALM continues, interface file changes in structure and requirements can set remediation progress back and cause agency development efforts rework. The response on interface testing errors is uncertain, unclear and no ETA are available to the agency.	The Project should provide ample advanced notice of any pending or possible interface file changes. If an SIR is filed due to errors on an interface, agencies should be notified with an expected timeline to resolve the issues.	ABS remediation readiness hampered, delayed, and perhaps stalled.	Cycle 2 testing took longer than expected. Still waiting on API002 refund file to be cleared. Awaiting Bank files for Cycle 3 testing.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

DVA Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	05/14/25		Staffing/Resource Avail	Staffing shortfalls	Increasing	6 (Medium/High)	FDVA has one person performing most functions and must keep PALM tasks on track while simultaneously performing day-to-day required tasks. Also, staff turnover is an issue as some of these personnel are retiring or terminating employment due to increased workload. Additionally,	Working to hire a new vendor/consultant to assist with key tasks as the current vendor was terminated for work performance.	Tasks will not be accomplished in a timely manner, if at all.	New PALM Vendor is on board and working out well. If we are able to keep them, at a minimum, six months beyond start up, our Agency should be able to function fine.

							major cyclic operations and events like year-end closeout and hurricane season becomes priority for these singularly manned positions.			
Open and Monitoring	05/14/25		Staffing/Resource Avail	Contracting and Procurement Funding	Stable	6 (High/Medium)	Our Agency is unique and may require contractor support to meet implementation requirements and ensure our processes and procedures align to meet State, federal and local requirements, and that it supports the transition of staff. It could impact the Agencies ability to meet deliverables. Processes that don't align with PALM will have to be retooled to do so. Technology expertise may not be resident to perform retooling requirements.	Requesting that current funding be reverted and reallocated to support getting the contractual support needed.	PALM and Agency required processes won't synchronize leading to the Agency having to do manual processes.	Contract staffing on board and continual funding is needed to complete tasks required prior to and through integration.
Open and Monitoring	05/14/25		Interface	Technology - IT Staffing	Stable	4 (Medium/Medium)	Existing IT Staffing has limited knowledge of PALM system and will take time to get trained up, especially given their existing Agency requirements. Agency requested additional personnel through the LBR process but positions to date, have not been approved.	Agency requested additional IT personnel through the LBR process, but these positions were not approved by the legislature. The next legislative session is another year away and the PALM implementation will have begun	Agency will not be able to meet IT requirements timely, if at all, if IT personnel can't support.	IT Personnel are currently supporting this task without issue. However, personnel shortages could impact long term success of this project.
Open and Monitoring	05/14/25		Interface	FDVA FLAIR and PALM Data Interface	Decreasing	4 (Medium/Medium)	FLAIR and Florida PALM data will be different in its input and likely representation, which may cause challenges when performing data analysis as well as input errors.	Staff will incur extra time and productivity lag in trying to learn, crosswalk and translate data outputs. Hopefully training and SOPs will minimize this issue. SOP being developed and revised, and training plan in place to mitigate this issue.	Data errors or data lag in inputting data.	Staff continues to update SOPs and undergo UAT Training and Testing to ensure data is processed appropriately in the system and reflects the outputs we need to conduct our administrative financial processes.
Open and Monitoring	02/27/26		User Acceptance Testing	UAT Testing and Data Capture	Stable	4 (Medium/Medium)	UAT of data stories has become more complicated than expected. Current stories which reflect day-to-day operations is not yielding the full scope of work being completed.	UAT Testing and data capture are proceeding as planned. Alignment between the live spreadsheet and the state-provided User Story Smartsheet requires structured reconciliation to ensure dashboard reporting reflects real-time progress. The FDVA PALM Team has implemented a process to ensure full accuracy and compliance by the March reporting deadline.	Data errors and inaccurate reporting of progress.	Agency continues to work through complicated data capture input process to ensure data reflects our real-time progress, and that the data is accurate. Data is not there yet but positive progress is being made.

DVA Issues									
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	04/22/25		Low - All impacts not listed	Staffing/Resource Avail	Human Resources Shortfall	VACO Consultants were hired to assist Agency with PALM Transition 9 months ago, but had to fire them due to performance issues on 15 April 2025.	Secure a new contractor from State Term Contract listing and bring them onboard NLT 15 May 2025. A new vendor contract is being worked and we anticipate the new contractor being on board on 1 August 2025.	08/01/25	New contractor is on board and productive. If we are able to keep them until 6 months following the implementation date the Agency should be able to sustain itself under the new PALM system.

DVA Assumptions					
Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
People Processes Technology Data	Funding will be approved/provided by the Florida Legislature to secure personnel or contract vendors to support the Agencies full PALM Transition.	Logged	09/18/23	FDVA and the overall Statewide PALM project implementation/all connected Agency process converted to PALM.	Legislative budget still not approved so no status on funding is available.
People Processes Technology Data	Sufficient contract personnel will be available to support the Agency as it undergoes its PALM integration.	Logged	05/14/25	FDVA PALM required processes (Admin, Fiscal, and Finance and Accounting functions)	If we are able to keep our contract personnel up to six months beyond the start-up date, we should be able to function effectively under the new system.
People	FDVA Executive Leadership, including project Sponsor, will support the project by providing resources, access to systems and by supporting the organizational change management strategy created by the project development team.	Logged	09/18/23	Agency Administrative functions (Fiscal and Finance & Accounting)	Agency leadership will resource the project as best possible within the funding constraints it currently has.

EOG Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	10/31/23		Staffing/Resource Availal	Limited Staff	Stable	9 (High/High)	The EOG has limited staff and technical/training resources.	EOG will monitor transactions and will use UAT for training. It should be noted that on boarding temporary additional staff may not be the most effective method to handle additional workload, as the same individuals that are participating in UAT, training, and FLAIR work are also the same individuals that would be training onboarded new staff. Onboarding temporary new staff may place a greater work strain on current staff than none at all.	Efficiency and accuracy of transactions will be hindered.	No revision.

Open and Monitoring	02/17/25		Staffing/Resource Avail Limited Staff - Timing	Increasing	9 (High/High)	There are/will be many competing priorities for staff working on this project. Staff on the project serve in more than one capacity and time may not be fully dedicated to accounting and FL PALM work. Some of the FL PALM tasks coincide with some of the busiest times for financial/budget/accounting agency resources. The training period of July - October timeframe is the busiest of the fiscal year with most duties falling to a very limited number of individuals. The cutover and go-live for FL PALM: November, 2026- early 2027 is an elected official transition period. This timeframe affects the workload of all Administrative Services (PALM end user) staff. The cutover period may affect abilities to transact and to update payroll and personnel changes timely during the transition period December 2026/January 2027 time period.	The EOG will monitor staff workload, and will utilize UAT as a training period to be ready to support the incoming administration. The EOG will reach out to DFS (and PALM) and other enterprise agencies for assistance should we not be able to properly assist the incoming administration on important matters necessitating timely input and processing that cannot be accomplished in systems closed due to cutover.	Efficiency, pace, and timeliness of transactions will be hindered. Timely processing of payroll and personnel revisions and other financial transactions may not be accomplished during cutover.	No revision.
Open and Monitoring	12/31/24		Business Process Change	Stable	9 (High/High)	The Division of Emergency Management is physically and functionally separate from the Executive Office; however, the two entities share the same OLO/business unit. Risks exist surrounding data management, reporting, payments, transaction differentiation, and incorrect updates based on assumptions of shared/not shared data in DEM business systems.	The EOG and DEM have met with FL PALM to outline concerns and have requested additional meetings regarding pending inquiries. It was determined that many of the solutions initially discussed will not be able to be effectively implemented. We will continue to monitor and meet with the PALM team as the final design takes shape to determine the best methodologies for the differentiation of data. System configuration will be tested during UAT to determine what will be policy or procedure driven changes vs. what will require additional PALM knowledge or staff resources. As of current UAT status, EOG is unable to filter approval or other screens by budget entity, making it difficult to remove DEM from certain PALM views forcing use of various reports rather than workcenters.	Incorrect, inaccurate reporting; combined transactions and payments that will have to be re-vouchered; incorrect personnel inputting or approving transactions not related to the correct individual's roles/responsibilities	Updates based on UAT.
Open and Monitoring	08/23/24		Business Process Change	Stable	6 (Medium/High)	The Division of Emergency Management is physically and functionally separate from the Executive Office; however, the two entities share the same OLO/business unit. Detailed risk outlined in Risk Line 007 relates to payment management. In reviewing Segment IV -Inter-Unit transactions, we noted that all receiving transactions may be rolled together with no ability to discern 'ownership' of the transaction since only OLO/Business Unit is required. Sent suggestions to the PALM team requesting additional fields be mandatory. Also requested that search menus be available on each workcenter screen to filter out unneeded transactions to only those relevant to DEM or EOG.	The EOG has reported the issue and made suggestions to FL PALM as potential solutions. EOG will document errors (should they occur) to the project during UAT.	Incorrect transfers will be incorrectly approved or will not be approved, since staff will not know to whom the transfer belongs.	No revision.
Open and Monitoring	06/06/24		Training	Stable	6 (Medium/High)	Nomenclature is changing in from FLAIR terms to PALM terms. Some fields in PALM are named the same as in FLAIR but with different meanings/uses. Examples are category, asset location, etc. This will primarily be a	The EOG will work to highlight terminology/naming differences and provide documents to mitigate risk of confusion. Users are participating in prerequisite overview training.	Incorrect fields or incomplete transactions posted due to misinterpretation.	No revision.

							will primary EOG training challenge; however, there exists the risk that procedures, guidelines, data, queries, etc will be misinterpreted or not updated properly.			
Open and Monitoring	10/31/23		Business Process Change	Limited Staff - Roles and Workflow	Stable	6 (High/Medium)	FL PALM transactions are based on roles with an approval workflow. Because of EOG's limited staff, transactions requiring approvals will likely bottleneck with 1 or possibly 2 staff members. There are not enough appropriate staff available to assign unique backup processors and approvers.	The EOG has discussed this risk with FL PALM and communicated its inability to have role backups and the risk of transaction approval bottlenecks with so few individuals available to work on any given process. There exists the possibility for some transactions to utilize a spreadsheet upload of transactions rather than individual transaction approvals. DFS policies will most likely still require the spreadsheet upload to be reviewed and approved prior to upload. While this may mitigate some risks, the transactions will still bottleneck to one or two employees knowledgeable in the specific transactions. EOG will work with DFS to request roles that are currently unallowable due to separation of duty prohibitions.	Efficiency, pace, and timeliness of transactions will be hindered.	No revision.
Open and Monitoring	06/06/24		Business Process Change	DEM - Separation Warrant Management	Stable	6 (High/Medium)	The Division of Emergency Management is physically and functionally separate from the Executive Office; however, the two entities share the same OLO/business unit. Detailed risk outline in Risk Line 007 relates to payment management. In reviewing the hardcopy draft of new warrants, if the wrong payment handling code is selected by DEM, EOG will not be able to tell who the warrant belongs to since BE is not printed on the warrant.	The EOG and DEM have met with FL PALM to outline concerns. We will reach out to the PALM team during configuration to determine at what level certain codes can be defaulted to ensure this does not happen. As long as the warrants do not combine, we will be able to research to accommodate. If warrants combine, the entire warrant may need to be deleted and invoices re-vouchered. Noted during review of configuration values worksheet that DEM has been assigned 2 prnt handling codes. Also noted that ORIGIN will not work for differentiation since Works, MFMP, STMS are origins which both EOG and DEM use. We will review reports during early phases of UAT to seek a solution, since end to end UAT will not be available during the early testing periods. As of the latest UAT session, PALM is looking into the ability to make the 'separate payments' checkbox a defaulted value to avoid accidental combining of payments to shared supplier/vendors.	If warrants combine, the entire warrant will need to be deleted and invoices re-vouchers. This is an efficiency and effectiveness issue that will need to be addressed.	Updates based on UAT.
Open and Monitoring	10/31/23		Training	Limited Staff - Processing Changes	Stable	2 (Medium/Low)	Due to limited staff and staff turnover, there exists a risk that relevant or important steps in a new or revised task will be missed or not completed.	The EOG will monitor staff workload and will utilize UAT as a training period for all staff. EOG will monitor reports and instructional/policy documents provided by the Department of Financial Services and the FL PALM team.	Inaccurate or incomplete data/reports may result (depending on the requirement).	No revision.
Open and Monitoring	10/31/23		Training	Statewide System Revisions/	Stable	2 (Medium/Low)	With the revision of interfaces for all Enterprise business systems, such as Works, STMS, and MFMP, and staff learning the updates to all new systems with FL PALM, it may be more difficult to pinpoint the source of errors in UAT and early implementation transaction processing.	EOG will monitor all tasks and attempt to report issues to all relevant parties.	Transactions will be incorrectly processed (or not processed timely) - inefficiencies in issue resolution.	No revision.
Open and Monitoring	10/31/23		Training	Attachments	Stable	1 (Low/Low)	Risks relate to attachments of documents in FL PALM. Staff will need training on what can and should be attached or redacted prior to attaching in FL PALM.	The EOG will outline as many processes as possible to mitigate risk of incorrectly attached documents, and will ensure that all staff attend training and have access to PALM resources when appropriate.	Incorrect/improper record keeping of documentation.	No revision.

EOG Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026

EOG Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
People Processes Technology Data	EOG assumes that FL PALM will provide adequate in-person training and will assist in workflows where there is insufficient staff for approvals.	Logged	04/18/25	Administrative Services	No revision necessary.
People Processes Technology Data	EOG assumes that while processor roles cannot approve his/her own transactions, the processor can also be assigned an approver role, so that in all cases, staff can function as backup processors or approvers.	Logged	04/18/25	Administrative Services	No revision necessary.
People Processes Technology Data	EOG assumes that ALL transactions and functions will be available for User Acceptance Testing to allow for full learning opportunities will prior to system go-live.	Logged	04/18/25	Administrative Services	No revision necessary.
People Processes Technology Data	EOG assumes that during cutover, if statewide HRM and FLAIR/PYRL is not available during cutover, DFS will still be able to provide necessary adjustments for payroll when timeliness is critical.	Logged	10/29/25	Administrative Services	No revision necessary.
People Processes Technology Data	EOG assume that during cutover, if purchasing/procure to pay systems are unavailable, that DFS will provide mechanism for payment of necessary goods and services to allow continuance of agency critical operations.	Logged	01/13/26	Administrative Services	No revision necessary.

Agency Sponsor Confirmation

As Agency Sponsor, I understand my role and responsibility for monitoring and reporting on my agency's readiness status. I have reviewed and confirmed the accuracy of my agency's readiness status as reflected in this dashboard.

RW Task Timeliness

RW Task Completeness

Direct Impact Task Timeliness

Direct Impact Task Timeliness:

Score = 99.55%

- Submitted On Time = 42
- Submitted Late = 2
- Pending Submission = 0

Other Task Timeliness

Other Task Timeliness:

Score = 96.48%

- Submitted On Time = 85
- Submitted Late = 6
- Pending Submission = 0

Direct Impact Task Completeness

Direct Task Completeness:

Score = 99.30%

- Submitted Complete = 40
- Submitted Incomplete = 0
- Completed After Submission = 3

Other Task Completeness

Other Task Completeness:

Score = 98.41%

- Submitted Complete = 62
- Submitted Incomplete = 0
- Completed After Submission = 1

The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

The Change Champion Network composition reflects the completeness of your CCN makeup.

- Unique Filled Role = 14
- Duplicate Filled Role = 0
- Vacant Role = 0

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

FCOR Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	12/04/24		Agency Business System	Unavailability of existing BARS reporting infrastructure will impact agency ability to generate user reports based on legacy/historical data.	Increasing	6 (High/Medium)	Archived Risk Id: 012/009	Risk Management Strategy : Mitigate 1. Work with FDC OIT on archival of BARS reporting solution, including database, UI and any platform components. 2. Archive BARS reporting solution, as the reporting tool for the legacy (FLAIR) information. Target Closure Date: 3/31/2027	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Agency continues development of CAIRS reporting solution to replace BARS. Currently archival of BARS is planned in March/2027, based on the PALM go-live in January/2027.

Open and Monitoring	12/04/24		User Acceptance Testing	The Testing phases in the Florida PALM project plan assumes right-at-first-time, therefore may not allow sufficient time for defect management and retest of fixes.	Stable	6 (High/Medium)	Archived Risk Id: 014/011	Risk Mitigation Strategy: Reduction 1. Prepare the UAT testing team thoroughly, w.r.to Business processes, Configurations, User roles, PALM trainings, Test scripts. 2. Establish a communication channel with Florida PALM to get quick turnaround on the defect management. 3. Identify across-agency best practices for UAT planning and execution. 4. Continue to touch base with the Florida PALM team, and assess the impact due to the risk. Target Closure Date: 8/31/2026	Fail to achieve the mandatory success measure of User Acceptance Testing for PALM Go-Live.	3/3/2026: UAT Testing has been started in February/2026. ~ 15% of the Test cases are failing leading to Bugs. Currently working with the FL PALM team on defect fixes and reviewing the Known Issues list. Requested better clarity/transparency from FL PALM team on the schedule for the fixes for the Bugs.
Open and Mitigating	12/04/24		Business Process Change	Inadequate planning to identify specific process gaps and remediation planning may impact agency user readiness/ adoption.	Stable	6 (High/Medium)	Archived Risk Id: 015/012	Risk Mitigation Strategy: Mitigate Action: Develop and Launch Pre-PALM Training Closing Activities. Closing Activity 1: Process Gap Analysis Closing Activity 2: Process Gap Remediation Target Closure Date: 06/30/2026	Fail to achieve the mandatory success measure Business Process readiness for PALM Go-Live.	3/3/2026: A Process Impact Analysis Proposal is in work to be presented to the business on 03/10/2026 for approval. Results of the analysis will be used to inform remediation planning concerning training materials.
Open and Mitigating	12/04/24		Staffing/Resource Availability	Unavailability of IT resources with required skillset may impact timely remediations of agency business systems.	Increasing	6 (High/Medium)	Archived Risk Id: 010/007	Risk Management Strategy: Mitigate 1. Identify the High level solution for Agency Business System (ABS) remediation. 2. Finalize the Architectural design and technology stack identification. 3. Conclude the resources/ roles required for ABS remediation. 4. Onboard the required resources, complete the IT development activities to ensure readiness for E2E interface testing/ UAT Target Closure Date: 6/30/2026	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Identified the enhancement list for the PALM integration solution and continued working with the OIT leadership team to leverage additional bandwidth with ADF skillset.
Open and Mitigating	12/04/24		Staffing/Resource Availability	Competing priorities for SMEs leading to limited bandwidth availability, may impact timely completion and quality of FDC/ FCOR PALM project deliverables, including data cleanup, configurations, process mapping & remediation, Trainings, agency systems remediations, and UAT preparation & execution.	Stable	6 (High/Medium)	Archived Risk Id: 017/014	Risk Mitigation Strategy: Mitigate 1. Identify the areas where it needs the SMEs bandwidth. 2. Come out with a plan to support FDC PALM project with required SMEs bandwidth. Target Closure Date: 12/31/2026	Fail to achieve the mandatory success measure User Acceptance Testing, User training and People readiness for PALM Go-Live.	3/5/2026: Agency is currently able to manage the increased volume of activities with the existing resources by prioritizing their workplan.
Open and Mitigating	06/25/25		Deployment/Cutover	Lack of clear guidelines from the Florida PALM Program on preparing for Cutover activities and setting up Operations support for the agencies.	Stable	6 (High/Medium)	Newly added, on 6/25/2025	Risk Management Strategy: Mitigate 1. Identify the agency specific cutover activities for the agency systems and readiness activities to prepare for operations support. 2. Add the agency specific cutover activities and operations support preparation to agency plan. 3. Continue to progress on the agency specific plan and ongoing monitoring Target Closure Date: 11/30/2026	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Awaiting more information on cutover planning to be shared by the FL PALM team.
Open and Monitoring	02/06/26		Deployment/Cutover	Engagement with 'FL PALM Testing vendor to support agencies' during the same period when agency is fully-engaged in UAT may impact agency progress and timely readiness for go-live.	Stable	6 (High/Medium)	New Risk - Opened on 2/6/2026	Risk Management Strategy : Reduce. 1. Identify suitable time for the agency for this engagement, considering minimal impact to the agency from schedule and efforts perspective. 2. 'FL PALM Testing vendor to support agencies' to propose the improvements and the implementation plan. 3. Agency leadership to determine the criticality	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/5/2026: Initial discussion with the vendor identified Test Automation of agency business system is not viable and Agency already using industry standard Test case template. Continue to engage on the standardization opportunities for UAT testing of agency systems.

								<p>Review the severity and urgency of implementing these proposed improvements, considering the impact to scope/ schedule/ cost impact to the agency.</p> <p>4. Agency PALM project team to plan and implement the improvements, and conduct ongoing review with the agency leadership.</p> <p>Target Closure Date: 12/31/2026</p>		
Open and Mitigating	12/04/24		Training	Unavailability of Florida PALM system training and Demo sessions early in the project phase may result in insufficient time given to agency user readiness/ adoption.	Stable	4 (Medium/Medium)	Archived Risk Id: 013/010	<p>Risk Management Strategy: Reduction</p> <p>Action: Develop and Launch to PALM Superusers the pre] PALM 4-Part training series.</p> <p>Training 1.1: Orientation to PALM Business Process Groups.</p> <p>Training 1.2: Orientation to PALM Modules.</p> <p>Training 1.3: Orientation to PALM Business Process Models.</p> <p>Training 1.4: Orientation to PALM Roles & Workflows.</p> <p>Target Closure Date: 12/31/2026</p>	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Demo's (for topics that have videos available in the Knowledge Center) have been scheduled for all PALM UAT testers. The People Readiness Lead will continue to monitor the KC and will add more demo sessions as the material is added. Additional demo sessions are being planned for all non-testers to allow a greater portion of the population to have access to the materials. PALM Training Sessions are planned in October.
Open and Monitoring	12/04/24		Role Mapping	Insufficient information on access security model and planning of changes to current user roles/responsibilities may impact agency user readiness/ adoption.	Stable	4 (Medium/Medium)	Archived Risk Id: 016/013	<p>Risk Mitigation Strategy: Mitigate</p> <p>1. Read & understand the access security model and role definition, published by FL PALM.</p> <p>2. Map the current business teams to the appropriate user role.</p> <p>3. Identify the users for whom role/ responsibility are changed.</p> <p>4. Provide required support to the users to adapt to their changed role.</p> <p>Target Closure Date: 12/30/2026</p>	Fail to achieve the mandatory success measure User Acceptance Testing and Go-Live Readiness for PALM Go-Live.	3/5/2026: Role mapping is currently being maintained as we learn what is required for all processes as we progress through UAT and as updates are received from FL PALM directly.
Open and Mitigating	06/25/25		Deployment/Cutover	Several readiness deliverables for agencies have been removed from the Florida PALM Program plan.	Decreasing	4 (Medium/Medium)	Newly added, on 6/25/2025	<p>Risk Management Strategy: Mitigate</p> <p>1. Analysis of the removed readiness workplan tasks which are still applicable to the agencies.</p> <p>2. Agencies to add the applicable deliverables as part of agency specific activities.</p> <p>3. Continue to progress these agency specific deliverables and ongoing monitoring.</p> <p>Target Closure Date: 6/30/2026</p>	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Revised readiness workplan was published in January/2026, with additional deliverables due to extension of the project. No major impact to the project, agency project change request has been approved to re-baseline the project schedule.

FCOR Issues									
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	01/30/25		Critical - Impacts the abil	Agency Business System	Unavailability of PALM Data Warehouse and technical specifications (File format, Data dictionary) affecting the remediation activities for the agency based system.	Archived Issue Id: 007/006	<p>1. Setup new database, to remediate 12 agency business systems/ tools, depends on the PALM Data Warehouse for data.</p> <p>2. Design the new database, and subsequently plan for the user reporting solution (CAIRS - Corrections Accounting Information Resource System) with appropriate reports.</p> <p>3. Remediate Agency based systems to integration to CAIRS and internal functional testing</p>	06/30/26	3/5/2026: Agency completed 98% of the Technical Interface Testing. Remaining 1 is planned to be completed by March, which was impacted by the delayed publish of the API031 interface file. Received 65% of the interface files so far for the Cycle 3 - End-to-end Interface Testing.
Open	03/25/25		Critical - Impacts the abil	Agency Business System	Continued changes to the interface specifications by FL PALM due to ongoing system development, may require FDC PALM project team to rework on the solution for agency systems remediation, which could lead to agencies missing the interface testing milestone.	Archived Issue Id: 008/007	<p>Team to work on minimizing the impact due to this issue.</p> <p>1. Develop a scalable solution design with system level flexibility built-in.</p> <p>2. Collaborate closely with the FL PALM interface team, and ensure the FDC PALM team is updated with the recent/ upcoming</p>	06/30/26	3/5/2026: Continue to observe minor updates to the Interface specifications and file format. The data validation rules for the agency PALM integration continued to be updated

							changes to the interface file structures. 3. Resolve the gaps in the agency system remediation solution. 4. Escalate in case the changes to interfaces are not feasible to be mitigated.		
Open	10/01/25		Critical - Impacts the ability	Agency Business System	Timely remediation of the 3rd party managed agency systems (Axiom Pro and SSTC Bar Code Scanning tool) is impacted as (a) the vendor adopts a common remediation approach across agencies and (b) high dependency on technical specifications and sample interface files from State PALM.	FDC/ FCOR Risk Is: 007/ 008	1. Vendor to refer FL PALM knowledge center to plan & design the system remediation. 2. Vendor to perform unit testing with the information provided by the FL PALM team. 3. FL PALM Team to make sizable and reliable sample/ test files available. 4. Vendor to perform exhaustive Technical Testing of the system integration (Cycle 2 - Testing) and complete defect fixes.	06/30/26	3/5/2026: Cycle2-Technical Interface Testing and Cycle3-End to end Interface Testing for Axiom Pro planned to be completed in March/2026. Awaiting interface file (AMI004) to start the End to end Interface Testing for Bar code scanning tool. Agency continued to perform data mapping for OpenGov system and SAS Budget Payroll reconciliation process.
Open	10/23/25		Critical - Impacts the ability	Agency Business System	Not having a comprehensive crosswalk for FLAIR data elements to PALM may impact agency systems remediation and its effectiveness.	FDC/ FCOR Risk Is: 012/ 012	1. Identify the FLAIR data elements is required for the agency and prepare crosswalk, based on the available information. 2. Reach out to PALM for their support in validating and providing the data elements cross walk from FLAIR to PALM. 3. Agency to consider the crosswalk from PALM as the basis for internal systems remediation and agency internal activities. Target Closure Date: 12/31/2026.	12/31/26	3/5/2026: Team continued to work on the crosswalk between FLAIR to PALM. Internal discussion will be scheduled to remediate the residual gap.
Open	02/28/24		High - Impacts the ability	Deployment/Cutover	Lack of clear instructions and frequent changes to the Task guidelines from Florida PALM team impacts agency's ability to complete the tasks on time.	Archived Issue Id: 004/ 003	1. To minimize frequent changes in task instructions. Consistent guidance fosters stability and improves overall performance. 2. Collaborate with Florida PALM team on the issues with the Smartsheets. 3. Continue to communicate with the FL PALM on the impacted delayed deliverables. 4. Re-prioritize/ reorganize the work in agencies to complete the deliverables with minimal impact possible.	07/01/26	3/5/2026: Continued to receive additional information and deliverables, with short turnaround time, e.g. new template Monthly Progress Report, Review Object code mapping etc. All questions in the Question Log has been 'Closed/' 'Cancelled', agency needs to review it and create SNOW tickets if any questions are unresolved.
Open	08/31/24		High - Impacts the ability	Staffing/Resource Availa	Resource availability is limiting agency ability to progress on UAT preparation activities, e.g., UAT Test Plan, UAT Test Scripts, Future State Work Processes.	Archived Issue Id: 006/ 005	1. Onboard additional OIT BA to assist with mapping future state work processes to PALM and write test scenarios. 2. The SMEs from F&A team will guide this OIT BA and will review, revise, approve, and use the test scripts in UAT. 3. OIT BA will guide the F&A team on the UAT process and support on Test Management and monitoring UAT progress. 4. Continue to monitor the effectiveness/ productivity of the QA resources from OIT and make course-corrections, as required.	06/30/26	3/5/2026: QA team is fully staffed, Test Plan has been updated. Completed Test Cases preparation for the first part of PALM UAT. Limited availability (around 65%) of Process Steps, that are applicable to the agency, impacting agency preparation of UAT Test cases, hence readiness for later part of the PALM UAT. Significant discrepancies and inconsistencies among the FL PALM documentation adding into the ambiguity and rework, e.g. Role mismatch in Activities List, Process Steps and Subject matter.
Open	08/21/23		High - Impacts the ability	Staffing/Resource Availa	Not having resource backup in the FDC F&A team for recently created agency systems, to ensure business continuity.	Archived Issue Id: 001/ 001	1. Crosstrain staff to ensure adequate backup. 2. Cross training to be completed during the PALM project to ensure operational resiliency.	12/31/26	3/5/2026: Continuing to monitor and reassess 6 months prior to Go-Live.

FCOR Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period	Comments for Jan. - Feb. 2026
People Processes Technology	FDC's Change Champion Network will continue to attend workshops, working sessions, meetings, and other forums for collaboration to ensure the continued functionality of inbound and outbound interface points between the two agencies.	Logged	07/31/23	All agency business systems and CCN roles	No change this period.	
People Processes Technology	FDC will understand and document our current state technical architecture and business systems and modify to integrate with the financial management solution.	Logged	07/31/23	All agency business systems and CCN roles	No change this period.	
People Processes Technology	There will be sufficient engagement by resources knowledgeable about agency business processes and technical capabilities.	Logged	07/31/23	All agency business systems and CCN roles	No change this period.	
People Processes	Additional clarity required from Florida PALM team, for finalizing the FDC UAT plan	Logged	10/21/24	UAT Planning for user readiness for performing UAT	No change this period.	

Technology						
People Processes Technology	Florida PALM team will work closely with agency team to mitigate any challenges the agency may face to meet the strict cutover timeline.	Logged	12/20/24	All users in agency financial functions.	No change this period.	
People Processes Technology	Agency team will receive required support (availability of infrastructure and Florida PALM team) while performing the User Acceptance Testing and defect management.	Logged	12/20/24	All UAT Testers.	No change this period.	
People Processes Technology Data	Enterprise systems shall be available for User Acceptance Testing including respective business processes.	Logged	12/20/24	All UAT Testers.	No change this period.	
Technology	IT Infrastructure for the agency shall support the user access and continued use of Florida PALM system.	Logged	12/20/24	All users in agency financial functions.	No change this period.	
Processes Technology	Required operations support team (both IT and F&A team) has been setup to support Florida PALM system access for the agency users, e.g. ongoing user access, user/ security roles assignments, access to data/ reports etc.	Logged	12/20/24	All users in agency financial functions.	No change this period.	
Technology	State PALM team to provide necessary support to the agency for Cycle-2 Technical Interface Testing	Logged	08/20/25	All agency business systems and the remediation of agency business systems.	No change this period.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

FDC Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	12/04/24		Agency Business System	Unavailability of existing BARS reporting infrastructure will impact agency ability to generate user reports based on legacy/historical data.	Increasing	6 (High/Medium)	Archived Risk Id: 012/009	Risk Management Strategy : Mitigate 1. Work with FDC OIT on archival of BARS reporting solution, including database, UI and any platform components. 2. Archive BARS reporting solution, as the reporting tool for the legacy (FLAIR) information.	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Agency continues development of CAIRS reporting solution to replace BARS. Currently archival of BARS is planned in March/2027, based on the PALM go-live in January/2027.

								Target Closure Date: 3/31/2027		
Open and Monitoring	12/04/24		User Acceptance Testing	The Testing phases in the Florida PALM project plan assumes right-at-first-time, therefore may not allow sufficient time for defect management and retest of fixes.	Stable	6 (High/Medium)	Archived Risk Id: 014/011	Risk Mitigation Strategy: Reduction 1. Prepare the UAT testing team thoroughly, w.r.to Business processes, Configurations, User roles, PALM trainings, Test scripts. 2. Establish a communication channel with Florida PALM to get quick turnaround on the defect management. 3. Identify cross-agency best practices for UAT planning and execution. 4. Continue to touch base with the Florida PALM team, and assess the impact due to the risk. Target Closure Date: 8/31/2026	Fail to achieve the mandatory success measure of User Acceptance Testing for PALM Go-Live.	3/3/2026: UAT Testing has been started in February/2026. ~ 15% of the Test cases are failing leading to Bugs. Currently working with the FL PALM team on defect fixes and reviewing the Known Issues list. Requested better clarity/transparency from FL PALM team on the schedule for the fixes for the Bugs.
Open and Mitigating	12/04/24		Business Process Chang	Inadequate planning to identify specific process gaps and remediation planning may impact agency user readiness/ adoption.	Stable	6 (High/Medium)	Archived Risk Id: 015/012	Risk Mitigation Strategy: Mitigate Action: Develop and Launch Pre-PALM Training Closing Activities. Closing Activity 1: Process Gap Analysis Closing Activity 2: Process Gap Remediation Target Closure Date: 06/30/2026	Fail to achieve the mandatory success measure Business Process readiness for PALM Go-Live.	3/3/2026: A Process Impact Analysis Proposal is in work to be presented to the business on 03/10/2026 for approval. Results of the analysis will be used to inform remediation planning concerning training materials.
Open and Mitigating	12/04/24		Staffing/Resource Availa	Competing priorities for SMEs leading to limited bandwidth availability, may impact timely completion and quality of FDC/ FCOR PALM project deliverables, including data cleanup, configurations, process mapping & remediation, Trainings, agency systems remediations, and UAT preparation & execution.	Stable	6 (High/Medium)	Archived Risk Id: 017/014	Risk Mitigation Strategy: Mitigate 1. Identify the areas where it needs the SMEs bandwidth. 2. Come out with a plan to support FDC PALM project with required SMEs bandwidth. Target Closure Date: 12/31/2026	Fail to achieve the mandatory success measure User Acceptance Testing, User training and People readiness for PALM Go-Live.	3/5/2026: Agency is currently able to manage the increased volume of activities with the existing resources by prioritizing their workplan.
Open and Mitigating	12/04/24		Staffing/Resource Availa	Unavailability of IT resources with required skillset may impact timely remediations of agency business systems.	Increasing	6 (High/Medium)	Archived Risk Id: 010/007	Risk Management Strategy: Mitigate 1. Identify the High level solution for Agency Business System (ABS) remediation. 2. Finalize the Architectural design and technology stack identification. 3. Conclude the resources/ roles required for ABS remediation. 4. Onboard the required resources, complete the IT development activities to ensure readiness for E2E interface testing/ UAT Target Closure Date: 6/30/2026	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Identified the enhancement list for the PALM integration solution and continued working with the OIT leadership team to leverage additional bandwidth with ADF skillset.
Open and Mitigating	06/25/25		Deployment/Cutover	Lack of clear guidelines from the Florida PALM Program on preparing for Cutover activities and setting up Operations support for the agencies.	Stable	6 (High/Medium)	Newly added, on 6/25/2025	Risk Management Strategy: Mitigate 1. Identify the agency specific cutover activities for the agency systems and readiness activities to prepare for operations support. 2. Add the agency specific cutover activities and operations support preparation to agency plan. 3. Continue to progress on the agency specific plan and ongoing monitoring Target Closure Date: 11/30/2026	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Awaiting more information on cutover planning to be shared by the FL PALM team.
Open and Monitoring	02/06/26		Deployment/Cutover	Engagement with 'FL PALM Testing vendor to support agencies' during the same period when agency is fully-engaged in UAT may impact agency progress and timely readiness for go-live.	Stable	6 (High/Medium)	New Risk - Opened on 2/6/2026	Risk Management Strategy : Reduce. 1. Identify suitable time for the agency for this engagement, considering minimal impact to the agency from schedule and efforts perspective. 2. 'FL PALM Testing vendor to support agencies' to propose the improvements and the implementation	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/5/2026: Initial discussion with the vendor identified Test Automation of agency business system is not viable and Agency already using industry standard Test case template. Continue to engage on the standardization opportunities for UAT testing of agency systems.

										<p>3. Agency leadership to determine the criticality and urgency of implementing these proposed improvements, considering the impact to scope/ schedule/ cost impact to the agency.</p> <p>4. Agency PALM project team to plan and implement the improvements, and conduct ongoing review with the agency leadership.</p> <p>Target Closure Date: 12/31/2026</p>		
Open and Mitigating	12/04/24		Training	Unavailability of Florida PALM system training and Demo sessions early in the project phase may result in insufficient time given to agency user readiness/ adoption.	Stable	4 (Medium/Medium)	Archived Risk Id: 013/010	Risk Management Strategy: Reduction	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Demo's (for topics that have videos available in the Knowledge Center) have been scheduled for all PALM UAT testers. The People Readiness Lead will continue to monitor the KC and will add more demo sessions as the material is added. Additional demo sessions are being planned for all non-testers to allow a greater portion of the population to have access to the materials. PALM Training Sessions are planned in October.		
Open and Monitoring	12/04/24		Role Mapping	Insufficient information on access security model and planning of changes to current user roles/responsibilities may impact agency user readiness/ adoption.	Stable	4 (Medium/Medium)	Archived Risk Id: 016/013	Risk Mitigation Strategy: Mitigate	Fail to achieve the mandatory success measure User Acceptance Testing and Go-Live Readiness for PALM Go-Live.	3/5/2026: Role mapping is currently being maintained as we learn what is required for all processes as we progress through UAT and as updates are received from FL PALM directly.		
Open and Mitigating	06/25/25		Deployment/Cutover	Several readiness deliverables for agencies have been removed from the Florida PALM Program plan.	Decreasing	4 (Medium/Medium)	Newly added, on 6/25/2025	Risk Management Strategy: Mitigate	Fail to achieve the mandatory success measure of agency systems readiness for PALM Go-Live.	3/3/2026: Revised readiness workplan was published in January/2026, with additional deliverables due to extension of the project. No major impact to the project, agency project change request has been approved to re-baseline the project schedule.		

FDC Issues									
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	01/30/25		Critical - Impacts the abil	Agency Business System	Unavailability of PALM Data Warehouse and technical specifications (File format, Data dictionary) affecting the remediation activities for the agency based system.	Archived Issue Id: 007/006	<ol style="list-style-type: none"> 1. Setup new database, to remediate 12 agency business systems/ tools, depends on the PALM Data Warehouse for data. 2. Design the new database, and subsequently plan for the user reporting solution (CAIRS - Corrections Accounting Information Resource System) with appropriate reports. 3. Remediate Agency based systems to integration to CAIRS and internal functional testing 	06/30/26	3/5/2026: Agency completed 98% of the Technical Interface Testing. Remaining 1 is planned to be completed by March, which was impacted by the delayed publish of the API031 interface file. Received 65% of the interface files so far for the Cycle 3 - End-to-end Interface Testing.
Open	03/25/25		Critical - Impacts the abil	Agency Business System	Continued changes to the interface specifications by FL PALM due to ongoing system development, may require FDC PALM project team to rework on the solution for agency systems remediation, which	Archived Issue Id: 008/007	<p>Team to work on minimizing the impact due to this issue.</p> <ol style="list-style-type: none"> 1. Develop a scalable solution design with system level flexibility built-in. 2. Collaborate closely with the FL PALM interface team, and 	06/30/26	3/5/2026: Continue to observe minor updates to the Interface specifications and file format. The data validation rules for the agency PALM integration continued to be updated

				could lead to agencies missing the interface testing milestone.		ensure the FDC PALM team is updated with the recent/ upcoming changes to the interface file structures. 3. Resolve the gaps in the agency system remediation solution. 4. Escalate in case the changes to interfaces are not feasible to be mitigated.	
Open	10/01/25	Critical - Impacts the abil	Agency Business System	Timely remediation of the 3rd party managed agency systems (Axiom Pro and SSTC Bar Code Scanning tool) is impacted as (a) the vendor adopts a common remediation approach across agencies and (b) high dependency on technical specifications and sample interface files from State PALM.	FDC/ FCOR Risk Is: 007/ 008	1. Vendor to refer FL PALM knowledge center to plan & design the system remediation. 2. Vendor to perform unit testing with the information provided by the FL PALM team. 3. FL PALM Team to make sizable and reliable sample/ test files available. 4. Vendor to perform exhaustive Technical Testing of the system integration (Cycle 2 - Testing) and complete defect fixes.	06/30/26 3/5/2026: Cycle2-Technical Interface Testing and Cycle3-End to end Interface Testing for Axiom Pro planned to be completed in March/2026. Awaiting interface file (AM1004) to start the End to end Interface Testing for Bar code scanning tool. Agency continued to perform data mapping for OpenGov system and SAS Budget Payroll reconciliation process.
Open	10/23/25	Critical - Impacts the abil	Agency Business System	Not having a comprehensive crosswalk for FLAIR data elements to PALM may impact agency systems remediation and its effectiveness.	FDC/ FCOR Risk Is: 012/ 012	1. Identify the FLAIR data elements is required for the agency and prepare crosswalk, based on the available information. 2. Reach out to PALM for their support in validating and providing the data elements cross walk from FLAIR to PALM. 3. Agency to consider the crosswalk from PALM as the basis for internal systems remediation and agency internal activities. Target Closure Date: 12/31/2026.	12/31/26 3/5/2026: Team continued to work on the crosswalk between FLAIR to PALM. Internal discussion will be scheduled to remediate the residual gap.
Open	02/28/24	High - Impacts the ability	Deployment/Cutover	Lack of clear instructions and frequent changes to the Task guidelines from Florida PALM team impacts agency's ability to complete the tasks on time.	Archived Issue Id: 004/ 003	1. To minimize frequent changes in task instructions. Consistent guidance fosters stability and improves overall performance. 2. Collaborate with Florida PALM team on the issues with the Smartsheets. 3. Continue to communicate with the FL PALM on the impacted delayed deliverables. 4. Re-prioritize/ reorganize the work in agencies to complete the deliverables with minimal impact possible.	07/01/26 3/5/2026: Continued to receive additional information and deliverables, with short turnaround time, e.g. new template Monthly Progress Report, Review Object code mapping etc. All questions in the Question Log has been 'Closed/ 'Cancelled', agency needs to review it and create SNOW tickets if any questions are unresolved.
Open	08/31/24	High - Impacts the ability	Staffing/Resource Availal	Resource availability is limiting agency ability to progress on UAT preparation activities, e.g., UAT Test Plan, UAT Test Scripts, Future State Work Processes.	Archived Issue Id: 006/ 005	1. Onboard additional OIT BA to assist with mapping future state work processes to PALM and write test scenarios. 2. The SMEs from F&A team will guide this OIT BA and will review, revise, approve, and use the test scripts in UAT. 3. OIT BA will guide the F&A team on the UAT process and support on Test Management and monitoring UAT progress. 4. Continue to monitor the effectiveness/ productivity of the QA resources from OIT and make course-corrections, as required.	06/30/26 3/5/2026: QA team is fully staffed, Test Plan has been updated. Completed Test Cases preparation for the first part of PALM UAT. Limited availability (around 65%) of Process Steps, that are applicable to the agency, impacting agency preparation of UAT Test cases, hence readiness for later part of the PALM UAT. Significant discrepancies and inconsistencies among the FL PALM documentation adding into the ambiguity and rework, e.g. Role mismatch in Activities List, Process Steps and Subject matter.
Open	08/21/23	High - Impacts the ability	Staffing/Resource Availal	Not having resource backup in the FDC F&A team for recently created agency systems, to ensure business continuity.	Archived Issue Id: 001/ 001	1. Crosstrain staff to ensure adequate backup. 2. Cross training to be completed during the PALM project to ensure operational resiliency.	12/31/26 3/5/2026: Continuing to monitor and reassess 6 months prior to Go-Live.

FDC Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
Technology	IT Infrastructure for the agency shall support the user access and continued use of Florida PALM system.	Logged	12/20/24	All users in agency financial functions.	No change this period.
Processes Technology	Required operations support team (both IT and F&A team) has been setup to support Florida PALM system access for the agency users, e.g. ongoing user access, user/ security roles assignments, access to data/ reports etc.	Logged	12/20/24	All users in agency financial functions.	No change this period.
People Processes Technology	There will be sufficient engagement by resources knowledgeable about agency business processes and technical capabilities.	Logged	07/31/23	All agency business systems and CCN roles	No change this period.

People Processes Technology	FDC's Change Champion Network will continue to attend workshops, working sessions, meetings, and other forums for collaboration to ensure the continued functionality of inbound and outbound interface points between the two agencies.	Logged	07/31/23	All agency business systems and CCN roles	No change this period.
People Processes Technology	FDC will understand and document our current state technical architecture and business systems and modify to integrate with the financial management solution.	Logged	07/31/23	All agency business systems and CCN roles	No change this period.
Technology Data	It is assumed that data in FLAIR will exist in a new field in PALM except for fields that are discontinued. For the discontinued fields, it is assumed that PALM project team will communicate the names of the discontinued fields and will be shared as the data dictionary is updated for each Palm Design Segment.	Logged	04/22/24	All agency business systems and the remediation of agency business systems.	No change this period.
People Processes Technology	Additional clarity required from Florida PALM team, for finalizing the FDC UAT plan	Logged	10/21/24	UAT Planning for user readiness for performing UAT	No change this period.
People Processes Technology	Florida PALM team will work closely with agency team to mitigate any challenges the agency may face to meet the strict cutover timeline.	Logged	12/20/24	All users in agency financial functions.	No change this period.
People Processes Technology	Agency team will receive required support (availability of Infrastructure and Florida PALM team) while performing the User Acceptance Testing and defect management.	Logged	12/20/24	All UAT Testers.	No change this period.
People Processes Technology Data	Enterprise systems shall be available for User Acceptance Testing including respective business processes.	Logged	12/20/24	All UAT Testers.	No change this period.
Technology	State PALM team to provide necessary support to the agency for Cycle-2 Technical Interface Testing	Logged	08/20/25	All agency business systems and the remediation of agency business systems.	No change this period.

FDLE Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	05/16/24		Post Implementation	FDLE will be unable to do life-to-date tracking and trend analysis for data that is in both FLAIR and PALM.	Stable	4 (Medium/Medium)	Many of our budget and grant tasks required life-to-date tracking and research.	Develop crosswalk methodology if the new Data Warehouse will not provide this capability.	None for now	3/10-Reviewed with FDLE Team
Open and Monitoring	11/18/25		Interface	If the Interface file structure, file format/ layout and requirements change, then there is a Risk that this may lead to rework for agencies.	Increasing	4 (Medium/Medium)	The Project should provide ample advanced notice of any pending or possible interface file changes.	Cosmetic Changes can be done, but functional or structural changes will require resources to be extended.	If this Risk becomes an issue, then the Impact to FDLE would be that remediation readiness hampered, delayed, and perhaps stalled.	Reviewed with FDLE Team
Open and Monitoring	09/23/25		Deployment/Cutover	There is a RISK that FDLE will not receive a Cut-over plan in time to plan the Agency's cut over from FLAIR to PALM FDLE needs this	Increasing	3 (High/Low)	Question sent to PALM Readiness Coordinator on 9/18/25: Can you please let FDLE ITS know when and how the PALM team is	Appropriate cutover details will be shared in support of RW Task 586 Create Agency Deployment Plan and Cutover Checklist to	FDLE will not be able to go Live without Coordination with the PALM team providing a CUT OVER Plan from FLAIR to PALM	3/10-Reviewed with FDLE Team

				PALM. FDLE needs this plan at least 6 months prior to the PALM go live. This plan will help FDLE plan their Code Freeze.			the PALM team is planning to cut over from FLAIR to PALM? It is my understanding that FDLE will need to coordinate this with the Interfaces to PALM. We would like to see a comprehensive plan on how the PALM system will be cutover from FLAIR, so FDLE can plan to cut over it's interfaced applications and business systems from FLAIR to PALM.	Cutover Checklist to Prepare for Go-Live. This is currently scheduled for January 2026, but will be rebaselined to publish in June/July of 2026 due to the go-live date change to January 2027.	FLAIR to PALM.	
Open and Monitoring	09/04/24		Deployment/Cutover	There is a RISK that FDLE will not receive a comprehensive list early enough of anticipated errors and warnings that may occur in relation to interface interactions and report parameters input. This is needed at least 6 months prior to go live in order to have ITS code and Test error handling across Florida PALM functions including interfaces and online functionality.	Decreasing	2 (Medium/Low)	Waiting for the updates that are planned for Spring of 2026 according to the Question Log/Answer #0520	The project is developing a comprehensive Error Handling Matrix that will be released in early Spring next year (2026). This matrix will cover errors across Florida PALM functions including interfaces and online functionality.	Scope : Mitigate the Interface Errors Cost : Development time may increase Schedule : Implementation timeline will be affected	3/10 -Reviewed with FDLE Team
Open and Monitoring	11/18/25		Staffing/Resource Availa	There is a Risk that ITS resources may not be available to build out an Internal Data Warehouse for PALM reporting, if needed.	Increasing	1 (Low/Low)	FDLE is depending on the FL PALM project to provide a Data Warehouse with an Oracle BI reporting tool that will have the capabilities to meet FDLE requirements.	Monitoring to see if the Data Warehouse and Bi tools will meet the needs of FDLE. This will closed or mitigated when we determine the data elements in the Data Warehouse.	If this Risk becomes an issue, then the impact would be that FDLE would not have the required Reports and Queries to do	3/10 Reviewed with FDLE Team

FDLE Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period	Comments for Jan. - Feb. 2026
Closed	01/09/26	03/09/26	High - Impacts the ability	Interface	Test file issues provided by PALM team with API031 & AMI004 are not allowing FDLE to complete Cycle 2 Interface Testing by 12/19/25.	A working test file from PALM to test API031 was not ready until 11/14/25. This delay caused the functional testing with Axiom-Pro to be delayed and is now targeted to complete in February 2026. A working test file from PALM to test AMI004 was not ready until 12/19/25. AMI008 is dependent on AMI004, causing AMI008 Interface testing to be delayed.	FDLE is working with the Vendors and Cycle 2 Test Teams to complete the functional testing of Interfaces API031 and AMI008. A timeline issue has been documented related to these delays.	02/27/26		This issue can be closed. All of FDLE's Cycle 2 interfaces have been successfully functionally tested. Moving to cycle 3 UAT End 2 End Testing.(3/10 Reviewed with FDLE Team)
Open	01/09/26		High - Impacts the ability	Interface	Delays in developing end-to-end integration test scenarios.	Dependent on Issue #4 - Axiom-Pro and Strategic Asset Tracking System (SATS), both External vendors, will need to complete functional testing prior to developing end-to-end integration test scenarios.	Working with Cycle 2 test team and vendors to complete the functional testing before the End 2 End integration testing scenarios are to be developed jointly with FDLE.	02/27/26		Currently working on the E2E Test Cases for INTERFACE UAT. Will start testing in Mid-March 2026. Will close following the End 2 End test cases for Axiom-Pro, SATS. RAMS E2E test cases completed-Targeting to close on 3/18/26 (3/10 Reviewed with FDLE Team)

FDLE Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period	Comments for Jan. - Feb. 2026
Data	PALM will provide similar functionality as ABS which is used for querying FLAIR and PYRL data so that we can retire those applications.	Logged	09/01/23	Office of Financial Management Office of Policy and Planning All divisional/regional business liaisons Management		Reviewed with FDLE Team (3/10 Reviewed with FDLE Team)
Data	PALM transactional data will be moved to Palm Warehouse on daily basis. We assume that this will stay for indefinite time in Warehouse.	Logged	07/02/25	All agency business systems		Reviewed with FDLE Team (3/10 Reviewed with FDLE Team)
Processes Technology Data	FDLE assumes that the PALM Team will provide a comprehensive Cut-over plan from FLAIR to PALM.	Logged	09/09/25	All agency business systems		Reviewed with FDLE Team (3/10 Reviewed with FDLE Team)
Processes Technology	If Confidential data is used in the UAT environment, then it is assumed that the PALM Security Team has taken the appropriate steps to protect this information.	Logged	11/05/25	All PALM Agencies		Reviewed with FDLE Team (3/10 Reviewed with FDLE Team)

Agency Sponsor Confirmation

As Agency Sponsor, I understand my role and responsibility for monitoring and reporting on my agency's readiness status. I have reviewed and confirmed the accuracy of my agency's readiness status as reflected in this dashboard.

RW Task Timeliness

RW Task Completeness

Direct Impact Task Timeliness

Direct Impact Task Timeliness:

Score = 93.2%

- Submitted On Time = 34
- Submitted Late = 16
- Pending Submission = 1

Other Task Timeliness

Other Task Timeliness:

Score = 80.55%

- Submitted On Time = 57
- Submitted Late = 34
- Pending Submission = 0

Direct Impact Task Completeness

Direct Task Completeness:

Score = 90.00%

- Submitted Complete = 37
- Submitted Incomplete = 3
- Completed After Submission = 9

Other Task Completeness

Other Task Completeness:

Score = 93.97%

- Submitted Complete = 50
- Submitted Incomplete = 1
- Completed After Submission = 12

The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

The Change Champion Network composition reflects the completeness of your CCN makeup.

- Unique Filled Role = 24
- Duplicate Filled Role = 2
- Vacant Role = 0

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

RW Tasks - Completed or Open Items

Project Impact	Critical Operational Element	Task ID	Task Name	Task Planned Start Date	Task Planned End Date	Agency Reported Task Progress	Agency Submission Date	Status Comment	Project Verification of Completion	Agency Corrected Submission Date
Direct	Technology	576	Complete Internal Agency Business System Test and Remediation to prepare for Cycle 2 - Technical Interface Testing	01/06/25	07/25/25	75% - Consolidating/Inputting Information for Submission		Update from 3/9/26: Interface testing data has improved progress on ensuring ABS are ready for cycle 2 testing. This list has been updated and will continue to be a living document until all systems are ready. Currently 16% remaining.		
Indirect	Processes	574	Prepare Documentation for User Acceptance Testing	06/02/25	01/09/26	100% - Submitted	01/08/26	Option 3: Agency Specific format, with copy of results to User Story Inventory worksheet (Option 2). 4127 stories shared; 574 Midpoint Check-in completed. Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

FDOT Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	07/30/24		User Acceptance Testing	Late Publication of Batch Schedule	Stable	9 (High/High)	PALM Interfaces - Not knowing the batch schedule will leave agencies little time to remediate processes as needed. (39)	Continue to work with the Readiness and Technical Coordinators. Plan to align the UAT batch schedule with business processing as part of interface testing and Cycle 3 testing.	The FDOT file processing is performed in a specific order and priority, within a defined timeframe. Interruption or the inability to align with our system design will impact the	No comments for this item this period

											effectiveness of the remediation or cause data mismatches and errors.	
Open and Monitoring	07/30/24		Interface	Excel Upload Volume Capacity	Stable	9 (High/High)	PALM Interfaces - The inability to efficiently enter large amounts of records via Excel uploads will incur delays on account of providing technical solutions for mass entry. (41)	Project costing could have a large number of records - an interface to automatically accept our transactions is necessary.	If volume exceeds capacity and the upload is interrupted, it will undermine the success of the record processing.	No comments for this item this period		
Open and Mitigating	09/30/24		Interface	Data Source Indicator - Input or System Generated	Stable	9 (High/High)	PALM Technical - Need to identify the "Input and Automated" records in extracts. FLAIR indicates whether records are input manually, automated, or system generated. FDOT uses this indicator for various reporting and balancing methods. (47)	If PALM cannot provide the transaction indicator for the data source, we will need to design backup plans and work with the business experts to develop alternative methods.	PALM not having this indicator could cause major impacts to Cost Allocation and Cash Forecasting, especially if the automated records do not come across in the extracts.	No comments for this item this period		
Open and Monitoring	08/21/25		Conversion/Configurator	Handling Historical Data & Unclear Data Warehouse Structure & Access	Stable	9 (High/High)	Related to Decision 100 & 101, currently unclear how we'll be storing historical data that is going away with the elimination of OOC Table 31 & 33 and SAMAS Table 16. (76)	Will monitor for Data Warehouse design & access to be provided to identify what agency options are to resolve this risk	Will delay our development when we don't have a full idea of the design of the PALM Data Warehouse and what we will have access to.	No comments for this item this period		
Open and Monitoring	09/15/25		Conversion/Configurator	Payables - FLAIR to PALM Conversion Process	Stable	9 (High/High)	Uncertainty in how these existing payables will be converted to PALM will result in uncertainty as to how we track and relieve these financial liabilities once PALM goes live (81).	Can only monitor the risk until more information is provided about the conversion process.	This will need to be resolved before FDOT can fully utilize the PALM system.	No comments for this item this period		
Open and Monitoring	09/15/25		Conversion/Configurator	FLIPS - Unclear TIN Verification Process	Increasing	9 (High/High)	The process for TIN verification in the FLIPS system is still unclear and may impact supplier verification and payments. (83)	Will be monitoring for more information on this verification process.	This will probably be an issue/risk for other if not all state agencies, and will need to be resolved before PALM Go-Live.	No comments for this item this period		
Open and Mitigating	09/25/25		Interface	Delay with Cycle 2 Interface Testing Results	Increasing	9 (High/High)	Interface Cycle 2 Testing Responses are taking 2-3 weeks to return to the agency. These greatly reducing the amount of time for the agency to make changes within the Cycle 2 Testing Schedule and putting our successful completion of testing in jeopardy. (82)	Cycle 2 Testing requires multiple interface submissions to identify all issues with interface submissions. With some of the interfaces using agency data for this, implementing development changes requires more coordination than normal as to not interfere with interface testing.	Delays in PALM responses impose roadblocks or unplanned downtime for agency resources and impacts agency schedule	No comments for this item this period		
Open and Monitoring	03/05/26		User Acceptance Testing	PALM Structure Volatility	Stable	9 (High/High)	Batch jobs, batch schedule, and interfaces are all considered changeable by PALM up until and after go-live. Inherently, with this type of project coordination there's risk of Agency's working in a direction in sync with PALM's details, and that being reversed based on PALM detail changes.	Monitor, this isn't something that can be mitigated or resolved by FDOT.	PALM Environment volatility could disenfranchise system testers and agency users, making conversion to the PALM system more difficult at the agency level.	New this reporting period		
Open and Monitoring	02/19/26		User Acceptance Testing	Year/Month-End & Carry Forward Testing Timing Window	Stable	9 (High/High)	The UAT Environment will be available from November to January. This testing will occur during a holiday period where many employees and potentially PALM Team members will be out. It is also very close to the PALM Go-Live date.	Year end & Carry Forward will need to be exclusively tested at the agency level during this testing period to ensure Agency processes won't be interrupted.	If interruptions during Year-End & Carry Forward cause any issues in Production it would cripple financial systems and activity at FDOT.	New this reporting period		
Open and Mitigating	02/19/26		Interface	Interface File Date/Time Naming & Delivery Ambiguity	Increasing	9 (High/High)	PALM uses 12-hr timestamps, post-midnight files are labeled as next-day business date. This could cause missed or duplicate processing and downstream reporting inaccuracies. Files are also being delivered with incorrect formats, are full instead of deltas, are sent multiple times daily, etc.	Clarify with PALM when files will be delivered via the batch schedule and see if there are any options for better naming conventions that aren't as misleading. The batch schedule has to be "defined" with enough time for Agencies to accommodate their own processes and schedules to account for what is being sent by PALM.	If files continue to be delivered inconsistently more effort will be required to test and resolve issues effectively. Agency resources will need to be put towards identifying if issues are internal or caused by design deviations. In production, this inconsistency will cause cascading issues with Agency Business Systems receiving information that they are not designed for or when they are not expecting it.	New this reporting period		
Open and Mitigating	02/26/26		Interface	Recon Logic Risk	Increasing	9 (High/High)	Related to Interface File Naming & Delivery Ambiguity Risk. If Informatica assumes same-day matching between API 031 and GLI 051, but files arrive on different days (or GLI fails/arrives late), records won't join and downstream tables	Subcommittee formed to investigate interface file discrepancies and create a strategy for internal batch schedule.	Multiple other items discuss cascading data inaccuracies or lack of data due to batch and file delivery ambiguity.	New this reporting period		

						(e.g., Cost Table 22) won't be accurately populated.				
Open and Monitoring	02/05/26		Conversion/Configurator	Unclear Account Balance Conversion Logic	Increasing	9 (High/High)	FDOT has communicated this question/risk to DFS/A&A. FDOT has not received finalized logic for Account Balance Conversions.	This is not an item that FDOT can mitigate, this conversion logic needs to come from A&A to apply to all state agencies.	If this risk is not addressed and resolved, it will pose a very large obstacle for FDOT's Go-Live Stability.	New this reporting period
Open and Mitigating	06/12/25		Staffing/Resource Availability	PALM Changes late in Development	Stable	6 (Medium/High)	PALM changes occurring late in any phase introduces uncertainty when phase activities are in progress and functioning properly. Late changes are a step backward, jeopardizing quality and the timeline. (66)	Stay informed of PALM notices and changes, and raise questions early.	Difficult to meet the deadlines when simultaneously handling changes, and assessing completeness or quality.	No comments for this item this period
Open and Mitigating	08/06/25		User Acceptance Testing	Outbound Interface Testing	Stable	6 (Medium/High)	Not receiving a Delta File for Interface Testing impedes the ability to validate the outbound files. PALM is providing Master Files, the master file that they sent had about 60k projects on it and want us to use that, which isn't a realistic daily interface file that we will normally get. Also, not all records are included in this file, causing extra time to be taken using the provided master file for validation. (71)	Using our own 20 records that we're using to validate our testing rather than the provided master file. PALM will be providing these Delta files in a few months.	Using the master file will not be a realistic opportunity to test this process, since a delta file will be provided to agency after Go-Live.	No comments for this item this period
Open and Monitoring	08/07/25		User Acceptance Testing	Online UAT Schedule Delay	Stable	6 (Medium/High)	PALM is likely going to push Online UAT back a few weeks which may shorten the testing and bug resolution window for agencies. (72)	Monitoring at this time to see what the new start date will be for UAT.	FDOT won't have the proper testing and resolution time to be prepared and ready for Go-Live.	No comments for this item this period
Open and Monitoring	02/19/26		Staffing/Resource Availability	Question Log Deprecation	Stable	6 (Medium/High)	The PALM hosted Smartsheet Question Log is no longer being used. Questions that would normally be stored in the Smartsheet Question Log will now be submitted and stored in the PALM ServiceNow. Only a small amount of users have access to the PALM ServiceNow instance, so questions have to be coordinated through them, and managing questions will also need to be coordinated through them.	This introduces a bottleneck to getting questions in front of the PALM Team and managing the questions in the native environment, it will put more importance on the Agency Question Log, that will now need to find a better process to capture questions being submitted in ServiceNow.	This will become an issue if not addressed, more users with Read-Only or Write Access will be needed to see and manage the question log in ServiceNow.	New this reporting period
Open and Mitigating	02/05/26		Conversion/Configurator	Limited Conversion Test Opportunities	Stable	6 (Medium/High)	Agency will only have two opportunities to test the full conversion from FLAIR to PALM. There is a risk of insufficient validation before Go-Live due to this restriction.	Utilize the opportunities available to document full process to prepare data as best as possible and resources that will assist with conversion as best as possible.	Insufficient validation of Agency financial data in PALM after Go-Live.	New this reporting period
Open and Monitoring	10/24/24		Agency Business System	Project Costing - Manual Inputs	Decreasing	6 (High/Medium)	PALM Technical - Project Costing Module: Manually adding additional data into Florida PALM for over 15,000 projects is not feasible. (51)	Florida PALM - will advise if it can be through Excel upload.	Hiring staff will be more expensive than developing an interface. Average 70-90 updates a day. Manual entry may introduce errors.	No comments for this item this period
Open and Monitoring	12/12/24		User Acceptance Testing	Delayed Testing for Excel Uploads	Decreasing	6 (High/Medium)	PALM Interfaces - Uploading data files through the use of Excel is critical for interface testing, yet there is no mechanism in place to test this in advance of our unit testing. (54)	Awaiting the ability to completely test the upload functionality.	Not having a way to test in advance removes the opportunity to work through errors or unknowns and be prepared for implementation.	No comments for this item this period
Open and Mitigating	02/18/25		Interface	Interfaces and Data Processing Visibility	Decreasing	6 (High/Medium)	PALM Technical - Unresolved questions and issues regarding the PALM interfaces, including details on the layouts and contents of the interfaces, limits the ability to remediate Agency Business Systems. (61)	Expect an unknown amount of rework, consider this in planning activities.	When the data interpretation or system expectations are incorrect, the agency's downstream systems may have errors in testing with PALM.	No comments for this item this period
Open and Mitigating	04/24/25		User Acceptance Testing	Data Warehouse	Stable	6 (High/Medium)	Not knowing the FLAIR data that will be part of the PALM's Data Warehouse can affect our mitigation planning for several risks. (63)	Request information from the PALM Readiness Coordinator, monitor the Knowledge Center and ask questions.	The ambiguity of the data contained in the Data Warehouse impacts the validity of some risk mitigations because we are assuming specific data will be available.	No comments for this item this period
Open and Mitigating	06/12/25		Deployment/Cutover	FY Balances and Fund Availability	Stable	6 (High/Medium)	From a business perspective, year-end processes like certified, carry forward, and others have changed massively, and the unknowns cannot be identified until they are fully worked through. (65)	Define scenarios and data variations for a complex and comprehensive testing strategy.	Balances may be incorrect, funds for payables may be insufficient.	No comments for this item this period

Open and Mitigating	08/07/25		Interface	Encumbrances Not Linked to Chart of Accounts Fields Used	Stable	6 (High/Medium)	<p>New Risk, based on PALM Line Ref # 1289: Needs Encumbrance Balance available on POI001 (Outbound Encumbrance Extract) and IUI003 (Outbound Inter/Intra Unit Interface) interfaces at the Distribution/Line (lowest) level so that it is linked to the Chart of Accounts (COA) fields used.</p> <p>Agencies were advised to use reports, such as KKR018 in to achieve this, but it has the following issues: KKR018 doesn't have all pertinent information in it (just as a quick example, Organization is not on the output), so it really requires multiple reports to be run and chained together to track the balances (at minimum 3 reports would need to be chained together). Reports aren't easily digestible through automated processes, due to the non-tabular format, and chaining multiple ones together adds even more complexity.</p> <p>This risk could be alleviated if the Data Warehouse tracks the balances at a level that links it to the COA string. (73)</p>	Monitoring, seeing if PALM will change course on this decision.	Will require complex coordination and manipulation of reports to resolve this risk without PALM changing course on this design.	No comments for this item this period
Open and Monitoring	09/17/25		Interface	Inbound Interface file identification inconsistencies between input and output	Increasing	6 (High/Medium)	<p>Process IDs on the files in the archive folder match for the .log and .err files but differ from the Process IDs on the .txt (input) files. The .log (and .err) files also do not match the .txt files within the archive folder. This was evident in AMI006 and other interfaces as of 9/17/25. The lack of correlating information makes it difficult or impossible to match data sent to PALM and resulting processing information. This could cause significant maintenance and resolution handling issues resulting in additional work, more PALM-Agency technical involvement, and critical delays on transaction processing. (89)</p>	Monitor, this will only be a problem if the agency sends multiple of the same file in one day, or if PALM processes multiple of the same file for the agency in one day. If this occurs the error files send back by PALM will not be able to be synced up to the files that were sent by the agency. Not expected to experience this issue much, if at all, but it will require manual action to go through the logs if it does occur.	Will require agency resources to go through files and logs manually to sync them, which will take time and effort to do.	No comments for this item this period
Open and Mitigating	07/22/21		User Acceptance Testing	PALM Responses for Detail Information	Decreasing	4 (Medium/Medium)	<p>PALM Response - FDOT not receiving clear answers from Florida PALM in a timely manner will increase the duration to perform the remediation. Responses are marked as Completed when the question may not be answered. (15)</p>	Continue to have our open/new questions as part of our PALM Touchpoint meetings, and email our Readiness Coordination between meetings if we are blocked..	Not having information to understand the interoperations of Florida PALM will lead to assumptions and incorrect remediation of systems.	No comments for this item this period
Open and Mitigating	02/06/25		Role Mapping	Roles Required	Stable	4 (Medium/Medium)	<p>PALM Functionality - There is a concern that more PALM user roles will be added in the future before go-live. If additions are not communicated timely there is a risk going forward that some roles may not be captured in AARF/SailPoint right away, delaying our ability to set up user roles. (62)</p>	Moving forward, we are developing a PowerBI dashboard, AARF roles, and SQL-based reports in a flexible manner so that when roles are provided, we can quickly add them.	Additional rework is required, and limitations for users' access.	No comments for this item this period
Open and Mitigating	08/12/25		Interface	Inbound/Outbound Payment Linking	Stable	4 (Medium/Medium)	<p>No unique identifier to link outbound payments from EED to inbound confirmations from PALM. Current Limitation: PALM generates journal IDs post-processing, making it impossible to pre-link. (75)</p>	<p>Potential Work Around: Use Supplier ID + Invoice ID as a composite key. Consider populating the document number field in the outbound voucher line with a custom tracking ID. Use line and distribution line numbers to increase granularity. Be cautious: repeated document numbers across multiple distribution lines may reduce uniqueness. Possibility of duplicate payments, we won't know what happened to payments if we don't</p>	Will require some sort of workaround by the agency to link outbound payments from Agency Business System (EED) to inbound confirmations from PALM.	No comments for this item this period

									get a successful acknowledgment from PALM, not only related to EED.		
Open and Monitoring	09/25/25		Conversion/Configuration	FLIPS - Conversion Complexity	Increasing	4 (Medium/Medium)	Multiple active supplier accounts with different remittance addresses may be difficult to convert into a single supplier record, leading to possible errors or loss of information. Missing conversion records for suppliers with multiple active names may result in incomplete or inaccurate data migration. (85)	Conversion is occurring now, once comparison has been completed agency will sample and compare to internal records for conversion.	Will require agency resources to go through supplier accounts and analyze and research which accounts to use in the case of duplicates	No comments for this item this period	
Closed	02/19/26	02/19/26	Identity Provider (IdP)	Security Role Report Accuracy	Stable	4 (Medium/Medium)	Report initially only showed 10 users, was due to certain users being designated 'DOT' and others 'FDOT'	PALM responded, all users should have the same agency designation now, risk is likely resolved, will need to monitor report to see if this changes.	If this is not resolved, user management and system security will be difficult to enforce at the agency level	New this reporting period	
Open and Mitigating	02/05/26		User Acceptance Testing	UAT Time Compression	Stable	4 (Medium/Medium)	Agency Interface access will be cutoff on October 1st. The full UAT window will essentially be February - September. Limiting the amount of time that full end to end testing can occur.	Utilize a testing strategy that gets as much full system testing done in the provided February - September window as possible.	Potential for issues to be missed with interfaces due to shortened testing time and changing design.	New this reporting period	
Open and Mitigating	07/22/21		Staffing/Resource Availability	Funding to Completion	Stable	3 (High/Low)	PALM Funding - Allocations may not be available through to completion for all systems. (6)	Document program funding requirements and communicate with FDOT leadership, the Governor's office, and House/Senate staff.	Unable to remediate and test systems within the timeline, and the Florida PALM implementation may not be successful.	No comments for this item this period	
Open and Mitigating	12/12/24		Conversion/Configuration	Mock Conversion	Decreasing	3 (High/Low)	PALM Data - The Mock Conversion is problematic, having conversion errors that are inaccurate. (56)	Continue to collaborate with PALM to work through the process and find a pattern to help identify the problem points.	Some of the data conversions may be inaccurate causing erroneous processing or failure and impacting the goal of successful UAT.	No comments for this item this period	
Open and Monitoring	09/23/25		Interface	Interfaces lacking data considered as testing complete.	Stable	3 (High/Low)	GLI002 contains some records from the current PALM/CMS productions environment that are missing some chart of account values. The records will be reclassified and the missing chartfields will be present in UAT Full (Mock 4 data). - PALM TC. A similar issue exists with PCI001 where some portions are pending. (90)	Monitor and stress for contingency plans: Planning to re-test at a future date when additional testing cycles, such as UAT full, are available.	Will require agency to retest specific interfaces at a later time (outside of the intended phase) once PALM has completed interface design to ensure correct functionality again	No comments for this item this period	
Open and Monitoring	03/05/26		Interface	Risk/Issue - MFT Traceability	Stable	3 (High/Low)	Multiple inbound files with different time stamps can be submitted per day, but only one outbound file can be submitted per day. The Agency's concern is that for error file handling & traceability if & when multiple outbound error files ultimately happens. How will we identify which line is which and what they are for.	Monitor, PALM team has been made aware of this error file issue, unknown whether current strategy on error file handling will change to accommodate agency needs.	Error reconciliation will require much more effort because lines in error files will not easily be tied back to the original files they came from.	New this reporting period	
Open and Monitoring	05/09/24		User Acceptance Testing	Knowledge Center Change Identification	Decreasing	2 (Medium/Low)	PALM Technical - Knowledge Center does not have version history on what was changed. It is a manual compare effort. This would require agencies to check each field in every interface to implement technical changes and some changes may be missed. (27)	Requested the Readiness Coordinator for additional communications when there are updates to the Knowledge Center, and what was updated.	Missing essential PALM changes for the remediation work.	No comments for this item this period	
Open and Monitoring	02/19/26		User Acceptance Testing	Audit Checkbox Test Scenario	Stable	1 (Low/Low)	Testing is currently underway around the Audit Checkbox. Unclear what the purpose or functionality of the Audit Checkbox is and if it needs to be tested and how.	Will need coordination with DFS & A&A. A&A has indicated that the audit checkbox does not impact them either way.	Functionality may not be tested correctly, and functionality important to PALM or Agency processes may not be ready for Go-Live.	New this reporting period	

FDOT Issues										
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026	
Open	03/05/25		Critical - Impacts the at	User Acceptance Testing	No UAT for Year-end	In the PALM timeline, a financial year-end scenario will not be replicated in the PALM UAT phase. The parallel work stream with year-end is a major increase in complexity for PALM Go-Live. Half of the functionality in the old system and half in the new PALM system. (19)	Assessing how we will accomplish both the Go-Live and year-end tasks, a gargantuan effort that would involve a number of resources already at capacity. People and computer processing resources.	04/01/26	No comments for this reporting period	

Open	05/09/24		High - Impacts the ability	Staffing/Resource Availability	Mainframe capacity	FDOT - Low on mainframe available capacity and space to allocate for separate PALM environments. (6)	Requested NWRDC/Ensono for 10% increase by end of SFY 2025. A large application (Right of Way Management System) is scheduled to be moved off of the mainframe by end of SFY 2026 which will provide more processing capacity. FDOT Technical resource is looking at offloading flat files to SQL Server by 08/2026.	08/03/26	No comments for this reporting period
Open	06/13/24		High - Impacts the ability	Interface	Interfaces Continue to Change	PALM Interfaces – Interfaces continue to change and the documentation is incomplete in some areas. This impacts our design, remediation, and integration with our systems. And any updates to the interface structure requires the agency to restart testing and resets testing progress up to that point. (10)	Continue to convey the importance to PALM Readiness Coordinator during Touchpoint meetings.	08/01/25	No comments for this reporting period
Open	06/13/24		High - Impacts the ability	Staffing/Resource Availability	Limited SMEs	FDOT - SME Resources limited for business processes and the technical knowledge experts are overallocated. (12)	Monitor allocations closely and identify tasks that may be accomplished by another resource. Streamline communications. Set Priorities and work arounds. Escalate to management when necessary.	07/01/26	No comments for this reporting period
Open	09/16/24		High - Impacts the ability	Interface	Interface Data Relationships	PALM Interfaces - Cannot provide ERD's or DDL for the interface files reduces the understanding of the data relationships. There is insufficient detail on parent/child/sibling, one:one, or one:many, relationships, or optional record types. There is a need for ERD diagrams to answer these questions for remediation efforts. (15)	Reach out to PALM regularly for details. Work with PALM to articulate the need and offer examples and communicate how it impacts us, particularly in the way we adhere to data integrity at the database level.	08/01/25	No comments for this reporting period
Open	10/30/24		High - Impacts the ability	Interface	Need Interface Error Report	PALM Interfaces - Submission feedback: In the Interface layouts, the tab containing the feedback the agencies will receive after file processing was removed. This information is necessary to know of successful entries, or which ones had errors and the cause; need the format/layout and definition of feedback we will receive. (17)	Raise to the Technical Coordinator. Run error report next day, soft errors. We do not know how we will receive feedback on the fatal errors. Continue to work with PALM and by August we expect to have more information.	08/01/25	No comments for this reporting period
Open	12/12/24		High - Impacts the ability	Agency Business System	Functionality Gap	FDOT Applications - Switching from the FLAIR transactions to the internal PALM functionality is considerably different for our internal systems. (16.b)	Business processes, functionality, and data mapping is progressing, and once we are in UAT we will reassess any gaps, the impact and mitigation.	07/01/26	No comments for this reporting period
Open	12/12/24		High - Impacts the ability	Interface	Sample Data Scenarios	PALM Technical - The sample data for the interface files is standalone and does not represent the complete set of transactions. Without data continuity examples that support workflow scenarios the accuracy of the internal edits and quality checks may be incorrectly assessed. (18)	PALM advised that we will not receive sample data. As an alternative we are creating test data to represent the full scenarios.	08/01/25	No comments for this reporting period
Open	06/12/25		High - Impacts the ability	Staffing/Resource Availability	RW Tasks expanded after they start	The Florida PALM Readiness Work tasks are being expanded beyond the original description, often after the tasks' start date and without extending the dates that the RW tasks are to be completed. For example, the requirements for configuration have had ongoing changes, and new tasks are being added with short notice. (21)	Request a longer lead time before the task start date. Request the full scope of the task and instructions when the task is added.	12/31/25	No comments for this reporting period
Open	09/15/25		High - Impacts the ability	Interface	Delay with Cycle 2 Interface Testing Results	Interface Cycle 2 Testing Responses are taking 2-3 weeks to return to the agency. These greatly reducing	Cycle 2 Testing requires multiple interface submissions to identify all issues with interface submissions. With	01/15/26	No comments for this reporting period

						the amount of time for the agency to make changes within the Cycle 2 Testing Schedule and putting our successful completion of testing in jeopardy. (23)	some of the interfaces using agency data for this, implementing development changes requires more coordination than normal as to not interfere with interface testing.		
Open	10/01/25		High - Impacts the ability to test	Interface Dependencies causing delays in System Remediation	Interface Dependencies causing delays in System Remediation	Testing paused by PALM for GLI-006 and API-002, this affects the agencies ability to test the outbound interfaces GLI-051 and API-031. (24)	Will have to rely on PALM to re-open testing for those interfaces, to resolve the issue here, dependency can't be resolved.	12/01/25	No comments for this reporting period
Open	10/16/25		High - Impacts the ability to test	Business Process Change	No Year-End Functionality in PALM Design	No year-end processes or functionality have been communicated to exist in the design for PALM. Year-end processes are important for FDOT's internal applications and processes. (25)	Communicate to the Cross-Agency Committee to identify their concerns and mitigation/resolution.	02/16/26	No comments for this reporting period
Open	01/29/26		High - Impacts the ability to test	Staffing/Resource Availability	Administrative Burden from Limited PALM ServiceNow Licenses	With only two PALM ServiceNow Licenses for FDOT, this funnels and bottlenecks communication and questions to the PALM Team and adds more effort to resources that are already heavily involved in Agency Administration and Management of PALM Project. High possibility details will be lost in the cracks because "On Behalf of" emails are not being sent out by PALM ServiceNow, so comments from PALM have to be conveyed back and forth through SN License Holders.	Implement strategy to alleviate tracking and management of communication with PALM Team pressure on SN License Holders, so that items can be monitored at the agency level.	12/31/26	New this reporting period
Open	02/05/26		Low - All impacts not likely	Staffing/Resource Availability	Administrative Burden from PALM Tracking Requirements	Monthly Smartsheet requirement to declare and then report planned vs. actual number of tests per interface that was introduced as UAT was beginning.	Implement strategy to capture this information with SMEs as BAs are administering testing scenarios. Unknown if this will be applicable for all UAT Testing that FDOT will complete.	12/31/26	New this reporting period

FDOT Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
Processes	The Florida PALM Project implementation will replace the current FLAIR functionality and will not encompass FDOT's agency-specific planning and analysis requirements. (1)	Logged	06/30/23	FDOT Florida PALM End Users FDOT Application Owners	No comments this reporting period
Processes	FPST work efforts classified as operations and maintenance (O&M) will follow the established standards for O&M activities. (5)	Logged	06/30/23	FDOT Florida PALM Agency Liaisons FPST Program Managers FDOT Application Services Section Managers	No comments this reporting period
People	Adequate staffing, equipment, software, and hardware are primary drivers of the department's FPST Program activities will be available, and there will be funding to support FDOT FPST Program. (6)	Logged	06/30/23	Executive FPST Program Sponsors Chief Information Officer	No comments this reporting period
People	Due to the overallocation of FDOT key subject-matter resources, hiring consultants and other resources to augment the FPST Program is essential for the department's continuity of operations and successful transition to the Florida PALM solution. (8)	Logged	06/30/23	Executive FPST Program Sponsors	No comments this reporting period
Technology	FDOT has total dependencies on the PALM Solution Design deliverables. (10)	Logged	06/30/23	FDOT Florida PALM Agency Liaisons FPST Program Managers	No comments this reporting period
Processes	Staff resources are assigned to multiple workstreams and may have limited availability for FPST activities. Scheduling and resourcing for the FPST Program must take into consideration the department's annual operational schedule to minimize interference with development and delivery of the Work Program and required activities for the state and federal fiscal year-end closings. (11)	Logged	06/30/23	Executive FPST Program Sponsors	No comments this reporting period
Technology	Excel spreadsheet uploads will be entered by business users, and the process will be simple and function smoothly. (13)	Logged	02/20/24	FDOT End Users	No comments this reporting period
Data	The 'CFDA' number storage location needed in PALM for expenditure of grants, workaround would be to leverage OA fields and create data relationships.	Logged	04/05/24	FDOT Florida PALM Agency Liaisons FPST Program Managers	No comments this reporting period
Data	OA1 and OA2 will fully remain agency specified. This will ensure that PALM will not be using these fields for any PALM functionality that could conflict with other agency's usage of OA1 or OA2. (18)	Logged	05/17/24	FDOT Florida PALM Agency Liaisons FPST Program Managers FDOT Business Owners	No comments this reporting period
Technology	MFMP - System integration between MFMP and PALM will not introduce incompatibility with FDOT. (19)	Logged	06/19/24	FDOT Procurement and Payments	No comments this reporting period
Technology	People First - System integration between People First and PALM will not introduce incompatibility with FDOT. (20)	Logged	06/19/24	FDOT Payroll	No comments this reporting period
Processes	PALM will provide functionality to allow FDOT to input accounts payables into the system. (Part of the carry forward process last months of the year.) (22)	Logged	10/01/24	FPST Program Managers FDOT Business Owners	No comments this reporting period
Data	PALM Data Warehouse and/or PALM Reports will provide the necessary information that our systems and processes require to perform core functionality. (23)	Logged	04/24/25	FPST Program Managers FDOT Business Owners FDOT End Users	No comments this reporting period
Data	Testing during Cycle 3 will be comprehensive and inclusive of our business scenarios, volume testing, and error conditions to assess how failures are handled. Cycle 2 testing is primarily a connectivity test, but some error records can still be submitted. (24)	Logged	06/27/25	FPST Program Managers FDOT Business Owners	No comments this reporting period
Data	The Sub Funds functionality that will be used for FDOT local funds will need to be updated in the GL module and that should	Logged	07/10/25	FPST Program Managers FDOT Business Owners	No comments this reporting period

	be comparable to the Funds used today. (25)				
Processes Data	Related to Decision 97, assuming that PALM is going to treat Asset ID in Production the same way that it is right now, first asset will be 11 zeros and a 1, second will be 11 zeros and a 2, and so on. If they don't, this will create a problem with how we're utilizing Journal ID and Asset ID (26)	Logged	08/07/25	Agency Business Systems that utilize AMI003.	No comments this reporting period
Processes	The Retainage payout process will continue as it does today, through manual entry in the EED system, with no expected process changes. (28)	Logged	09/15/25	Accounts Payables	No comments this reporting period
Processes Data	It is assumed that PALM and FLIPS will eventually support multiple remittance addresses, though this is not currently available (29)	Logged	09/15/25	Supplier Records	No comments this reporting period
Data	From conversion interface, APC001, the "Legact Supplier ID" column for the first 120 records does not contain a leading "F" or an "S". (FEIN or SSN) We are interpreting these as FEIN (F). (31)	Logged	10/10/25	Supplier Records (TVI)	No comments this reporting period
Data	From conversion interface, APC001, values in the first 120 records for the "Legact Sequence Number" column only contain one- and two-digit numbers. We will pad these short values with leading zeroes. (32)	Logged	10/10/25	Supplier Records (TVI)	No comments this reporting period
Technology Data	Author Level access (and ODBC connectivity) to the data warehouse is expected later (May).	Logged	02/19/26	FPST Program Managers FDOT Business Owners FDOT Systems dependent on Data Retention & History	New this reporting period
Processes Technology Data	Agency will receive API031 & GLI051 in time for reconciliation and that delivery will be consistent	Logged	02/26/26	FPST Program Managers FDOT Business Owners FDOT Systems dependent on Data Retention & History	New this reporting period
Processes Data	Journal ID can be reliably used to join across extracts as the primary linkage key.	Logged	02/26/26	FPST Program Managers FDOT Business Owners FDOT Systems dependent on Data Retention & History	New this reporting period

RW Task Timeliness

RW Task Completeness

Direct Impact Task Timeliness

Direct Impact Task Timeliness:

Score = 98.51%

- Submitted On Time = 41
- Submitted Late = 6
- Pending Submission = 0

Other Task Timeliness

Other Task Timeliness:

Score = 97.28%

- Submitted On Time = 77
- Submitted Late = 14
- Pending Submission = 0

Direct Impact Task Completeness

Direct Task Completeness:

Score = 95.22%

- Submitted Complete = 38
- Submitted Incomplete = 0
- Completed After Submission = 8

Other Task Completeness

Other Task Completeness:

Score = 90.79%

- Submitted Complete = 49
- Submitted Incomplete = 4
- Completed After Submission = 10

The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

The Change Champion Network composition reflects the completeness of your CCN makeup.

- Unique Filled Role = 5
- Duplicate Filled Role = 9
- Vacant Role = 0

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

FGCC Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	11/25/24		Agency Business System	FGCC is unable to receive our source data from Versa (DBPR). Without this source data FGCC will be unable to create revenue inbound interfaces/spreadsheets for interface testing, UAT, and Go Live.	Increasing	9 (High/High)	This risk is the results of current meetings with DBPR	FGCC is trying to identify alternative methods to create upload interface/spreadsheets	This risk has lead to an issue	Current risk
Open and Monitoring	09/27/24		User Acceptance Testing	FGCC has not found definitive information about the process, procedures, and schedule related Enterprise systems updating the PALM UAT environment during UAT. This impacts our	Increasing	6 (Medium/High)	This risk was uncovered by reviewing the available information from knowledge center and multiple PALM workshops	FGCC requests clarification of the interaction between each Enterprise system and PALM UAT environment during UAT	Additional changes to process, procedures, and testing plans	Current risk

				ability to develop appropriate test plans and may also hinder the ability to input and reconcile PALM UAT data and balances.						
Open and Monitoring	06/28/24		Conversion/Configuration	FGCC has not found any definitive information regarding the scope and depth of the conversion testing. Additionally, FGCC has not found definitive information about the available of outbound interface files that can be used to reconcile conversion data in order to identify conversion errors.	Increasing	4 (Medium/Medium)	This risk was uncovered by reviewing the available information from knowledge center and multiple PALM workshops	FGCC has bene told that the PALM team is working on process changes between Mock 2 and Mock 3 and that the Mock 3 conversion process will provide more insight	Additional changes to our Go Live process and procedures will need to occur in order to identify and address any conversion errors that are identified after Go Live	Current risk
Open and Monitoring	11/25/24		Interface	FGCC has found no definitive information about the schedule and availability of outbound interface files during UAT.	Increasing	4 (Medium/Medium)	This risk was uncovered by reviewing the available information from knowledge center and multiple PALM workshops	FGCC requests clarification that outbound interfaces files will be available on a daily scheduled basis	May impact the ability to complete Testing objectives and reconciliation during UAT	Current risk
Open and Monitoring	09/25/24		User Acceptance Testing	PALM has explained that there are no scheduled resets of initial data loads during UAT. This introduces a risk associated with overall UAT processing. Without reset of initial data loads there is no way to test and confirm fixes associated with errors associated with data conversion that cannot be recreated. This means that the same errors may still occur during Go Live.	Increasing	1 (Low/Low)	This risk was uncovered by reviewing the available information from knowledge center and multiple PALM workshops	FGCC requests that there be a few scheduled resets of initial conversion data	Adding additional steps to process and procedures to identify and address errors in cutover promptly	Current risk

FGCC Issues										
Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period	Comments for Jan. - Feb. 2026
Open	05/12/25		Critical - Impacts the Agency Business System	Agency Business System	FGCC is unable to receive our source data from Versa (DBPR).	This has been an outstanding issue from the beginning	There is no action plan to resolve this issue. FGCC is trying to find alternative methods of getting our revenue data	06/30/26		Current Issue
Open	09/05/25		High - Impacts the User Acceptance Testing	User Acceptance Testing	The Knowledge Center business process screen shots, descriptions, and explanations tend to be incomplete. This coupled with the delay in access to UAT environment impacts the ability to verify and validate interface file layouts, developing updated agency business processes, and finalizing agency system remediation. For example, when you go to the knowledge center for Acquire and Setup Assets 40.1 there are 4 sub process. 40.1.2 Online Asset Add is described as "creates individual asset records from details through direct input in Asset Management (AM)." This page contains zero screen shots and zero instructions for how an Agency AM Asset Processor would input anything. Under 40.1.1 Import Asset Add is intended to describe the import (inbound interface/spreadsheet upload) process. This does have a few screen shots. The screen shots show that the asset module has 6 tabs (general, maintenance, acquisition, location, license, supplemental). However, the knowledge center only provides a screen shot of two of these tabs and therefore the agency can only guess as to what is one the other tabs.	This issue has been identified during interface development and testing	There is no action plan to resolve this issue. FGCC requests that PALM update the knowledge center or provide the agencies access to additional PALM screen shots until access to UAT is granted	06/30/26		Current Issue
Open	09/09/25		High - Impacts the User Acceptance Testing	User Acceptance Testing	The Knowledge Center reports sections appears to be out of date or in some case incorrect. There are multiple reports within the General Ledger Module that appear to be incorrect because they	This issue has been identified during interface development and testing	There is no plan of action to resolve this. FGCC requests that PALM update the Knowledge Center Reporting information	06/30/26		Current Issue

				<p>incorrect because they include a column for GAAFR which is a FLAIR data element that has been replaced and does not exist in PALM. A few examples are GLR085, GLR112, and GLR115.</p> <p>Additionally, there are numerous reports that only provide a message for "more information will be available soon" (GLR132, GLR133, GLR136, GLR139, GLR140, etc.)</p> <p>As we prepare our testing plan for UAT as well as our training plans we are unable to identify what can be tested and what will be available to users and agency business systems. Currently, it has been explained that if some data is not available in outbound interfaces then it would be available via the reporting modules. We are unable to complete these processes and plans without knowing what information may be available.</p>				
Open	09/17/25		High - Impacts the a Interface	<p>Outbound interface GLI001 is unavailable to FGCC. Without the ability for FGCC to download any changes to the PALM COA values it prevents FGCC from developing Agency Business Systems as well as business process and procedures from ensuring that proper COA coding is used when creating and verifying any inbound interfaces and spreadsheets. In addition, FGCC is limited in its ability to develop process and procedures to validate proper coding on any manual transaction prior to direct input into PALM.</p> <p>This outbound interface is not a financial wave interface. GLI001 is a CMS wave interface that has been in production for years.</p> <p>This is not an issue for PALM UAT as the PALM project has made the current COA values available via download from the Knowledge Center for testing and mock conversion purposes. However, these stop gap measures will not continue to be available as we approach Go Live or after Go Live. FGCC is completely blocked from developing automated scheduled jobs to utilize GLI001 in order to maintain accurate PALM COA values within Agency Business Systems, Inbound Interface/Spreadsheet files, and other agency business processes.</p>	This issue has been identified during interface development and testing	FGCC requests that DFS provide this production outbound interface file to FGCC as soon as possible	05/01/25	I have lowered the risk of this issue because the PALM project team is working on making this interface available. I intend to close this issue as soon as I am able to complete a test on this interface.
Open	05/12/25		Low - All impacts no Interface	<p>FGCC will not be able to utilize all of the built-in PALM Interfaces in preparation for UAT and at PALM Go Live. Therefore, FGCC will not be able to utilize all current capability and functionality of the new statewide accounting system. This also means that FGCC will not be able to fully test available functionality during UAT. Additionally, instead of consistent automated business processes, FGCC must utilize a combination of standard interfaces, spreadsheet uploads, and exported hard copy reports in order to piece</p>	This was uncovered during the interface approval process	There is no action plan to resolve this issue. Currently, FGCC must change our desired business process and procedure to accommodate the lack of access to all PALM functionality.	06/30/26	Current Issue

reports in order to piece together process and procedures to send, receive, and reconcile data between agency business systems, PALM, and other state enterprise systems.

FGCC Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
Technology Data	FGCC is making the assumption that all Enterprise systems will establish an environment that will coordinate with PALM UAT and that we will be able to enter transactions/data into the enterprise UAT environment and these transactions/data will be integrated into PALM UAT	Logged	05/01/25	Agency Business Sytems	Current assumption
Technology Data	FGCC will not have a Versa Replacement system in place prior to PALM Go Live	Logged	05/01/25	Agency Business Sytems	Current assumption
Technology Data	FGCC will be able to utilize all PALM interface available to other agencies files at some point after PALM Go Live but will only have the approved PALM Interfaces for PALM Go Live	Logged	05/01/25	Agency Business Sytems	Current assumption

RW Task Timeliness

RW Task Completeness

Direct Impact Task Timeliness

Direct Impact Task Timeliness:

Score = 98.08%

- Submitted On Time = 46
- Submitted Late = 6
- Pending Submission = 0

Other Task Timeliness

Other Task Timeliness:

Score = 96.92%

- Submitted On Time = 81
- Submitted Late = 9
- Pending Submission = 1

Direct Impact Task Completeness

Direct Task Completeness:

Score = 94.90%

- Submitted Complete = 40
- Submitted Incomplete = 0
- Completed After Submission = 11

Other Task Completeness

Other Task Completeness:

Score = 87.74%

- Submitted Complete = 48
- Submitted Incomplete = 2
- Completed After Submission = 12

The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

The Change Champion Network composition reflects the completeness of your CCN makeup.

- Unique Filled Role = 14
- Duplicate Filled Role = 2
- Vacant Role = 0

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

FLHSMV Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	12/20/24		User Acceptance Testing	Supplier ID	Stable	9 (High/High)	Final Supplier ID will be provided by PALM before Go Live. Risk to agency is in not receiving finalized Supplier IDs until or just before go live. In order to successfully match supplier IDs provided by PALM, the FEID is critically needed by FLHSMV, confirmed by Data Manager. The agency will re-examine manual processing time required to match Supplier IDs when Mock 4 data is received (approximately January 2026).	The agency will test Supplier ID fields and matching as received on each iterative Mock Conversion, and will use the iterative Supplier ID test results. Test Supplier IDs were provided in interim to support UAT testing.	The ability to match the Supplier ID (throughout multiple mock conversions) to agency data would be quite taxing and require multiple, additional hours that are not currently included in the plan budget.	The agency continues to monitor this risk.
Open and Monitoring	12/16/25		Interface	Supplier ID - Cycle 3 Interface Testing	Stable	6 (Medium/High)	Complete supplier ID tables will not be available for test during UAT for API and IUI interfaces. Only select supplier IDs will be available for testing in UAT.	The agency will select which supplier IDs to test with each interface. The supplier IDs will vary (i.e., counties, agencies, other vendors, etc).	Agency may not be able to test all supplier IDs during interface cycle 3 testing / End to End testing.	The agency continues to monitor this risk.
Open and Monitoring	04/14/25		Interface	Interface Error File and Summary Logs	Stable	6 (High/Medium)	Interface Error Log layouts (multiple) have not been provided to HSMV.	HSMV has tested Error Files for API002 from PALM (during interface testing). While PALM did provide additional fields in the error logs for easier identification, HSMV hasn't been able to complete our automation process as we had with FLAIR. This processing is still in development and will be better tested in full UAT.	The agency was advised by PALM that agencies will receive error files and summary logs at Interface Testing. FLHSMV would need to re-evaluate impact if the error files and summary logs are NOT able to be read (further development and testing may be required). Resolving the errors may be delayed in UAT.	The agency continues to monitor this risk.
Open and Mitigating	12/20/24		Staffing/Resource Availail	Resources - Accounting (training / up-skilling for PALM)	Stable	4 (Medium/Medium)	The agency has identified a need to cross-train accounting staff, and allied teams, to learn new / daily business processes in addition to testing the PALM system and learning adjacent systems.	HSMV is actively working to cross-train existing staff, and to provide Florida PALM training and job aides.	Training challenges could impact successful PALM implementation and go-live experience during a critical period.	The agency continues to monitor this risk.
Open and Mitigating	09/01/23		Agency Business System	FAME application	Stable	2 (Medium/Low)	HSMV processes large volume of data through its FAME application (Revenue Distribution, WEX, Goodyear, PRIDE, etc.). It is imperative that the interfaces and reports work properly when tested.	HSMV is working on developing multiple interfaces and has begun developing reports. Changes to the payment batch jobs are in progress.	The agency could have impacts to readiness for PALM go-live if the FAME application is not remediated.	The agency continues to monitor this risk.

FLHSMV Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026

FLHSMV Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
Data	Florida PALM will provide similiar functionality as FLAIR@HSMV	Logged	08/31/23	Impacted Stakeholders include all end users.	This assumption remains valid.
People Technology	Departmental technical resources will be available to update internal databases and reports for distributions from FRVIS to FAME for the new PALM Account codes.	Logged	08/31/23	Impacted ABS could include FAME, Hireback, Asset Management, Service Now, and spreadsheet uploads as they pertain to FAME. Impacted Stakeholders include All End Users and potentially other agencies.	This assumption remains valid.

FSDB Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	06/02/25		Conversion/Configurator	Local fund loss	Increasing	9 (High/High)	Local funds hold over \$36.0 million dollars in donations. PALM has proposed eliminating these local funds which will remove them from the CAFR, and Agency GL.	DFS A&A proposes to combine local funds into the GR funds as a solution, separated by a unique speed key.	Commingleing of funds for different purposes is not a good idea as proposed. Maintaining a local fund apart from other funds is the real solution.	No change
Open and Monitoring	11/12/25		Conversion/Configurator	Missing Admin Fund	Increasing	9 (High/High)	Admin Fund 4890-20-2-021007 is missing from dropdown tabs	We will need the Admin Fund to be present in PALM to be able to transfer between State funds.	Loss of the Admin fund will make temporary inter State fund transfers difficult to track.	No change
Open and Monitoring	01/30/24		Conversion/Configurator	Loss of EO field	Stable	6 (Medium/High)	Mitigation seems unlikely since PALM will not have an EO field that is used for grant reporting.	None as of yet	Loss of consistent grant reporting	No change
Open and Monitoring	01/30/24		Conversion/Configurator	Loss of on demand payments	Stable	6 (Medium/High)	It is unknown what can take place of on	None as of yet	Inability to create on demand payments	Resolution appears to be at hand

FSDB Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	06/02/25		High - Impacts the at	Conversion/Configurator	Local fund	PALM proposes to eliminate local fund 20-8-082109, 20-8-84301, and 71-8-084209 which collectively hold over \$33.3 million dollars in Agency managed donations owned by the State. These local funds have been authorized and in use for well over 20 years and are needed to manage received donations. We expect them to be active in PALM.	PALM must convert these funds when converting from FLAIR to avoid the loss of \$33.3 million dollars from State assets not being reported in the CAFR.	During conversion	No change
Open	01/30/24		High - Impacts the at	Conversion/Configurator	Loss of OCA/EO fields	Use of FLAIR OCA/EO fields are more effective than speedkeys and help collect data in a more cohesive manner.	None likely	None planned	No change
Open	01/30/24		High - Impacts the at	Conversion/Configurator	Loss of on demand payments	It is unknown what can take place of on demand payments	No replacement evident	None planned	No change
Open	11/12/25		High - Impacts the at	Conversion/Configurator	Administrative fund is missing in workbooks.	DFS directed us to use the Admin fund to hold the local funds dollars during conversion	Absent the Admin fund, we have no place to collocate the Endowment funds in during conversion.	None planned	No change
Open	10/01/25		High - Impacts the at	Conversion/Configurator	Grant fields are missing from FACTS extract and cannot be updated.	Available grant fields in PALM are not current resulting is most missing that are already in FACTS.	RC is pursuing PALM tech staff on uploading the most current data extract from FACTS.	TBD	No change

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

FWC Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	11/06/23		Staffing/Resource Availability	Limited subject matter expert (SME) availability	Increasing	6 (Medium/High)	Our agency is short-staffed, therefore, we have limited access to SMEs	1. Identify any planned schedule issues 2. Obtain and include backup resources in activities	If SMEs aren't available to learn and test the system, we will have issues once we go live.	We are continuing to monitor this risk and work with management to provide support, as possible, to the testers.
Open and Monitoring	11/06/23		Staffing/Resource Availability	Team Attrition	Stable	6 (Medium/High)	People come and go	1. Ensure sufficient cross training in all project activities 2. Establish and enforce adequate documentation standards	If team members leave, they take all their knowledge with them, making it that much harder for whoever is left once we go live.	We are continuing to monitor this risk.
Open and Monitoring	11/06/23		Training	Resistance to change	Stable	4 (Medium/Medium)	We have a workforce that is familiar with current processes, any type of change, causes fear amongst the team members.	1. Include impacted stakeholders early in the process and often 2. Educate the reason for the change and impact	If folks don't get on board with the changes, we will have issues once we go live	We are continuing to monitor this risk.
Open and Monitoring	08/09/24		User Acceptance Testing	There is no communication plan	Stable	4 (Medium/Medium)	Agencies are very dependent upon the	1. FWC Analysis, design, and system	If we learn of enterprise changes too late in the	We are keeping the risk rating the same at the

				between PALM, Enterprise systems and the agencies. FWC is unable to accurately define impacts to processes and potentially agency business systems.			enterprise systems, since Florida PALM is not managing a communication plan as part of the process, agencies are left hoping there is communication going to occur.	remediation is being based on calculated assumptions	process, we will be at risk for not being able to perform the needed activities within those applications at go live.	moment. All the enterprise systems seem to be on-track, except PCard. Since we have heavy PCard usage, we are not comfortable downgrading this risk yet.
Open and Monitoring	11/06/23		Interface	Not all PALM interfaces are fully designed/documented, additionally currently defined interfaces are subject to change.	Stable	1 (Low/Low)	Since Florida PALM is using an agile development approach interfaces aren't fully designed and documented prior to agencies needing to do development/remediation activities	1. FWC Analysis and design is being based on calculated assumptions	If interfaces change too late in the game, we will be at risk for not being able to process incoming files once we go live.	We are continuing to monitor this risk.

JAC Risks

Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Monitoring	04/30/25		Deployment/Cutover	Downtime during transition	Increasing	6 (Medium/High)	In the period between FLAIR sunseting and PALM go-live, JAC risks violation of prompt payment statutes, and anticipates significant transactional volume backlog and increased calls from vendors regarding payment schedules. JAC anticipates there to be an extended period, ex: 2-4 weeks, to work through the backlog once PALM is live.	Monitor schedule and plan accordingly, constant communication with the JROs and vendors on the delay and timelines.	This will cause a significant disruption to the workflow as well as compliance and interest penalties owed to vendors. JAC will work through the backlog as quickly as possible.	JAC validates this is an active risk. In discussions with JAC and JRO staff, the risk is likely to become an issue and will result in multiple downstream impacts. JAC's mitigation plan for this risk is to communicate with affected stakeholders prior to the FLAIR sunset date. Stakeholders will be encouraged to submit invoices in advance of published cutoff date (to be determined) or risk significant delay in payment.
Open and Monitoring	05/12/25		Post Implementation	Transfer of FLAIR IW data to PALM DW fails.	Stable	3 (High/Low)	The Florida PALM plan indicates that FLAIR IW data will be extracted and stored in PALM DW. If this process fails, the agency will be without historical data needed for reporting	As of March 2026, we will monitor the risk and updates from the Florida PALM team related to DW. In the future, we may need a more robust plan. At this time, JAC does not	The agency would be unable to access data to be able to complete reports using historical data. The Risk would elevate to an issue. At this time, JAC does not have a viable response	JAC recognizes this is still an active concern. JAC is monitoring and intends to further investigate during the next reporting period to determine the real likelihood and impact if risk were to become an

								have a viable mitigation plan to address the risk.	plan if this were to become an issue, however JAC would be required to develop a plan to store and maintain large amounts of revenue and expenditure transaction data, along with a reporting tool to meet future data requests & requirements.	issue.
Open and Monitoring	05/09/25		Agency Business System	Business Management Operations System (BOMS)	Decreasing (High/Low)	JAC, and the Judicial Related Offices (JROs) JAC serves, utilize an external business system (BOMS) for core business functionality. BOMS requires substantial remediation efforts to meet PALM requirements, including system and process-based changes.	JAC formed an Advisory Council comprised of JRO leaders to work with the vendor on remediation activities. JAC will continue to assist the Advisory Council when requested regarding activities related to BOMS, to support the successful remediation of the system and associated processes.	If BOMS remediation is unsuccessful, substantial manual workarounds would need to be developed to continue core business operations across JAC and the JROs it serves.	JAC validates the BOMS system readiness is an active risk. There are several outstanding data and configuration decisions related to BOMS due to PALM-impacted data and workflow outcomes. The BOMS enhancement project risks running out of time to incorporate relevant data into system development to provide sufficient time for testing and training prior to go-live.

LEG Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	03/09/26		Low - All impacts not listed	Interface	New versus update issue for PRI001 and PRI003	<p>Related Dependencies:</p> <ol style="list-style-type: none"> 1. We must have a Personal (Employee ID) and Job record (Employee ID/Appointment ID) established to pay an employee. 2. The same Employee ID and Appointment ID combo must be used throughout the daily and payroll interfaces to create an employee and tie all earnings and deductions together. 3. Employee ID, Appointment ID, and SSN cannot be updated through PRI003. That will require a manual process that is being discussed by FLP. 4. We cannot have duplicate SSNs in FLP, so each employee will have one Personal record. 5. People First and Legislature will share the employee's Personal record, and their Job record will be updated with top of stack as the employee moves around. 6. The People First assigned Employee ID will need to replace any temporary ID, such as LEG##### for Pages. 	<p>LEG workaround for PRI003/PRI001: HL sends a N with the employees People First ID on PRI003. HL will receive an error for duplicate SSN. The Personal record already exists for the employee. HL will need to request a manual update to any field that has changed or resend the line with a U. The home and work addresses would be the most updated. HL sends the Employee ID and new Appointment ID on PRI001. The Job record will load using the existing Employee ID creating a new Employee Record to cover the new Appointment ID. HL sends PRI005/PRI006 to pay the PF Employee ID/Appointment ID combo.</p> <p>LEG workaround for PRI003/PRI001 Scenario 2: Legislature hires a new Page that previously worked at another agency. HL sends a N with the employees LEG##### ID on PRI003. HL sends a N with the employees LEG##### ID on PRI003. HL will receive an error for duplicate SSN. The Personal record already exists for the employee with their People First Employee ID. HL will need to request a manual update to any field that has changed or resend the line the following day with a U using the People First Employee ID. The home and work addresses would be the most updated. The key here is making sure you use the already existing People First Employee ID. HL sends the LEG##### on PRI001. HL will receive an error for Employee ID not found. HL will need to resend the line with a U using the People First Employee ID and LEG##### ID for the Appt ID if time permits for payroll processing. Otherwise, we will need to manually enter the Job data if payroll is being processed that day. The key here is making sure you use the already existing People First Employee ID. HL sends PRI005/PRI006 to pay the employee. The employee will not be paid if the LEG##### ID is used for the Employee ID. The employee will be paid correctly if the PF Employee ID/ LEG##### Appointment ID combo is used.</p>	01/13/26	Documenting this issue to revisit after go-live to find a resolution to avoid manual workaround by LEG.

LEG Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
People	Will not lose project resources to competing priorities, retirements or other turnover.	Logged	07/01/23	Temporary impact to project	Appropriate hires were made over the past year to mitigate the issue. But this is still a good assumption to maintain for awareness.

Agency Reported

The Risks, Issues, and Assumptions tables below display only items that were marked confirmed and were opened/logged, closed/resolved or active during the reporting period.

SCS Risks										
Status	Date Opened	Date Closed	Primary Risk Category	Risk Title	Trend	Risk Rating	Background	Monitor/Mitigation Plan/Resolution	Impact if Risk Becomes an Issue	Reporting Period Comments for Jan. - Feb. 2026
Open and Mitigating	06/11/25		User Acceptance Testing	If SCS can not process end-to-end transactions at or above FLAIR transaction times, (i.e., invoice-to-warrant within 48 hours or procure-to-pay within 48 hours), SCS will not certify that the PALM system and Enterprise Partners are ready for SCS to go live.	Increasing	9 (High/High)	SCS has requested PALM to include formal UAT testing scenarios that exercises PALM processing times (singular) and Enterprise Partners (dual processing dependencies)	SCS has requested PALM to include formal "performance based" UAT test scenarios that includes multiple end-to-end transaction types that measure life-cycles timings in PALM and Enterprise Partners against what FLAIR and Enterprise Partners achieve today. Service Level Agreement (SLA) targets need to be defined and achieved with UAT testing for SCS to accept the PALM and Enterprise Partner systems for go-live.	SCS will not accept the PALM solution for go-live.	SCS is very early in the process of executing and validating PALM, EBS and ABS end-to-end testing scenarios. Over the next 20 - 22 weeks, our hope is that our full suite of testing scenarios will help build end-user confidence with PALM, EBS and ABS application features and capabilities.
Open and Mitigating	05/02/25		User Acceptance Testing	If PALM is not fully operations in UAT, then SCS schedules, timelines, and delivery dates in SCS IMS will need to be delayed with dependencies adjusted. Depending on what PALM UAT functionality is delivered, SCS's will need to reassess which parts of our Financial, HR/Payroll, and Reporting operations PALM will be able to service. To ensure proper alignment is in place to operate in PALM throughout UAT and possibly Training and Production, SCS must perform additional analysis of our business process models, staffing levels, resource structures, workflows, operating procedures, and changes to internal Agency Business Systems to determine our SCS functional and technical operational models.	Increasing	6 (High/Medium)	Milestones missed, Schedules and Timelines have been extended	Requested through IV&V to have PALM communicate directly to all agencies their progress against plan on establish "control thresholds information" on a regular basis. Following up with PALM POC's and other Agency contact.	SCS schedules, timelines, and delivery dates in SCS IMS will be delayed with increases in time and costs.	SCS is validating PALM baseline functionality delivered in UAT. However, since we are early in test execution, end-to-end scenarios will be executed over the next 6 - 8 weeks in order to help build end-user confidence in the PALM application feature and capabilities.
Open and Mitigating	05/02/25		User Acceptance Testing	If Enterprise Partner applications are not operational in UAT, then SCS schedules, timelines, and delivery dates in SCS IMS will need to be delayed with dependencies adjusted. Enterprise Partners are critical in processing SCS Financial, HR/Payroll, and Report distribution information. Depending on what functionality is delivered, SCS's will need to reassess which parts of our Financial, HR/Payroll, and Reporting operations PALM and Enterprise Partners will be able to service. To ensure proper alignment is in place to operate in PALM throughout UAT and possibly Training and Production, SCS must perform additional analysis of our business process models, staffing levels, resource structures, workflows, operating procedures, and changes to internal Agency Business Systems to determine our SCS functional and technical operational models..	Increasing	6 (High/Medium)	PALM has encouraged Agencies to take on more responsibilities by directly engaging Enterprise Partners (EP). This approach can overwhelm EPs.	SCS is focusing on internal ABS testing and defining where Enterprise Partners can be leveraged. Also, communicating with external partners our requirements & expectations for successful integration support Continuing to reach out to Enterprise Partner (EP) POC, PALM POC's, and other Agency contacts. Attending EP workshops and demos as they are made available.	SCS will not be able to process critical transactions end-to-end in PALM resulting in schedules, timelines, and delivery date delays.	SCS is validating PALM baseline functionality delivered in UAT. However, since we are early in test execution, end-to-end scenarios that include Enterprise Partners will be executed over the next 8 - 12 weeks. These tests will help show reliability with inner-application accuracy and will help build end-user confidence in the EBS and PALM application features and capabilities.
Open and Mitigating	05/02/25		Staffing/Resource Availal	If SCS does not receive supplemental funding as requested, then SCS's ability to migrate and transform to PALM Financials, HR/Payroll, and Reporting at go-live will be at risk. Receiving requested funds will allow SCS to properly prepare, migrate, and transition to PALM Financial, HR/Payroll, and Reporting operations	Increasing	6 (High/Medium)	SCS will submit supplemental funding request and justification to support additional SCS resources	Monitoring funding allocations	SCS's ability to migrate and transform to PALM Financials, HR/Payroll, and Reporting at go-live will be at risk.	Receiving requested funds will allow SCS to properly prepare, migrate, and transition to PALM Financial, HR/Payroll, and Reporting operations within schedules, timelines, target delivery dates, and costs.

				within schedules, timelines, target delivery dates, and costs.						
Open and Mitigating	06/06/25		User Acceptance Testing	If PALM Business Intelligence, Reporting and Data Warehouse is not similar to FLAIR functionality in UAT, then SCS will have to modify our current PALM defined business process models, staffing levels, resource structures, workflows, operating procedures and changes to internal Agency Business Systems which will delay SCS schedules, timelines, and delivery dates.	Increasing	4 (Medium/Medium)	In July 2024, prior to opening a Risk, SCS sent a question to the PALM Project Team regarding Financial Transaction Details and received a response in December. This did not satisfy SCS reporting requirements that are provided in FLAIR today.	Following up with PALM POC's and other Agency contacts. Sent an email to PALM on June 06/06/2025 requesting similar FLAIR Data Warehouse capabilities and for PALM to conduct a session discussing reporting solutions/alternatives with agencies. SCS has received responses from PALM around operationalizing PALM delivered Business Intelligence, Reporting and Data Warehouse functionality. SCS is currently set to begin testing internal ABS testing scenarios that will accommodate "end-to-end" functional scenarios between PALM, SCS, & Enterprise Partners. However, based on PALM's responses to SCS questions around PALM delivered Business Intelligence, Reporting and Data Warehouse utilization, SCS is having to modify our current PALM defined business process models, staffing levels, resource structures, workflows, operating procedures, and changes to internal Agency Business Systems. SCS Transaction History will be our heavy lift on how to retrieve transactional data fields from a wide array of PALM tables.	SCS will not be able to properly provide pre-defined and custom reports for individuals, units, organizations, locally, and remotely (Florida-wide SCS community).	SCS has been working with the DW/BI demos and updated information released by PALM. SCS is very early in the process of validating PALM BW/BI functionality delivered in UAT. However, as SCS executes more end-to-end testing scenarios over the next 20 - 22 weeks, our hope is that our end-user confidence will grow in the PALM application feature and capabilities, and our ABS Transaction History capabilities to satisfy SCS reporting and decision support requirements.
Open and Mitigating	10/07/25		Interface	If PALM Interfaces do not provide Asset information that relates to specific payment transactions through the API031 Outbound Voucher and Payment Extract interface, then SCS will not be able to load that information into our ABS Trans-History application for Agency to utilize	Stable	4 (Medium/Medium)	SCS requires Asset information that relates to specific payment transactions be available for our ABS Trans-History application for users to utilize	SCS is looking at alternate ways to load Asset information that relates to specific payment transactions.	SCS will not be able to load that information into our ABS Trans-History application for users to utilize.	SCS is very early in the process of executing and validating PALM, EBS and ABS interface end-to-end testing scenarios. Over the next 20 - 22 weeks, our hope is that our full suite of testing scenarios will help build end-user confidence with PALM, EBS and ABS application features and capabilities within the interface requirements..
Open and Mitigating	10/31/25		Agency Business System	If SCS does not receive clear instructions from People First and PALM on how to perform our annual Leave Liability and ARS reconciliation, then SCS time-to-close will be extended to allow for additional manual processing to complete our Leave Liability balance postings to DFS Financials.	Increasing	4 (Medium/Medium)	This situation exists because SCS does not use People First for employee time entry processing. SCS utilizes two ABS applications instead, ARS for employees to enter their time throughout the fiscal year and Leave Liability to reconcile and post their liability balances to DFS Financials at yearend.	SCS must interpret any People First and PALM HRMS changes within the context of our configuration, then reach out when necessary for clarity.	SCS time-to-close will be extended to allow for additional manual processing to complete our Leave Liability balance postings to DFS Financials.	People First and PALM has begun to provide agency interaction relating to SCS changes and what is mainly needed to be successful with ARS and Leave Liability changes caused by People First and PALM integration. SCS ABS responsibilities for time management and reporting will become clearer when joint testing begins between People First, PALM and SCS. As SCS performs manual Time related data entry, we will have a better understanding of the changes needed or not to our ABS and their accuracy.
Open and Mitigating	05/02/25		Identity Provider (IdP)	If SCS domain transition from ".org" to ".gov" is not complete before PALM UAT is available, then SCS users may have trouble accessing the PALM UAT environment resulting in falling behind with migration and transformation activities in UAT.	Stable	1 (Low/Low)	This change has impacted current SCS Cash Management (CM) users' ability to access the current PALM CM application. If these changes aren't rolled out before PALM UAT begins, it will affect timely submission of upcoming tasks and can also affect SME access to the UAT environment.	SCS is working with PALM IT with case number CS0012635 - to resolve any .gov related access issues.	SCS users may have trouble accessing the PALM UAT environment resulting in falling behind with migration and transformation activities in UAT.	SCS continues to migration more and more SCS staff to the target ".gov" domain. SCS is becoming confident with our transition timeline to PALM go-live schedule.
Open and Mitigating	05/02/25		Conversion/Configurator	If SCS does not understand how PALM is converting FLAIR Vendor/Sequence Numbers to PALM Supplier Numbers, then SCS will not be able to	Stable	1 (Low/Low)	SCS is working with PALM and MFMP to determine how FLAIR Vendor/Seq # are converted to PALM Supplier #	SCS is working with PALM and MFMP to determine how FLAIR Vendor/Seq # are converted to PALM Supplier #	SCS will not be able to properly process Contracts and Supplier transactions correctly.	SCS continues to work with PALM's Supplier/Vendor generated files. As SCS moves further into UAT testing, hopefully the accuracy and reliability

properly process
Contracts and Supplier
transactions correctly.
FI AIR Vendor/Sec

of the new generated
Suppliers/Vendors will
satisfy all SCS
requirements with our
ARS, FRS and PALM

SCS Issues

Status	Date Opened	Date Closed	Priority	Primary Issue Category	Issue Title	Background	Action Plan	Planned or Actual Resolution Date	Reporting Period Comments for Jan. - Feb. 2026
Open	05/07/25		High - Impacts the ability	Business Process Change	SCS is adopting new PALM HR/Payroll business processing requirements, designs, & reporting: - This will impact internal SCS ABS ARS Timekeeping, Leave Liability reconciliation with PALM Financials and SCS HRIS payroll reporting from PALM	Implementing the information collected during the PALM HR/Payroll workshops. SCS is conducting internal design sessions to update agency procedures.	Validating updated processing with SCS HR, F&A, & OIT	07/31/25	People First and PALM has begun to provide agency interaction relating to SCS changes and what is mainly needed to be successful with ARS and Leave Liability changes caused by People First and PALM integration. SCS ABS responsibilities for time management and reporting will become clearer when joint testing begin between People First, PALM and SCS. As SCS performs manual Time related data entry, we will have a better understanding of the changes needed or not to our ABS and their accuracy.

SCS Assumptions

Critical Operational Elements	Assumption	Status	Date Logged or Removed	Impacted Stakeholder(s) and/or System(s)	Reporting Period Comments for Jan. - Feb. 2026
People Processes Technology Data	SCS is assuming that PALM will provide full application functionality for all modules & business processes to support SCS's modified production performance model. SCS is creating internal ABS testing scenarios that will integrate a complete "end-to-end" testing scenario between SCS, Enterprise Partners, & PALM	Logged	06/06/25	SCS Business Units: - F&A - Budget - Contracts & Grants - HR/Payroll - OIT - Courts Administration	SCS is validating PALM baseline functionality delivered in UAT. However, since we are early in test execution, end-to-end scenarios will be executed over the next 6 - 8 weeks in order to help build end-user confidence in the PALM application feature and capabilities.
People Processes Technology Data	PALM related changes to Leave Liability and ARS will not be processed until June 2027, post PALM go-live date targeted for January 2027. There will be a grace period from PALM's go-live date to the date when Leave Liability and ARS will be processed for fiscal end-of-year reconciliation and posting to PALM	Logged	10/28/25	SCS Business Units: - F&A - HR/Payroll - OIT	People First has begun to provide agency interaction around SCS impacts and what is needed to be success with People First and PALM. SCS has ABS responsible to time management and reporting that helps SCS perform manual of Time related data into People First. Once SCS, People First and PALM begin to perform integration testing, we will understand better our ABS changes and their accuracy.

Agency Sponsor Confirmation

As Agency Sponsor, I understand my role and responsibility for monitoring and reporting on my agency's readiness status. I have reviewed and confirmed the accuracy of my agency's readiness status as reflected in this dashboard.
