Other Accumulator 1 (OA1)	PC Subcategory*

\*ChartField values set up and configured differently

# SET UP AND MAINTAIN CHART OF ACCOUNTS

BUSINESS PROCESS

# Business Process

## Set Up and Maintain Chart of Accounts

### ▶ 10.1.1 Agency Add or Modify ChartField Values

- Agencies will determine the need for agency specific ChartField values and initiate the process to add or modify the value within the agency. This includes creation and maintenance of the Budgetary Value Combination Edit.

### ▶ 10.1.2 Enterprise Add or Modify ChartField Values

- The Department of Financial Services (DFS) maintains statewide ChartField values (e.g., new funds or budget entities) and related configurations including attributes, trees, and combination edits. DFS may also initiate the add/update of ChartField values. Agencies may request the configuration of statewide values which will be reviewed by DFS and configured if approved.

# Business Process

## Set Up and Maintain Chart of Accounts

### ▶ 10.1.3 Enterprise Add or Modify Fund Values

- Funds are authorized by law and may have one or many transactional funds depending on agency operational and reporting needs. Agencies can request DFS to configure transactional funds for agency business operations.

### ▶ 10.1.4 Enterprise Add or Modify Budgetary ChartField Values

- Budgetary values are received from LAS/PBS on an ongoing basis. Florida PALM ChartFields for budgetary values are only added upon receipt of values from LAS/PBS. Agency users have access to review and confirm that all needed ChartField values are active for the new fiscal year.

# Business Process

## Set Up and Maintain Chart of Accounts

- ▶ 10.1.5 Enterprise Set Up and Maintain Trees/Combination Edits
  - DFS maintains Trees and ChartField Combination Edits for statewide use in recording and reporting within Florida PALM.
  
- ▶ 10.1.6 Agency Set Up and Maintain SpeedKeys
  - Agencies can add SpeedKey values based upon internal needs. These are preconfigured ChartField combinations that can reduce the time required to enter ChartField values during transactional entry.

# INTERFACES AND REPORTS

## CHART OF ACCOUNTS

# Interfaces and Reports

## Set Up and Maintain Chart of Accounts

### Interface Catalog

Interface Catalog

An Interface Catalog is being provided to identify the interfaces that will be available for the Florida PALM transition. These interface offerings may evolve as agencies provide feedback to the Project Team. **NOTE: This catalog includes details for interfaces available today (CMS Wave) as well as interfaces planned for Financials and Payroll Waves. Layouts and sample data will be added to planned interfaces in the coming months.**

Interface Catalog  
Change Log

### Conversions Catalog

Conversions Catalog

A Conversions Catalog is being provided to identify the conversions that will be available for the Florida PALM transition. The catalog will serve as a reference of available conversions for business systems to convert data into Florida PALM for tracking and recording purposes. These conversion offerings may evolve as agencies provide feedback to the Project Team. **NOTE: This catalog includes a limited amount of detail for conversions planned for Financials and Payroll Waves. In addition to adding more conversions, layouts and sample data will be added to planned conversions in the coming months.**

Conversions Catalog  
Change Log

### Reports Catalog

Reports Catalog

The Reports Catalog is a resource for users to identify and understand the planned reports for Florida PALM. The Catalog identifies reports implemented as part of CMS Wave and reports planned for Financials Wave. Additional reports and samples will be added as design activities are completed.

Overview

Overview provides guidance for using the Reports Catalog.

# Budget Journals Overview

## Commitment Control (KK Ledger) Overview

- ▶ Commitment Control Ledgers (KK) are tightly integrated with the General Ledger but is used for budgetary control. Commitment Control is the structure and rules setup that defines the budget and cash checking process. KK Ledgers enable budget rules to control and track budget, cash, expenses, and revenues.
- ▶ Commitment Control Ledgers maintain appropriations, releases, reserves, and Fund cash by which budgetary and financial controls will be managed and financial transactions tracked and recorded.

# Budget Journals Overview

## Terminology

- ▶ Budget Period
- ▶ Budget Date

# Budget Journals Overview

## Florida PALM Ledgers

- ▶ Appropriations (CC\_APPROP)
- ▶ Releases (CC\_RELEASE)
- ▶ Reserves (CC\_RESERVE)
- ▶ Allotments (CC\_ALLOT)
- ▶ Projects (CC\_PROJ)
- ▶ Cash (CC\_CASH)
- ▶ Investments (CC\_INVEST)
- ▶ Revenue (CC\_REVENUE)

# Budget Journals Overview

## Commitment Control Date Concepts – Budget Period

•Example of Budget Period field on Budget Journal line:

The screenshot shows the FloridaPALM web interface for entering budget journals. The 'Budget Lines' tab is active, displaying a table of budget lines for Unit 11000, Journal ID 0000623013, and Date 03/31/2023. The 'Budget Period' column is highlighted with a red box, showing the value '2023' for all seven lines. The table includes columns for Line, Ledger, Budget Period, SpeedType, Account, Fund, Budget Entity, Category, Set Options, Currency, and Amount.

Line	Ledger	Budget Period	SpeedType	Account	Fund	Budget Entity	Category	Set Options	Currency	Amount
1	C_APPR_BD	2023		Q 7	10000	11110000	093000	Set Options	USD	65,000,000.000
2	C_APPR_BD	2023		Q 7	10000	11210000	093100	Set Options	USD	55,000,000.000
3	C_APPR_BD	2023		Q 7	10000	11310000	093212	Set Options	USD	25,625,000.000
4	C_APPR_BD	2023		Q 7	10000	31100500	091010	Set Options	USD	5,000,000.000
5	C_APPR_BD	2023		Q 7	10000	11310000	100565	Set Options	USD	65,000.000
6	C_APPR_BD	2023		Q 7	23390	11310000	093212	Set Options	USD	2,000,000.000
7	C_APPR_BD	2023		Q 7	10000	11110000	103241	Set Options	USD	75,000.000

# ENTER AND PROCESS BUDGET JOURNALS

BUSINESS PROCESS

# Business Process

## Enter and Process Budget Journals

### ▶ 20.1.1 Enterprise Post Appropriations

- Florida PALM will receive statewide appropriations from the Executive Office of the Governor/Office of Policy and Budget (EOG/OPB) who develops and publishes appropriations on an annual basis in the LAS/PBS.

### ▶ 20.1.2 Manage Agency Allotments

- Agencies are notified that GAA/Adjusted Appropriations are posted in Florida PALM. Agencies create budget allotments of their appropriations to support budget management methods.

# Business Process

## Enter and Process Budget Journals

### ▶ 20.1.3 Enterprise Budget Ledger Reconciliation

- It is essential for Florida PALM and LAS/PBS budget ledgers to be reconciled daily throughout the FY to ensure budget ledgers remain balanced.

### ▶ 20.1.4 Agency Estimated Revenue

- Revenue estimates are an important tool for planning purposes to ensure that agencies have adequate resources to support the agency's core mission.

# MANAGE AGENCY ALLOTMENTS

DEMO

# CONVERSIONS

## APPROPRIATIONS & ALLOTMENTS

# WRAP UP

# Agency Data Activities

- ▶ Information from business systems needed to transact going forward will be converted using **Conversion Files**
  - Examples:
    - Opening Balances for the General Ledger
    - Suppliers & Employees
    - Subsidiary Records (Detail Ledgers)
  - Sources:
    - From FLAIR (Managed by Project)
    - From Agency Business Systems (Provided by Agencies)
- ▶ System values and agency specific titles are configured based on information collected in **Configuration Workbooks**
  - Examples:
    - Transaction Statuses
    - Agency Budget Entities
  - Types:
    - General/System Values (Managed by Project)
    - Agency Specific Values (Provided by Agencies)

Conversions

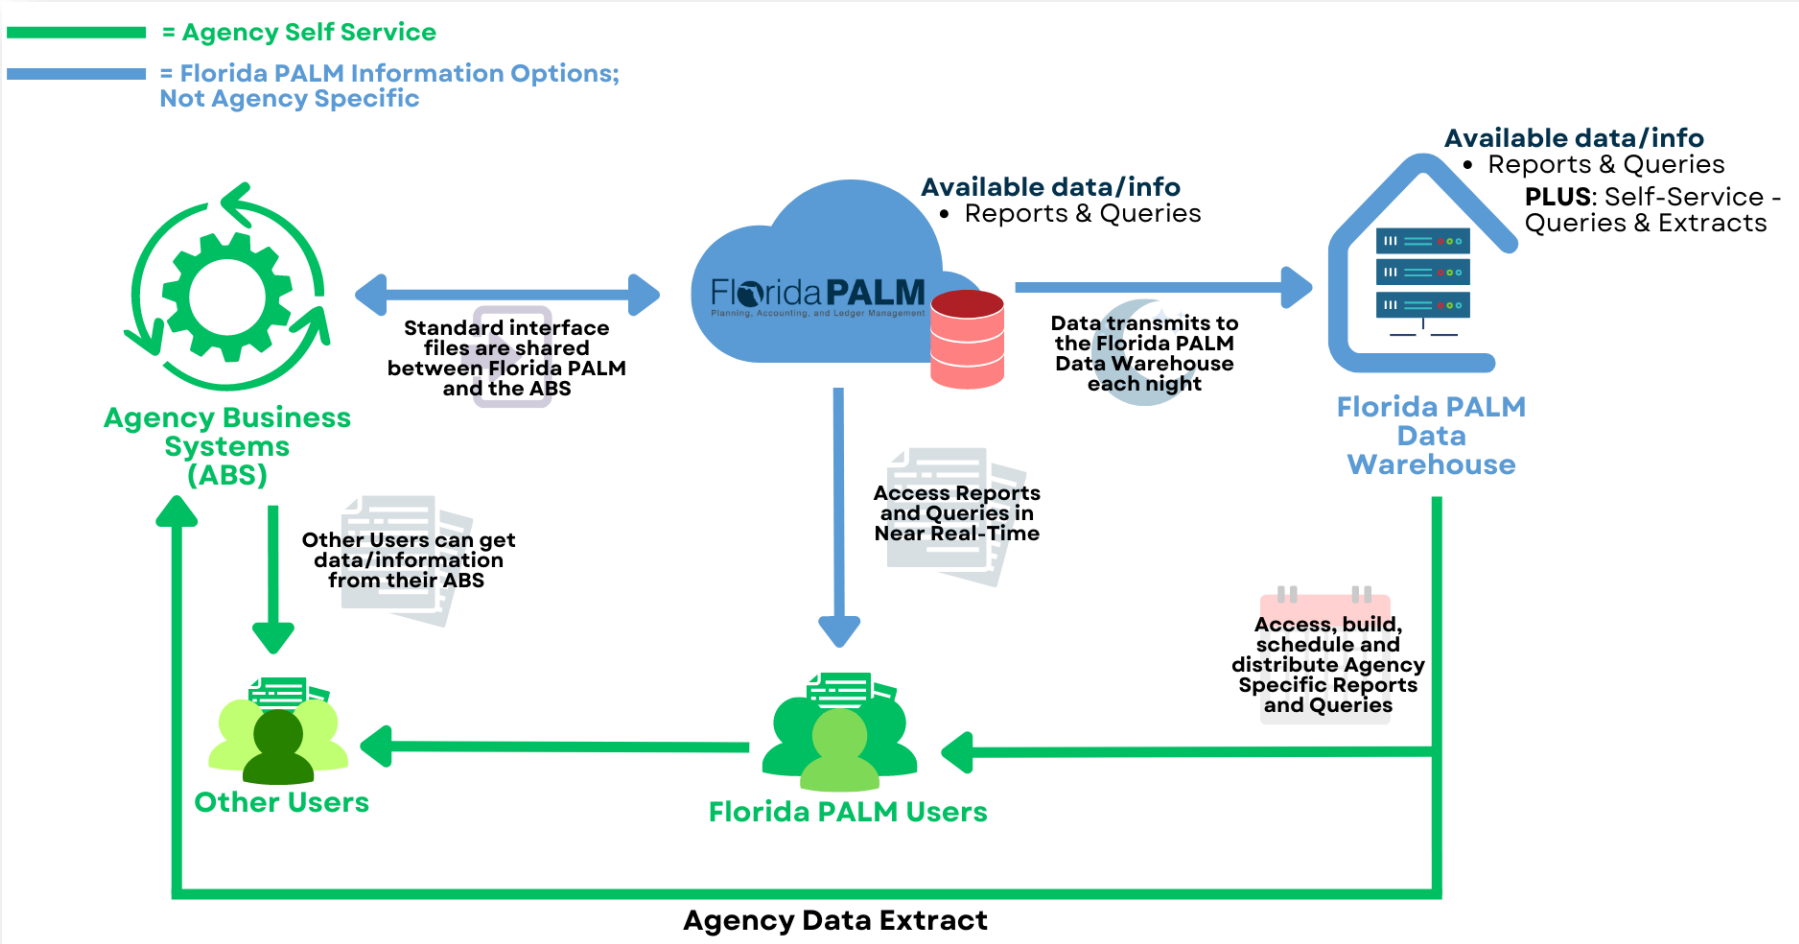

Configurations

# Agency Data Activities

# Data Availability

# Key Things to Know - Interfaces

- ▶ Support integration between agency business systems and Florida PALM
  - Configuration Values (e.g., COA, SpeedKey)
  - Module Specific Setup (e.g., Assets, Customers, Suppliers)
  - Transactional (e.g., payments, deposits)
- ▶ Not intended to replicate current FLAIR interfaces (e.g., TR2 daily transaction file)
- ▶ Standard Pipe Delimited File Format (with some exceptions)
- ▶ Interface files exchanged via MFT
- ▶ Processed according to batch schedule
- ▶ Web service usage very limited for Financials Wave (only where needed to support enterprise business integrations) and where it makes business and technical sense
- ▶ Layouts and sample data will be published to Interface Catalog at the conclusion of each Design Segment

# Picking the Right Interface

- ▶ How should we choose the right interface layout and approach?
  1. Analyze and document current agency business systems and their interactions with FLAIR (e.g., batch file load, scripting)
  2. Participate in the Design Workshops to understand how future-state processes will work, the available interfaces, and the intended use
  3. Collaborate with functional and technical SMEs and select the Florida PALM interface(s) to support business system transactional processing
  4. Plan to develop agency-unique extracts using the Florida PALM Data Warehouse for data needs that cannot be met with standard interfaces
