Business Process Overview

The Department of Financial Services (DFS), Division of Treasury (Treasury) records investment security information organized in the following portfolios: Liquidity, Ultra-short Duration, Short Duration, Intermediate Duration, and Long Duration. The Liquidity, Ultra-short Duration, and Short Duration investments are purchased and managed by the Treasury Investment Section. The Intermediate and Long Duration investments are purchased and managed by contracted external investment managers.

Certain funds are invested, which include General Revenue, trust, and agency funds, as well as funds from certain boards, associations, or entities created by the State Constitution or law that are a part of the Special Purpose Investment Account (SPIA).

During the CMS Wave, this business process addresses how investments managed internally and externally are recorded and tracked within Florida PALM. This includes generating accounting for all transactions throughout the lifecycle of the investments (e.g., purchases, sales, and amortization).

Dependencies and Constraints

- Third-party investment partner provides detailed individual security information for updates to investments held by the State of Florida, including updates to market rates and coupon payment dates.
- The Treasury Master data is available from the third-party investment partner for automated retrieval and import.

Business Process Flow Details

Table 1: Process Steps Included on CMSW Business Process Model Flow

CMSW.70.6 Create and Maintain Deals		
Swim Lanes – Definition	<p>DFS CM Accounting Approver: DFS Treasury role responsible for reviewing and approving accounting exceptions</p> <p>DFS Investment Accounting Processor: DFS Treasury role responsible for accounting for investments</p> <p>DFS Investment Investor: DFS Treasury staff responsible for managing investments</p> <p>External Trade Managers: <i>(Non-Florida PALM role)</i> External investment managers responsible for managing investments</p>	
Process Step Title	Process Step Title	Description of Process
1	Execute External Trades	External Managers execute trades and send the trade data to third-party investment partner.
2	Execute Internal Trades	Treasury invests any new cash transferred to the Custodial Bank account as well as performs routine trading to maximize investment earnings.

Process Step Title	Process Step Title	Description of Process
3	Extract Trade Transaction Data	Third-party investment partner extracts the internal and external trade transactional data.
4	Treasury Master Interface	Third-party investment partner transmits internal and external trade transactions to Florida PALM after the market closes.
5	Import Treasury Master Data	The Inbound Treasury Master Interface data is systematically imported after the file is received from the third-party investment partner. To track and maintain investment data, all daily trade activity is recorded in Florida PALM at the individual security detail level.
6	Generate and Distribute Reports	The daily balancing reports are generated and distributed to the appropriate users.
7	Create Treasury Transactions	Interest payments, coupons, and maturities systematically generate a Treasury transaction within Florida PALM.
8	Calculate Interest, Revenues and Losses	New investments, interest, revenues and losses, maturities, and other investment lifecycle transactions are recorded daily on a modified accrual basis.
9	Generate Treasury Accounting	Florida PALM generates accounting entries for accounting events associated with investments recorded in the system. Florida PALM also creates accounting for the cash flow supporting the purchase or maturity of the investment. These entries are included in the monthly reconciliation described in the CMSW.10.3.1 Perform Month End Close business subprocess. Treasury receipts are interfaced to Central FLAIR following the CMSW.60.2.6 Treasury Receipts, Adjustments, and Returned Items.
10	Review and Approve Accounting	If accounting exceptions exist, the DFS CM Accounting Approver reviews and resolves the accounting exception within Florida PALM.
11	Extract Trade Positions Data	Florida PALM extracts the trade positions data.
12	Outbound Trade Positions Interface	Florida PALM transmits trade positions data to the third-party investment partner.
13	Perform Reconciliations	The reconciliation is performed using the trade positions data.
14	Resolve Exception	If an exception is identified, the DFS Investment Accounting Processor resolves the exception within Florida PALM or works with the third-party investment partner, if necessary.
15	Review Investment Totals	The Investment Accounting Processor reviews investment totals on a daily and monthly basis, including the income summary report. On an annual basis, investment information captured as part of this process, supports the creation of the CAFR.
16	Review Investment Maturities and Earnings	The DFS Investment Reporter reviews investment maturities and earnings. Earnings are used to decide if a purchase or sell of trades is required.

Ledger Impacts

Table 2: Ledger Impacts Included on CMSW Business Process Model Flow
