

Banking Module Configurations

The Florida PALM system creates a default cash accounting line on a deposit in the AR module based on the bank account configuration in the Banking module. The default cash line will assist with the close out process if the banking vendor changes or if the bank account is no longer being used by an agency. To reduce accounting lines in the cash account (WFC###), agencies must provide default ChartField values (Organization, Fund, Budget Entity, Category, State Program) for a default cash line for agency concentration subaccount(s). To assist in providing this information, a new configuration worksheet, *Banking Default Cash Line for Concentration Subaccount*, has been created in your Banking folder in Smartsheet.

NOTE: The default values provided should rarely, if ever change.

Business Process and Subprocess

The Banking Default Cash Line for Concentration Subaccount configuration supports the following business process and subprocess:

Table 1: Banking Default Cash Line for Concentration Subaccount Business Process and Subprocess

Business Process	Business Subprocess
60.2 Deposit and Apply Receipts	60.2.1 Direct Journal Deposits 60.2.2 AR Deposits 60.2.3 Returned Items

Configuration Value Purpose and Use

- The Banking Default Cash Line for Concentration Subaccount is a combination of Florida PALM ChartField values and is a default cash accounting string (system line) used to create deposit accounting lines.
- Failure to confirm a valid ChartField string will result in deposit accounting errors.

The ChartField values that are available in the Banking Default Cash Line for Concentration Subaccount worksheet are sourced from related agency worksheets and statewide values (Figure 3) to ensure the most current information is available in associated ChartField drop-down selections in your agency’s configuration workbooks.

Failure to complete the <Agency> Organization Configuration worksheet will result in Organization ChartField values being unavailable for selection by your agency in the Banking Default Cash Line for Concentration Subaccount worksheet.

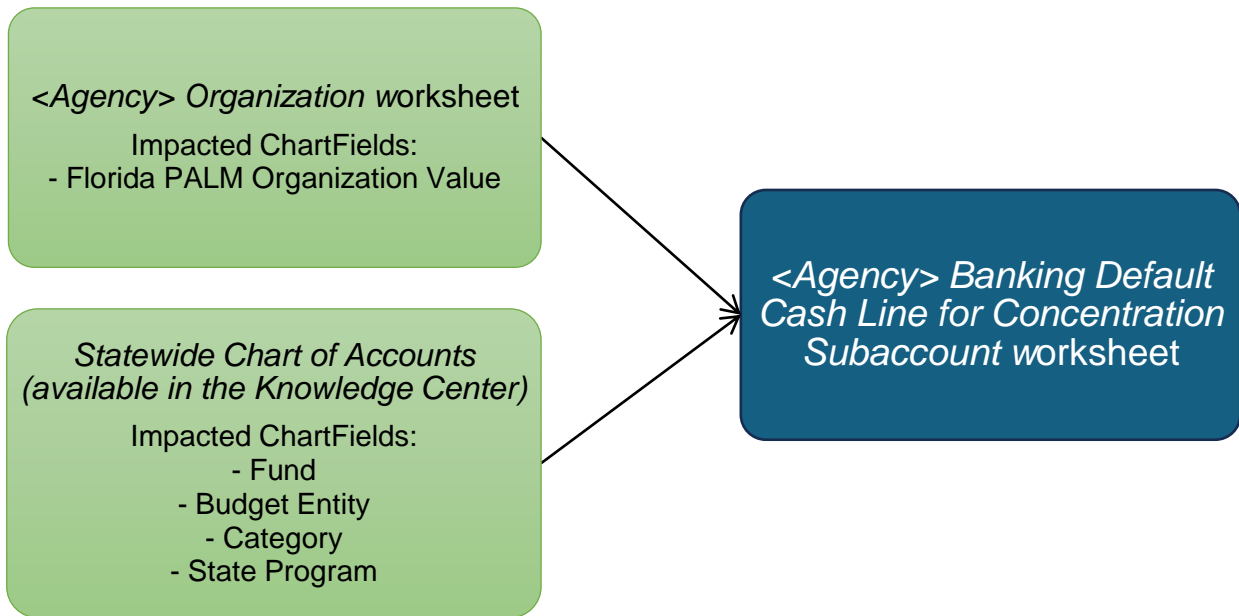

Figure 3: Cross-worksheet Connections for Banking Default Cash Line for Concentration Subaccount

Configuration Design Details

The following design considerations are applied when defining a Banking Default Cash Line for Concentration Subaccount in Florida PALM:

- The agency considers what they need as a default accounting string for deposits, one per bank account. The Banking Default Cash Line for Concentration Subaccount is maintained centrally by DFS Treasury.

Assumptions

The following assumptions are considered when defining a Banking Default Cash Line for Concentration Subaccount:

- The agency considers deposit transaction volume and most used accounting string on the concentration bank subaccount to determine a default ChartField string to minimize balancing (101013) lines.
- The agency considers ChartField values that rarely change for the default ChartField string. This consideration will assist in the close out process of the cash account (WFC###), if the State has a banking vendor contract change or the bank account is no longer in use with the agency.

Configuration Field Details

Agencies must confirm (Yes) or update the following ChartField values (Organization, Fund, Budget Entity, Category, State Program) as listed in the <Agency> Banking Default Cash Line for Concentration Subaccount worksheet in Smartsheet. The Project previously defaulted these values based on the AR Distribution Code used for creating returned item deposits from the bank. The previously defaulted ChartField values are represented in the Configured Florida PALM Value columns.

Worksheet Instructions

The below information provides detailed instructions on how to complete the <Agency> *Banking Default Cash Line for Concentration Subaccount* worksheet in Smartsheet.

1. Review the worksheet and determine whether the configured values need updating in Florida PALM.
2. In the *Configure Value* column:
 - a. Select “Yes” to confirm the configured Banking Default Cash Line for Concentration Subaccount.
 - i. If selected, no further action is needed on this row and the *Agency Provided ChartField Value* columns should remain blank, as indicated by grey conditional formatting.

Configure Value	SetID	Bank Account #	Account Short Description	Configured Florida PALM Organization Value	Agency Provided Organization Value	Account	Configured Florida PALM Fund Value	Agency Provided Fund Value
Yes	12345	1234500_HQA_BKG_LICENSURE_UNIT	DEMO CON SUB ACCOUNT	1000000000		WFC000	00300	
Update								

Figure 6: Configure Banking Default Cash Line for Concentration Subaccount

- b. Select “Update” to update the configured ChartField Values (Organization, Fund, Budget Entity, Category, State Program).
 - i. Updates to the configured ChartField Values – Select the desired ChartField value in the *Agency Provided (Organization, Fund, Budget Entity, Category and State Program) ChartField Value* column. These are drop-down columns that contain all established Florida PALM ChartField values.

Agency Provided (Organization, Fund, Budget Entity, Category and State Program) *ChartField Value* columns that do not require updates should remain blank. Only values that require updates should have the *Agency Provided ChartField Value* column completed.

1. Once a value is selected in the *Agency Provided ChartField Value* column, where *Configure Value* is “Update”, the *Configured Florida PALM* column will turn grey.

Configure Value	SetID	Bank Account #	Account Short Description	Configured Florida PALM Organization Value	Agency Provided Organization Value	Account	Configured Florida PALM Fund Value	Agency Provided Fund Value
Update	12345	1234500_HQA_BKG_LICENSURE_UNIT	DEMO CON SUB ACCOUNT	1000000000	2000000000	WFC000	00300	
Update								

Figure 7: Update Banking Default Cash Line for Concentration Subaccount

3. Review and correct any errors identified in the *Error Messages* column.
4. Use the *Comments* field, optionally, for your internal purposes.
