

Florida PALM is an off-the-shelf software

But we still need to make sure it fits our needs!

Join our conversation

Design, Build, Test

- Right now, you and the Project team are designing the system blueprints together. Through collaboration, you are defining the pieces (process and data) to build Florida PALM. Keep the questions coming!
- Then, the Project team gathers all the pieces, creates a plan, and builds the system. This takes a little time, and they may have questions for you along the way.
- The final step will test what was built. You, the Project team, and other stakeholders will test the design and build before launch.

STEP 1

DESIGN

Agencies and the Project team create a blueprint for the State's accounting system. Together, forming the pieces by defining business processes and identifying data needs. This answers our WHAT questions.

STEP 2

BUILD

The Project team creates functional designs and builds Florida PALM based off the pieces formed with agencies. This answers our WHEN questions.

STEP 3

TEST

Agencies, the Project team, and other stakeholders test the design and build of Florida PALM. This answers our HOW questions.

Design

Business Process Models Sept-Dec 2021

Configuration Feb-June 2022

Build

Functional Design Mar-Oct 2022

Build, Unit Test May-Dec 2022

Agency Test

Interface Testing
May-Nov 2023

User Acceptance Testing
Oct 2023-Feb 2024
