Money Safety

When you are carrying money and credit cards, it is important that you know some tips that can help keep you safe!

Cash-Handling

• Keep your money in a wallet or purse and always put it back when you are done using it.

• Do not count your money in front of people.

• If you buy something using money, put your money away before you leave the store.

• Don't carry too much cash. It is safer to only carry the cash that you need.

Credit Cards and Personal Information

• Always sign your name or write "Check ID" on the back of your credit card, as soon as you get it.

• Do not give your credit card number or personal information to someone over the phone or email.

• Do not share your personal information with someone that you do not know.

• Always check your account. If there is a purchase that you have not made, call the number on the back of your card to talk to your bank or credit card company.
