Letter from the State Fire Marshal .....	3
Overview of Law .....	5
New Inspection Reporting Procedure .....	7
Inspection Summary .....	9

Dear Floridian,

For the past five years, the State Fire Marshal's Office has reported on the status of fire safety inspections in Florida's public schools in its annual report. In accordance with Florida Statutes, each local school district and fire department is required to inspect every public school within each jurisdiction annually.

This year, the school districts submitted their reports at their highest percentage yet, with 99 percent reporting for the 2006-2007 school year. While 100 percent is ideal, this is a tremendous improvement that should be commended.

As State Fire Marshall, I work to ensure that the school districts and local fire officials have the tools necessary to complete these reports accurately and in a timely fashion.

The Summary Inspection feature of the Web-based School Report System (SRS) is still available and can significantly reduce input time in the SRS. Additionally, inspection reports can be entered immediately following an inspection, which eliminates the need to submit hard copies of fire safety reports to the State Fire Marshall.

The Division continues to encourage joint inspections, which are inspections performed at the same time by both the school district fire safety inspector and the local fire official. Joint inspections allow cooperation between fire safety professionals; the collaborative effort improves the quality of inspections, reduces the burden on classroom disruption and produces uniform and consistent documentation of deficiencies.

The safety of our schoolchildren and communities is contingent upon the efficiency of the Division of State Fire Marshal. I am encouraged by our recent improvements and look forward to continuing the good news in the year ahead.

Sincerely,

A handwritten signature in cursive script that reads "Alex Sink".

Alex Sink  
Florida Chief Financial Officer  
State Fire Marshal

# Overview of Law

---

## Overview of the Requirements of Section 1013.12, Florida Statutes

The firesafety inspections referred to in the statute above are applicable to all buildings owned, leased, or being lease-purchased by the school board, including all permanent and re-locatable buildings. In addition, they must begin not sooner than one year after a new building has been occupied. They must be performed each fiscal year in accordance with any applicable code or standard, such as NFPA 101, as adopted in Rule 69A-3.012, Florida Administrative Code, or any other applicable code or standard which has been adopted in Rule Chapter 69A-58, Florida Administrative Code. Finally, the subject inspections are not applicable to new construction or new buildings which are subject to and controlled by Section 1013.38, Florida Statutes.

Each firesafety inspection report and plan of correction must contain, at a minimum, the name of the school district or community college, the name of the local fire authority having jurisdiction (that is, the municipality, county, or special district), the name of the facility inspected, the type of facility

inspected (that is, K-5, 6-9, 10-12, community colleges, other), the facility address, the number of the facility as listed in the Florida Inventory of School Houses (FISH#), the name, address, and phone number of each

inspector and the designation of whether such inspector is a special fire safety inspector or a municipal fire safety inspector, the date of the inspection, and each violation or deficiency noted during an inspection.

Reports of the inspections must be filed with the local school board and the local site administrator. A plan and schedule for correction of any deficiency in the inspection report must be developed by any fire safety

*Continued on page 6*

---

inspector finding a deficiency in conjunction with the school board and that plan and schedule then must be adopted and complied with by the school board.

Furthermore, each violation or deficiency report must contain the Building name or number and, if applicable, the room number of the building in which the violation was noted; a description of the violation or deficiency and the number of times this violation or deficiency has been cited. In addition, the estimated correction date, total number of violations or deficiencies cited not involving serious life safety hazards and the total number of violations or deficiencies cited involving serious life safety hazards. Finally, the date of the scheduled re-inspection, a statement that the district has or has not complied with 1013.12(1)(c), a statement that the local authority having jurisdiction has or has not complied with 1013.12(2) c), including verification that the required fire drills have been completed. The report must include the signature of the district inspector if the inspection was made by the school district, or the signature of the local fire official if the local authority having jurisdiction made the inspection. If joint inspections were performed, both the school district fire safety inspector and the local fire official must each sign the report.

When the violation or deficiency has been corrected, the school board must notify the division of such correction. The inspection reports noted above together with the plan and schedule for correction of any deficiency must be submitted to the division by June 30, of each year.

# New Inspection Reporting Procedure

---

## **New Inspection Reporting Procedure Is Available**

In an effort to streamline the reporting process of fire safety inspection reports to our office by school districts and local fire officials, the State Fire Marshal (SFM) has modified its Public School Reporting System (SRS). The purpose of this modification is to allow school districts and local fire officials another reporting option by submitting a simplified general summary report of fire deficiencies noted for each school and ancillary facility inspected.

When submitting a general summary report, this feature is accessible at the point when you identify the inspecting authority, and is labeled, "Summary Inspection." You may use this option by simply checking its box, in addition to checking the inspecting authority. Simply not checking the "Summary Inspection" box will allow you to enter detail reports in the SRS as normal. Currently, any firesafety violation must be coded using form DFS-K3-1674, "Master Violations Code List." The simplified summary inspection feature will allow the inspecting authority to total the number of violations for each category, and simply type that number into each respective category.

**Example:** If for a particular facility you have 10 – Means of Egress violations, and 5 – Fire Alarms violations, then you would simply type 10 into the 200 category, and 5 into the 400 category, leaving the other categories as the default "0", and follow the remaining steps.

If you choose not to use the SRS, you may still utilize the summary inspection procedure by simply providing the SFM with a one page summary for each facility inspected. The summary page must include the following information: the inspecting authority, inspection date, facility name and address being inspected, and the total number of violations in each category. This serves the purpose of eliminating the need to send full inspection reports, requires the submission of a one page document per facility, and meets the submission requirements of Chapter 1013.12, Florida Statutes. Full copies of inspection reports are not required and should not be sent.

## ***Potential School Reporting System Enhancement***

The SFM is attempting to increase the school district's ownership of the school lists in the SRS for their respective district. The purpose of this is to allow school districts the ability to manage their data list; specifically, giving them the ability to indicate through the SRS which facilities are not required

*Continued on page 8*

---

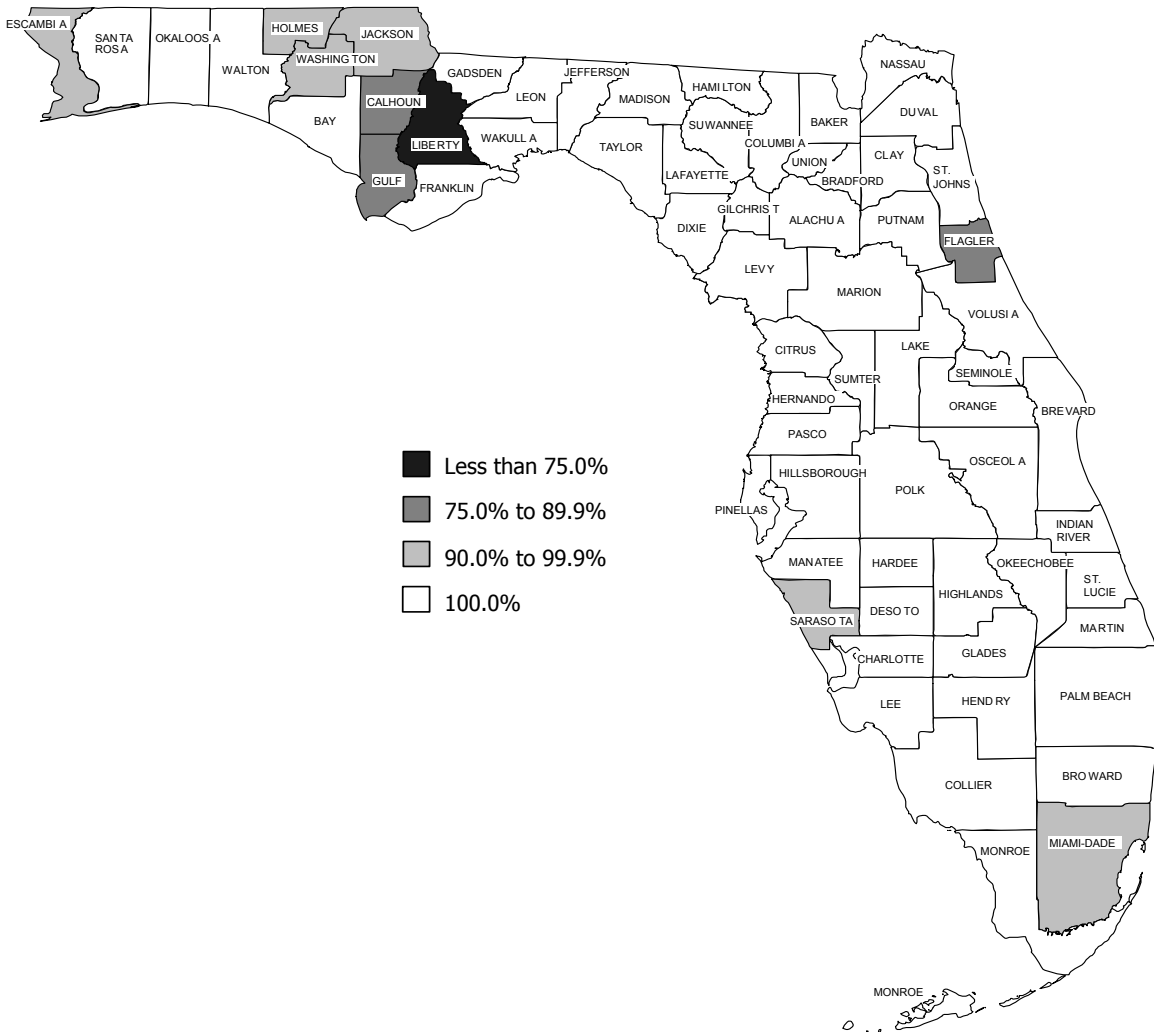

to be inspected, and for what reason. While this is still in the inception phase, it is our hope to restructure the system to avoid discrepancies, which will ultimately lead to obtaining a 100% report rating. Moreover, the SFM is also exploring a reporting option that would reduce the amount of entry time to one minute or less for each school. For example, if you had 45 schools and ancillary facilities, the entry would take approximately 45 minutes to complete. Another advantage is that this entry could be performed by any personnel designated by the school district.

If you have any questions regarding the statutorily reporting process, or the requirements of Rule Chapter 69A-58, you may contact Mr. Scott Langston with the Division of State Fire Marshal at [scott.langston@fldfs.com](mailto:scott.langston@fldfs.com) or 850.413.3619.
