Letter from the State Fire Marshal	3
Overview of Law	5
Inspection Summary	7

STATE OF FLORIDA
CHIEF FINANCIAL OFFICER
ALEX SINK

Dear Floridians:

For the past six years, the State Fire Marshal's Office has reported on the status of fire safety inspections in Florida's public schools in our annual report. In accordance with Florida Statutes, each local school district and fire department is required to inspect every public school within each jurisdiction annually.

As State Fire Marshal, I am working to ensure that our state's school districts and local fire officials have all the tools necessary to complete these reports in an accurate and timely manner. In this report, the school districts submitted their reports at their highest percentage yet, with 99.5% percent reporting for the 2007-2008 school year, and I commend their significant efforts.

The safety of our school children and communities is contingent upon the diligent work of our State Fire Marshal team, and I am so proud of their service to the people of Florida.

Sincerely,

A handwritten signature in cursive script that reads "Alex Sink".

Alex Sink

Overview of Law

Overview of the Requirements of Section 1013.12, Florida Statutes

The firesafety inspections referred to in the statute above are applicable to all buildings owned, leased, or being lease-purchased by the school board, including all permanent and re-locatable buildings. In addition, they must begin not sooner than one year after a new building has been occupied. They must be performed each fiscal year in accordance with any applicable code or standard, such as NFPA 101, as adopted in Rule 69A-3.012, Florida Administrative Code, or any other applicable code or standard which has been adopted in Rule Chapter 69A-58, Florida Administrative Code. Finally, the subject inspections are not applicable to new construction or new buildings which are subject to and controlled by Section 1013.38, Florida Statutes.

Each firesafety inspection report and plan of correction must contain, at a minimum, the name of the school district or community college, the name of the local fire authority having jurisdiction (that is, the municipality, county, or special district), the name of the facility inspected, the type of facility

inspected (that is, K-5, 6-9, 10-12, community colleges, other), the facility address, the number of the facility as listed in the Florida Inventory of School Houses (FISH#), the name, address, and phone number of each inspector and the designation of whether such inspector is

a special fire safety inspector or a municipal fire safety inspector, the date of the inspection, and each violation or deficiency noted during an inspection.

Reports of the inspections must be filed with the local school board and the local site administrator. A plan and schedule for correction of any deficiency in the inspection report must be developed by any fire safety inspector finding a deficiency in conjunction with the school board and that plan and schedule then must be adopted and complied with by the school board.

Continued on page 6

Overview of Law *continued*

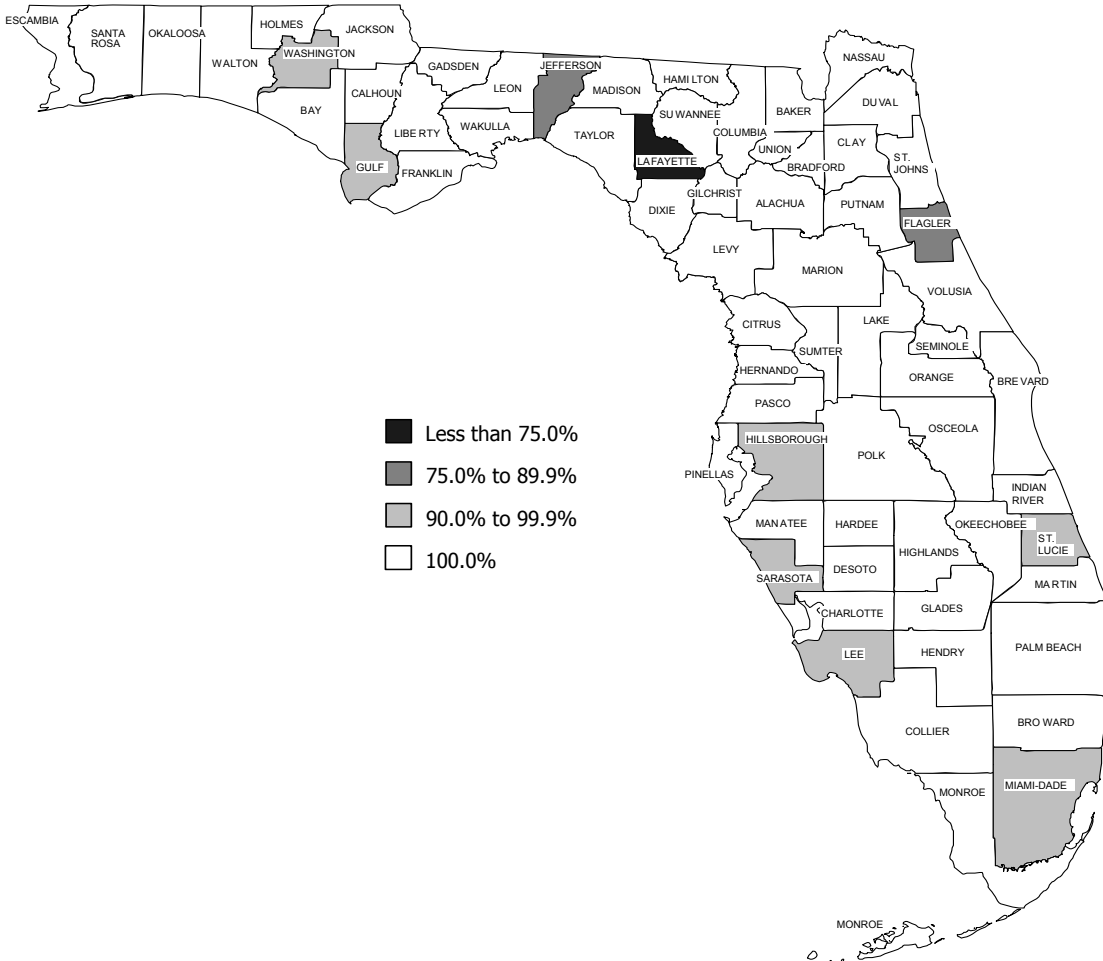

Furthermore, each violation or deficiency report must contain the Building name or number and, if applicable, the room number of the building in which the violation was noted; a description of the violation or deficiency and the number of times this violation or deficiency has been cited. In addition, the estimated correction date, total number of violations or deficiencies cited not involving serious life safety hazards and the total number of violations or deficiencies cited involving serious life safety hazards. Finally, the date of the scheduled re-inspection, a statement that the district has or has not complied with 1013.12(1)(c), a statement that the local authority having jurisdiction has or has not complied with 1013.12(2) c), including verification that the required fire drills have been completed. The report must include the signature of the district inspector if the inspection was made by the school district, or the signature of the local fire official if the local authority having jurisdiction made the inspection. If joint inspections were performed, both the school district fire safety inspector and the local fire official must each sign the report.

When the violation or deficiency has been corrected, the school board must notify the division of such correction. The inspection reports noted above together with the plan and schedule for correction of any deficiency must be submitted to the division by June 30, of each year.

Inspection Summary (Statewide)
