Letter from the State Fire Marshal .....	3
Overview of Law .....	5
Inspection Summary .....	7

STATE OF FLORIDA  
CHIEF FINANCIAL OFFICER  
ALEX SINK

Dear Floridians:

For the past seven years, the Division of State Fire Marshal has reported the status of fire safety inspections in Florida's public schools in its *Florida Public School's Annual Safety Report*. In accordance with Florida Statutes, local school districts and fire departments are required to inspect every public school within their jurisdictions annually.

While Florida experienced an increase of nearly 200 public school facilities in Fiscal Year 2008-2009, the reporting rate stood strong at over 97 percent. Detailed information pertaining to each district can be found in the following pages of this report.

As your State Fire Marshal, it is one of my responsibilities to ensure that the school districts and local fire officials have the tools necessary to complete these reports accurately and in a timely manner. Because of this, a web-based School Report System was created and is offered for school districts to utilize when compiling their data. The School Report System has reduced input time, allowed reports to be entered immediately following an inspection, and eliminated the need to submit hard copies of reports to the Division. This web-based tool also allows Floridians to easily view previous fire safety inspection reports for their local schools online. You can learn more about the web-based reporting tool by visiting the State Fire Marshal's School Fire Safety page at <http://www.myfloridacfo.com/sfm/sfmschoolsafety.htm>.

The Division of State Fire Marshal also continues to encourage joint inspections, performed at the same time by both the school district fire safety inspector and the local fire official, to promote cooperation between fire safety professionals. This joint effort improves the quality of inspections, reduces the burden on classroom disruption, and produces uniform and consistent documentation of deficiencies. If you have questions regarding the requirements of Rule Chapter 69A-58 or the statutorily required annual reporting process, you may email the Division of State Fire Marshal at [Fire.Prevention@MyFloridaCFO.com](mailto:Fire.Prevention@MyFloridaCFO.com) or call (850) 413-3171.

The safety of our school children and communities depends on the collaborative effort of local school districts, local fire departments, and the Division of State Fire Marshal. I would like to thank everyone involved in this effort, and especially the outstanding State Fire Marshal team, for their dedication and work to keep our students and schools safe.

Sincerely,

A handwritten signature in cursive script that reads "Alex Sink".

Alex Sink

# Overview of Law

---

## Overview of the Requirements of Section 1013.12, Florida Statutes

The firesafety inspections referred to in the statute above are applicable to all buildings owned, leased, or being lease-purchased by the school board, including all permanent and re-locatable buildings. In addition, they must begin not sooner than one year after a new building has been occupied. They must be performed each fiscal year in accordance with any applicable code or standard, such as NFPA 101, as adopted in Rule 69A-3.012, Florida Administrative Code, or any other applicable code or standard which has been adopted in Rule Chapter 69A-58, Florida Administrative Code. Finally, the subject inspections are not applicable to new construction or new buildings which are subject to and controlled by Section 1013.38, Florida Statutes.

Each firesafety inspection report and plan of correction must contain, at a minimum, the name of the school district or community college, the name of the local fire authority having jurisdiction (that is, the municipality, county, or special district), the name of the facility inspected, the type of facility

inspected (that is, K-5, 6-9, 10-12, community colleges, other), the facility address, the number of the facility as listed in the Florida Inventory of School Houses (FISH#), the name, address, and phone number of each inspector and the designation of whether such inspector is

a special fire safety inspector or a municipal fire safety inspector, the date of the inspection, and each violation or deficiency noted during an inspection.

Reports of the inspections must be filed with the local school board and the local site administrator. A plan and schedule for correction of any deficiency in the inspection report must be developed by any fire safety inspector finding a deficiency in conjunction with the school board and that plan and schedule then must be adopted and complied with by the school board.

*Continued on page 6*

## Overview of Law *continued*

---

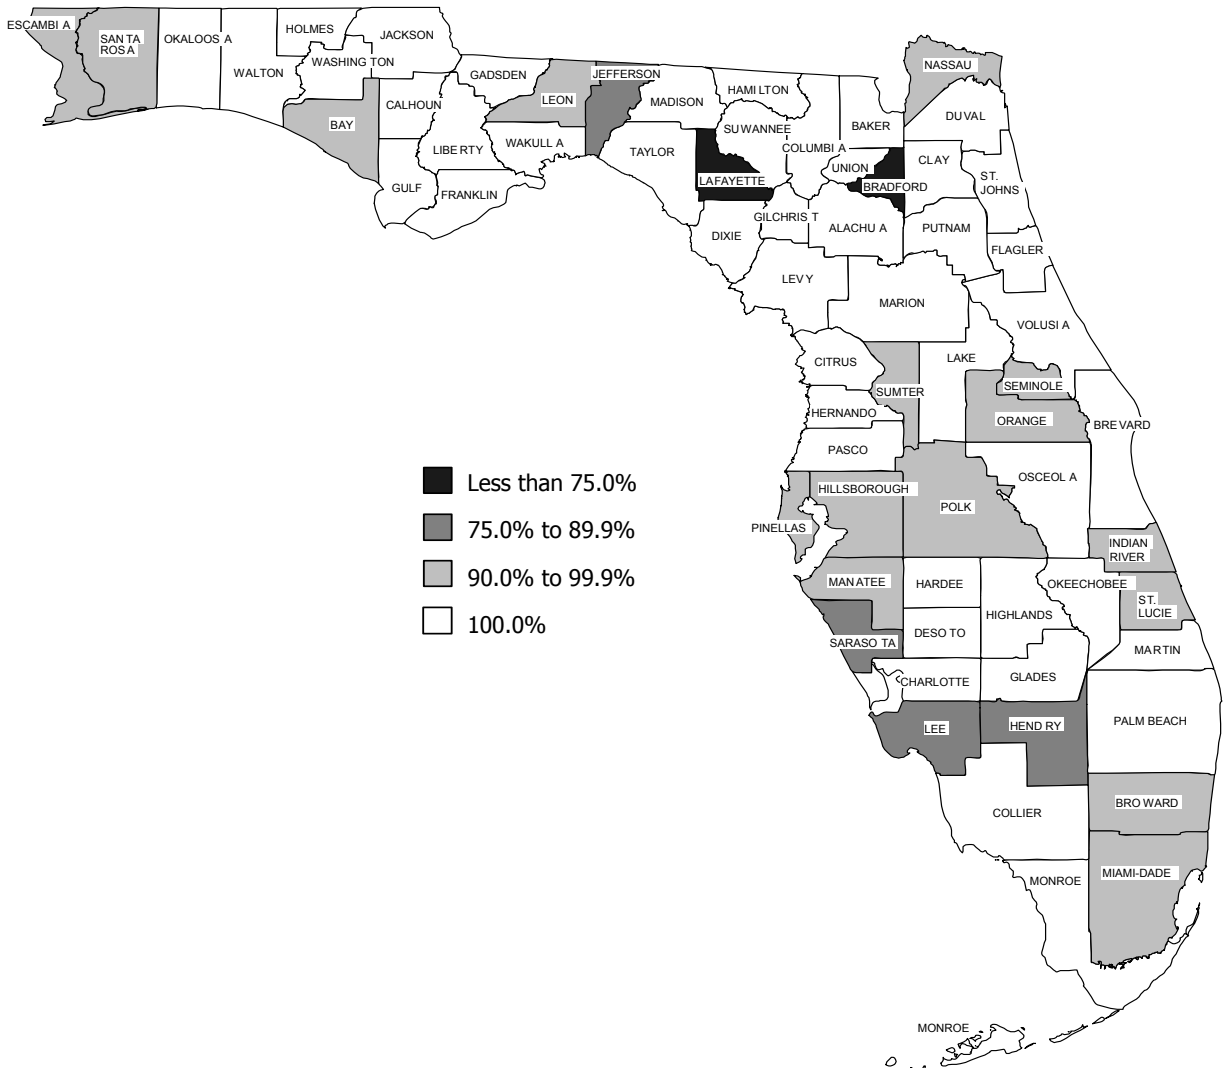

Furthermore, each violation or deficiency report must contain the Building name or number and, if applicable, the room number of the building in which the violation was noted; a description of the violation or deficiency and the number of times this violation or deficiency has been cited. In addition, the estimated correction date, total number of violations or deficiencies cited not involving serious life safety hazards and the total number of violations or deficiencies cited involving serious life safety hazards. Finally, the date of the scheduled re-inspection, a statement that the district has or has not complied with 1013.12(1)(c), a statement that the local authority having jurisdiction has or has not complied with 1013.12(2) c), including verification that the required fire drills have been completed. The report must include the signature of the district inspector if the inspection was made by the school district, or the signature of the local fire official if the local authority having jurisdiction made the inspection. If joint inspections were performed, both the school district fire safety inspector and the local fire official must each sign the report.

When the violation or deficiency has been corrected, the school board must notify the division of such correction. The inspection reports noted above together with the plan and schedule for correction of any deficiency must be submitted to the division by June 30, of each year.
