Submitter Responsibilities

Obtaining a Submitter ID

A submitter must complete and submit to the division the New Submitter Specifications document for assignment of a Submitter ID prior to transmittal of the first electronic submission. This document is found on page 81 of this guide.

Each submitter will receive only one Submitter ID. All transmissions received by the division must contain medical bills with the same Submitter ID in the control numbers as reported in the transmission header.

Submitting a Submitter Client List

A submitter must provide the division with an accurate and complete list of insurers and/or service co/TPAs for whom they will be transmitting electronic data. This list must include the insurer's code number and, if applicable, the service co/TPA's code number (both assigned by the division), full name, federal employer identification number (FEIN), and office location zip code. It is the responsibility of the submitter to notify the division when any insurer or service co/TPA is added to or deleted from the client list, to avoid medical bill rejection when transmissions are processed. The Submitter Client Listing Update Request Form on page 83 is used for this notification.

Establishing an SSL/FTP Account

An SSL/FTP account shall be established for transmitting electronic medical transactions to the division. Instructions for setting up an SSL/FTP account can be downloaded from the division's website at www.fldfs.com/wc or can be obtained by contacting the Medical Data Management Section in the Office of Data Quality and Collection at 850.413.1607.

Submitting Test Transmissions

Prior to submission of production data to the division, each submitter must provide a test transmission for each form type (Forms DFS-F5-DWC-9, DFS-F5-DWC-10, DFS-F5-DWC-11, DFS-F5-DWC-90). The division will review and analyze the test transmission to ensure the accuracy of the data being transmitted and program compatibility with division standards outlined in the section entitled "DWC Form File Layouts" beginning on page 9 of this guide. Instructions for the test transmission are found in the "Test Transmission Guidelines" section on page 5 of this guide.

Test Transmission Guidelines

Before a submitter can be approved to submit production data to the division, the submitter must send a test transmission to the division for each form type being filed. This test transmission is reviewed and analyzed to ensure the data are formatted in accordance with the standards detailed in the “DWC Form File Layouts” section beginning on page 9 of this guide and in accordance with s. 440.13(4) and s. 440.185(5), Florida Statutes. (See Appendix J for proper file naming formats.)

Test Transmission Content

For each of the four form types (Forms DFS-F5-DWC-9, DFS-F5-DWC-10, DFS-F5-DWC-11, or DFS-F5-DWC-90), data in the test transmission must match the data shown on 15 paper claim forms. Test transmissions must be sent via SSL/FTP.

Test files must incorporate scenario testing that the Medical Data Management team deems necessary, dependent upon the format revision.

Requirements for Test Transmission of Paper Claim Forms

A copy of the paper claim forms matching the 15 electronically transmitted reports must accompany the test transmission and be sorted in the order they appear on the transmission. Failure to properly sort paper claim forms could result in a delay in processing the test transmission.

Test Transmission Processing Address

The test transmission paper claim forms may be sent to the division at the following address:

Florida Department of Financial Services

Division of Workers' Compensation

Office of Data Quality and Collection

Attn: Medical Data Management Section

200 E. Gaines Street

Tallahassee, Florida 32399-4226

The test transmission paper claim forms may also be faxed to (850) 921-0305.

Test Transmission Approval

If the test transmission meets division requirements for approval, the submitter will be notified in writing, by e-mail, of the date electronic submission of production data may begin.

Test Transmission Rejection

If the test transmission fails to meet requirements for approval, the submitter will be notified in writing, by e-mail, as to the reasons for the rejection. The division will retain the copies of the submitted paper claim forms for use when the submitter resubmits the test transmission for review.

NOTE: Data used in a test transmission are NOT considered “filed with the division”. The filing requirement of the originally received claim form from the provider must be met pursuant to Rule 69L-7.602 (5)(e), F.A.C., by submitting the data again in production.

Production Transmission Guidelines

Types of Transmissions Effective November 1, 2004

Beginning November 1, 2004, all submitters shall submit data using only the SSL/FTP transmission method.

The submitter will be notified via e-mail if the data transmission cannot be processed, and the transmission will be placed in the “badfiles” folder on their SSL/FTP account. Data are not considered “filed with the division” until the submitter submits a replacement transmission that is successfully accepted into the division’s database. (Refer to Appendix J for proper file naming formats.)

Sequencing of Records in Transmissions:

All transmissions must be submitted with records in the following order:

Transmission Header Record (HD1)
Medical Bill #1 Header Record
Medical Bill #1 Detail Record #1
Medical Bill #1 Detail Record #2
Medical Bill #1 Detail Record #3 (actual number of detail records for each bill varies)
Medical Bill #2 Header Record
Medical Bill #2 Detail Record #1
Medical Bill #2 Detail Record #2
Medical Bill #3 Header Record
Medical Bill #3 Detail Record #1
Medical Bill #3 Detail Record #2
Medical Bill #3 Detail Record #3
Medical Bill #3 Detail Record #4
Transmission Trailer Record (TR1)

NOTE: Only one set of HD1/TR1 records is allowed for each transmission file. When transmitting all four form types on a monthly basis, it will be necessary to transmit four separate transmission files each month (one for each form type).

Submitting a Previously Reported Disallowed or Denied Line Item

If one or more line item(s) are disallowed or denied for a medical bill, these line items must be submitted to the division with the entire medical bill using the appropriate EOBR codes found in Appendix E and reporting the disallowed or denied charges as \$0.00. If and when the disallowed or denied line item(s) are resubmitted by the provider and paid or adjusted and paid, they must be reported to the division as a new bill with new unique control numbers.

Division Processing of Data Transmissions

Each data transmission received is processed through a data quality program specific to the medical bill form type. Each medical bill is validated and analyzed. Once the transmission has been processed through the data quality programs, Medical Bill Processing Reports are generated. These reports will be placed in the outgoing folder on the division's SSL/FTP account for the submitter to retrieve as notification of the division's acceptance or rejection of the medical report data submitted. The layout for this division-generated report can be found beginning on page 59 of this guide.

Division's Acceptance / Rejection / Bypass/ Withdrawal/Replacement of Medical Bills

Submitted medical bills containing no errors in any data elements will be accepted by the Medical Data Management System. Submitted medical bills containing errors in any data element will be rejected by the system. Upon completion of processing the submitted file, a Medical Bill Processing Report will be placed, in two formats (PDF and text file), in the "outgoing" folder of the submitter's SSL/FTP mailbox. The submitter will be notified via e-mail when the reports are completed and available for pickup. The PDF version summarizes the number of medical bills submitted, accepted, bypassed, withdrawn, and rejected in the transmission. This report also lists each medical bill submitted, its status as accepted, bypassed, withdrawn, or rejected, and the reason(s) for rejection. The TXT version contains the same information as the PDF file in a machine readable fixed-column format (see page 59 for file layout).

After receiving this report, the submitter shall verify that all of the data in the transmission have been accurately accounted for on the report and investigate any errors. All rejected medical bills must then be re-submitted with necessary corrections, using the same control number as the original rejected medical bill(s) to the division. The original submission, the re-submission of rejected medical bills, and the replacement of previously accepted medical bills must be in compliance with Rule 69L-7.602 (5)(e), F.A.C. Data are not considered "filed with the division" until they have been submitted with no errors and accepted into the medical database.

IMPORTANT NOTE: When submitting a correction for a rejected medical bill, a replacement (amended/readjusted/data cleanup) for an accepted medical bill, or a withdrawal medical bill, use the same control number that was used in the original submission of the medical bill.

Division's Outstanding Rejection Reports

Twice each month, the division will generate an Outstanding Rejection Report, which will be placed, in two formats (PDF and text file), in the "outgoing" folder on the SSL/FTP server for pick up by batch submitters. This report is comprised of cumulative unresolved rejection issues and serves as a reminder of the corrections that need to be made. Rejections that have not been corrected and successfully accepted into the division's database are not considered "filed with the division" and are subject to penalty pursuant to Rule 69L-7.602 (7) or 69L-7.24 Florida Workers' Compensation Medical Services Billing, Filing and Reporting Rule, F.A.C., where date appropriate.
